Gas Chromatography–Mass Spectrometry Diane C Turner, Mathias Schäfer, Steven Lancaster, Imran Janmohamed, Anthony Gachanja, Jason Creasey, 2019-11-28

Gas chromatography mass spectrometry GC MS is a powerful way to analyse a range of substances. It is used in everything from food safety to medicine. It has even been used to protect endangered vultures through analysis of poisonous pesticide molecules in their environment. I want to apply this technique where do I begin? Is GC MS the right technique to use? How do I prepare my samples and calibrate the instruments? This textbook has the answers to all these questions and more. Throughout the book case studies illustrate the practical process, the techniques used and any common challenges. Newcomers can easily search for answers to their question and find clear advice with coloured images on how to get started and all subsequent steps involved in using GC MS as part of a research process. Readers will find information on collecting and preparing samples, designing and validating methods, analysing results and troubleshooting. Examples of pollutant food oil and fragrance analysis bring the theory to life. The authors use their extensive experience teaching GC MS theory and practice and draw on their combined backgrounds applying the technique in academic and industry settings to bring this practical reference together. The authors also design and teach the Royal Society of Chemistry's Pan Africa Chemistry Network GC MS course which is supported by GSK.
