

OCULAR TOXICOLOGY

Ocular toxicology, as all other areas of toxicology, is a never ending, ever expanding branch till the scientists work and ophthalmologists prescribe. Clinicians must base their decisions on available data, past experience and human variables. Toxicity may be of minor complication like conjunctivitis medicamentosa or aplastic anemia and death.

Ocular toxicology may be discussed in following lines.

- 1) Ocular manifestations of systemic medication
- 2) Systemic manifestations following topical ocular medication
- 3) Ocular complications following topical ocular preparations.
- 4) Agents affecting specific ocular areas
