Histophysiology of the Immune System Sigbjørn Fossum, Bent Rolstad, 2012-12-06 The 9th International Conference on Lymphatic Tissues and Germinal Centres in Immune Reactions was held in Oslo 9 14 August 1987 These conferences by the regular devotees just referred to as the germinal centre conferences or GCC have been held regularly at roughly three year intervals since 1966 The credo of these conferences is in vivo veritas signifying that investigating components like molecules and cells only gives partial truth The components must ultimately be explored in their natural context to see how they interact with other parts and are integrated to a whole To the biologist it is obvious that the world must be investigated at many different levels of organization At each level the patterns observed represent just some of many possible ways of putting together the elements of the lower levels These patterns are not predetermined but the results of evolution i e of a history in which stochastic processes play a major role The organic world can therefore not be torn apart and then reconstructed from basic principles alone This realization is often expressed as the whole being more than the sum of its parts

The Immunology of Cardiovascular Homeostasis and Pathology Susanne Sattler, Teresa Kennedy-Lydon, 2017-06-30 Cardiovascular immunology is a newly emerging research area investigating the crosstalk between the cardiovascular and

the immune system This crosstalk is evident through 1 crucial immunological capacities and functions of cardiovascular cell types including cardiomyocytes fibroblasts endothelial cells pericytes and cardiac resident macrophages 2 the impact of aberrant immune function on the development of cardiovascular disease such as atherosclerosis direct and indirect immune mediated heart disease and vasculitis and 3 the crucial role of the immune system in cardiac repair and regeneration The Immunology of Cardiovascular Homeostasis and Pathology covers all these aspects of cardiovascular immunology starting with homeostatic immunological functions of traditional cardiovascular cell types and moving then to the role of the immune system in cardiovascular pathology and to recent research into targeting the immune system to boost cardiac healing and regeneration

The International System for Serous Fluid Cytopathology Ashish Chandra, Barbara Crothers, Daniel Kurtycz, Fernando Schmitt, 2020-11-05 This book is the culmination of an international effort to bring consistency and diagnostic efficiency to effusion cytology for the sake of patient care The authors recognize special challenges in serous fluid cytopathology such as reporting the presence of Mullerian epithelium in peritoneal fluids What is an appropriate serous fluid volume to ensure adequacy How should mesothelial proliferations be reported and is it appropriate to make an interpretation of malignant mesothelioma How specific should a report be regarding the origin and subtyping of tumors found in serous fluids What are the appropriate quality monitors for this specimen type Special chapters on considerations for peritoneal washings cytopreparatory techniques mesothelioma and quality management are included to address these issues The text contains literature reviews that elucidate existing evidence in support of current practices and recommendations Expert opinions on where evidence was lacking the most common practices were adopted by consensus and where there was no commonality are employed Written by experts in the field The International System for Serous Fluid Cytopathology serves as a collaborative effort between the International Academy of Cytology and the American Society for Cytopathology and calls upon participation of the international cytopathology and oncology communities to contribute to the development of a truly international system for reporting serous fluid cytology
