Telling October Frederick Corney, 2018-08-06 All revolutionary regimes seek to legitimize themselves through foundation narratives that told and retold become constituent parts of the social fabric erasing or pushing aside alternative histories Frederick C Corney draws on a wide range of sources archives published works films to explore the potent foundation narrative of Russia's Great October Socialist Revolution He shows that even as it fought a bloody civil war with the forces that sought to displace it the Bolshevik regime set about creating a new historical genealogy of which the October Revolution was the only possible culmination This new narrative was forged through a complex process that included the sacralization of October through ritualized celebrations its institutionalization in museums and professional institutes devoted to its study and ambitious campaigns to persuade the masses that their lives were an inextricable part of this historical process By the late 1920s the Bolshevik regime had transformed its representation of what had occurred in 1917 into a new orthodoxy the October Revolution Corney investigates efforts to convey the dramatic essence of 1917 as a Bolshevik story through the increasingly elaborate anniversary celebrations of 1918 1919 and 1920 He also describes how official commissions during the 1920s sought to institutionalize this new foundation narrative as history and memory In the book's final chapter the author assesses the state of the October narrative at its tenth anniversary paying particular attention to the versions presented in the celebratory films by Eisenstein and Pudovkin A brief epilogue assesses October's fate in the years since the collapse of the Soviet Union *The October Revolution in Prospect and Retrospect* John Marot, 2012-06-08

In a series of probing analytical essays John Marot tracks the development of Bolshevism through the prism of pre 1917 intra Russian Social Democratic controversies in politics and philosophy For 1917 the author presents a critique of social historical interpretation of the Russian Revolution Turning to NEP Russia the author applies Robert Brenner's analysis of pre capitalist modes of production and concludes that neither Bukharin nor Trotsky's NEP premised programs of economic transformation and advance toward socialism were feasible At the same time he rejects the view that Stalinism was pre destined to supplant NEP Instead he hypothesises that the superior alternative to Stalinism was NEP without collectivization and the Five Year Plans a outcome that would have been possible had Bukharin and Trotsky joined forces to stop Stalin **Lenin's Electoral**

Red October Douglas Boyd,2017-08-01 The October Revolution happened in November 1917 Later Soviet propaganda pretended for several decades that it was the will of the people but in reality the brutal rebellion which killed millions and raised the numerically tiny Bolshevik Party to power was made possible by massive injections of German money laundered through a Swedish bank The so called workers and peasants revolution had a cast of millions of which the three stars were neither workers nor peasants Nor were they Russian Josef V Djughashvili Stalin was a Georgian who never did speak perfect Russian Leiba Bronstein Trotsky was a Jewish Ukrainian Vladimir I Ulyanov Lenin was a mixture of Tatar and other Asiatic bloodlines Karl Marx had thought that the Communist revolution would happen in an industrialised country like Germany Instead German cash enabled Lenin Trotsky Stalin and Co to destroy ineffective tsarist rule and declare war on the whole world This is how they did it told largely in the words of people who were there *The Black Book of Communism* Stéphane Courtois,1999 This international bestseller plumbs recently opened archives in the former Soviet bloc to reveal the accomplishments of communism around the world The book is the first attempt to catalogue and analyse the crimes of communism over 70 years *Appearances of Soviet Leaders* United States. Central Intelligence Agency,1969 *Complete Guide to the October Theory* Margot Steele,2024-10-11 The October Theory is an intriguing concept that attempts to explain how the month of October exerts a profound influence on nature culture psychology and history At first glance it might seem odd to single out a specific month for deep reflection but October holds a unique place in the calendar and the collective consciousness It stands at the intersection between the warmth of summer and the cold of winter making it a month that naturally invites contemplation and change For centuries humans have observed the seasonal transition that occurs in October marking it as a time for harvest reflection and preparation for the winter months ahead In many cultures October is a symbol of transformation both in the natural world and within the human mind The October Theory aims to explore this transitional period by looking at its historical origins cultural importance psychological impacts and its reflection in art and literature In crafting this preface the goal is to offer a window into what October represents not just as a mere month but as a catalyst for change and transformation October like a prism reflects a variety of meanings depending on how one chooses to examine it Whether it be the historical revolutions that took place in this month the seasonal shifts in nature or the psychological transformations many undergo October is full of significance The October Theory is built on a foundation of historical understanding philosophical reflection and cultural observation Each chapter in this work will dive deeper into the key aspects of the theory from its basic principles to its relevance in modern times We will explore how October has influenced people in the past and how it continues to shape our perceptions today Through this exploration we aim to give readers a comprehensive understanding of why October holds such a special place in the human experience One of the

driving ideas behind October Theory is the notion that October more than any other month challenges us to confront change. It is a month of harvest and decay of endings and beginnings of light and darkness. This duality is at the heart of October Theory and understanding it can offer us insights into broader patterns of transformation both in the external world and within ourselves. As we embark on this journey into October Theory we encourage readers to remain open to the idea that the mundane and the profound often coexist in the same space. October may seem like just another month but within it lies a world of symbolism and meaning that has the power to enrich our understanding of the world.

Dawn of the International Socialist Revolution Stefan Engel, 2016-03-03 By unleashing the international productive forces the reorganization of international production has ushered in the third emergence of international finance capital. At the beginning of its crusade around the globe international finance capital still revels in fantasies of omnipotence and dreams of eternity. Today their mood is one of general hangover; the crisis-proneness of the social system proves irreversible. But the turn of a new era already looms on the horizon; the dawning of the international socialist revolution becomes visible. And yet the old masters will not make way voluntarily even if they drag the whole of humanity with them into capitalist barbarism. The decision for the international revolution must be made by the workers and the masses themselves. To help them make this decision and together with them sweep every obstacle out of the way so that they can fulfill their historical mission that in a nutshell sums up the tasks of the Marxist Leninists in the whole world today.

Radicals, Revolutionaries, and Society R. G. Williams, 2025-04-17 This book is a study of radicals, revolutionaries and society. Specifically it tries to look at the historical social and political struggles of radicals in modern politics since the emergence of modern politics after the French Revolution of 1789. While the book is a political study the main focus is that of a socialist study as a Socialist argument for the vital political role of radicals and revolutionaries in creating modern society. The main focus of the book is on how radicals and revolutionaries usually change modern society for the better through their struggle for democracy, freedom and socialism.

Carefully edited and annotated, the documents help clarify the issues while revealing the broad range of ways in which Russians understood the events unfolding around them. Focusing on public rhetoric and debate in Russia from the outbreak of World War I in 1914 through the dissolution of the Constituent Assembly in January 1918, the documents present the views not only of key political figures but also of ordinary men and women, mothers, soldiers, factory workers, peasants, students, businesspeople and educated professionals.
