Machine Guns Of World War I Live Firing Classic Military Weapons In Color Photographs:

Machine Guns of World War I Robert Bruce, 2008-11-15 All the guns examined in this new paperback edition of *Machine Guns of World War I* belong to the class known as automatic and seven classic World War I weapons are illustrated in some 250 color photographs. Detailed sequences show them in close up during step by step field stripping and during handling, loading and live firing trials with ball ammunition by gunners wearing period uniforms to put these historic guns in their visual context. These fascinating photographs are accompanied by concise illustrated accounts of each weapon's historical and technical background. The reader will learn exactly what it looked like, sounded like and felt like to crew the German, British and French machine guns which dominated the battlefields of the Western Front in 1914-18 and which changed infantry tactics forever. *U. S. Automatic Weapons of World War II - Live Firing Classic Military Weapons in Color Photographs* Robert Bruce, 1998 Following his highly praised book on German Automatic Weapons of World War II and *Machine Guns of World War I* this respected US author turns to the weapons carried by the GI of the infantry rifle platoon in World War II and Korea. *Machine Guns of World War I* Robert Bruce, 2008 *German Automatic Weapons of World War II* Robert Bruce, 1997 Exceptional color photography and an authoritative text reveal the individual characteristics of the automatic weapons used by German soldiers during World War II. The weapons are depicted being field stripped and fired by models dressed in authentic period uniforms and field equipment effectively placing each weapon in its correct historical context. Some of the weapons profiled include the Mauser Schnellfeuer machine pistol, MP40 sub machine gun, MG34 machine gun, FG42 I and II paratroop assault weapons and the StG44 assault rifle. **The World's Great Machine Guns** Roger Ford, 2005 With the aid of full color artworks, detailed cutaways, black and white and color photographs and an authoritative text, these gun books provide fascinating features of innumerable weapons. *Browning .30-caliber Machine Guns* Gordon L. Rottman, 2014-02-20 First adopted in 1917, the rugged and reliable Browning 30 caliber machine gun remained in US service into the Vietnam era and is still occasionally found in use elsewhere even today. Produced in both water cooled and air cooled versions, it has been employed in every imaginable role for a machine gun: antipersonnel, antiaircraft, mounted on aircraft as both defensive and offensive armament, aboard vehicles, armored and soft skin, mounted on watercraft and others. Employing gripping first hand testimony and featuring specially commissioned illustrations and detailed photographs, many in color, this lively study of the Browning 30 caliber machine gun reveals the origins, combat history and legacy of this versatile and dependable weapon. *Soviet Machine Guns of World War II* Chris McNab, 2022-02-17 This study looks at how the Soviet armed forces developed and deployed a range of machine guns that fitted with their offensive and defensive infantry tactics across six years of total war. In 1939, three machine guns dominated the Red Army's front line infantry firepower: the DShK 1938 heavy machine gun, the PM M1910 medium heavy machine gun and the Degtyaryov DP 27, a lighter bipod mounted support weapon. Confronted by cutting edge German technology during the Great Patriotic War 1941-

45 the Soviets responded with the development of new weaponry including the RPD light machine gun the 7 62 54mmR SG43 medium machine gun and the improved version of the DP 27 the DPM Taken together all these weapons gave the Red Army a more practical range of support weapons better able to challenge the Germans for fire superiority on the battlefield Fully illustrated this study explains the technology and the tactics of these machine guns Noted authority Chris McNab sets out how these machine guns were distributed and tactically applied and provides numerous examples of the weapons in action from assault teams on the streets of Stalingrad to tank crews struggling for survival at Kursk The book also reflects upon the weapons post war service many of the machine guns remain in front line use today Illustrated with high quality photographs and specially commissioned artwork this is a deep analysis of these essential tools of warfare within the Soviet forces

Hotchkiss Machine Guns John Walter, 2019-11-28 Created by a long forgotten Austrian nobleman Adolf Odkolek von Augezd the air cooled Hotchkiss machine gun was the first to function effectively by tapping propellant gas from the bore as the gun fired Although the Hotchkiss would be overshadowed by the water cooled Maxim and Vickers Guns it proved its effectiveness during the Russo Japanese War The gun quirky though it was was successful enough to persuade Laurence Ben t and Henri Merci to develop the Mod le Portative a man portable version which it was hoped could move with infantrymen as they advanced Later mounted on tanks and aircraft it became the first automatic weapon to obtain a kill in aerial combat Though it served the French and US armies during World War I and also the British in areas where French and British units fought alongside each other the Odkolek Hotchkiss system was to have its longest term effect in Japan Here a succession of derivatives found favour in theatres of operations in which water cooling could be more of a liability than an asset When US forces landed on Saipan Guam and Iwo Jima battling their way from island to island across the Pacific it was the Woodpecker the Type 92 Hotchkiss with its characteristically slow rate of fire which cut swathes through their ranks Supported by contemporary photographs and full colour illustrations this title explores the exciting and eventful history of the first successful gas operated machine gun

MG 34 and MG 42 Machine Guns Chris McNab, 2012-10-20 With the MG 34 the German Wehrmacht introduced an entirely new concept in automatic firepower the general purpose machine gun GPMG In itself the MG 34 was an excellent weapon an air cooled recoil operated machine gun that could deliver killing firepower at ranges of more than 1 000m Yet simply by changing its mount and feed mechanism the operator could radically transform its function On its standard bipod it was a light machine gun ideal for infantry assaults on a tripod it could serve as a sustained fire medium machine gun During World War II the MG 34 was superseded by a new GPMG the MG 42 More efficient to manufacture and more robust it had a blistering 1 200rpm rate of fire Nicknamed Hitler s buzzsaw by Allied troops it was arguably the finest all round GPMG ever produced and alongside the MG 34 it inflicted heavy casualties Featuring specially commissioned full colour artwork and drawing upon numerous technical manuals and first hand accounts this study explores the technological development varied roles and lasting influence of the revolutionary MG 34 and MG 42 machine guns and

their postwar successors **The M60 Machine Gun** Kevin Dockery, 2012-11-20 The US M60 General Purpose Machine Gun known as the Pig was developed in the years after World War II from two revolutionary German designs Adopted in 1957 the M60 came into its own in the jungles hamlets and city streets of Southeast Asia during the Vietnam War Humping the Pig became common in US military squads with at least one soldier equipped with an M60 and every squad member carrying ammunition for it The M60 design transformed infantry tactics as squads took advantage of the immediate volume of fire offered by the design Although it has now been replaced by the M240 series of weapons in US infantry and mechanized units the M60 is still in common use with the US armed forces Meanwhile its iconic status has been assured by its frequent appearance in many popular films and television shows from Full Metal Jacket to The A Team Featuring specially commissioned full color artwork this is the full story of the M60 the innovative squad base of fire weapon that has equipped the US military from the jungles of Vietnam to the deserts of Iraq

Adopting the Track of Expression: An Psychological Symphony within **Machine Guns Of World War I Live Firing Clablic Military Weapons In Color Photographs**
