In Defence of Conspiracy Theories Brian Nugent, 2009 This book is an attempt to address the widespread criticism of conspiracy theories raising issues like the control and negligence of the main organs of the media and police which make it difficult for true information to reach the public and hence the public remain in ignorance of and dismiss as a conspiracy theory the true facts and the public's habit of underestimating the complexity of modern day politics A number of complex political plots and allegations are described in detail including the 1641 Rebellion British Intelligence manipulation of the 1919 21 Irish leaders Secret Societies and the role of Occult organisations in Ireland and around the world the allegations that Martin McGuinness is a British agent and the motivation behind large scale immigration into Ireland The author also addresses the question of value systems in modern Western societies and asks are even these being manipulated in order to assist the process of political control

Spectres of Pessimism Mark Schmitt, 2023-03-15 This book argues that philosophical pessimism can offer vital impulses for contemporary cultural studies Pessimist thought offers ways to interrogate notions of temporality progress and futurity When the horizon of future expectation is increasingly shaped by the prospect of apocalypse and extinction an exploration of pessimist thought can help to make sense of an increasingly complex and uncertain world by affirming rather than suppressing the worst This book argues that a cultural logic of the worst is at work in a substantial section of contemporary philosophical thought and cultural representations Spectres of pessimism can be found in contemporary ecocritical thought antinatalist philosophies political thought and cultural theory as well as in literature film and popular music In its unsettling of temporality this new pessimism shares sensibilities with the field of hauntology Both deconstruct linear narratives of time that adhere to a stable sequence of past present and future Mark Schmitt therefore couples pessimism and hauntology to explore the spectres of pessimism in a range of theories and narratives from ecocriticism antinatalism and queer theory to utopianism from afropessimism to the fiction of Hari Kunzru and Thomas Ligotti to the films of Camille Griffin Gaspar Noé Denis Villeneuve and Lars von Trier

Death Activism Patricia MacCormack,2025-02-06 Traditional Western attitudes towards death deal with it as a painful inevitability something that has to be navigated as a trauma and a taboo They focus essentially on the management of death an anthropocentric practice prioritising the human life above every other type of existence Patricia MacCormack explores how we can develop a death activism a variety of tactics and posthuman practices which celebrate death its inevitability its forms from the slow to times of crisis and how trauma and mourning emerge as their own forms of expression Crucial to the foundation of death activism is the dissymmetry with which different deaths are met including the mass death of nonhuman animals and ecologies Death Activism is a feminist queer postcolonialist enquiry that seeks to queer death making queer our usual familiar death habits and trajectories of thought toward a jubilant activism that can transform death into a more democratically equal and a more jubilant force for life
