struggle in which the steady application of rational scientific principles has produced irregular but unmistakable evidence of progress toward humane treatments for the mentally ill In fact Scull contends that traditional mental hospitals for much of their existence resembled cemeteries for the still breathing medical hubris having at times served to license dangerous mutilating even life threatening experiments on the dead souls confined therein He argues that only the sociologically blind would deny that psychiatrists are deeply involved in the definition and identification of what constitutes madness in our world hence claims that mental illness is a purely naturalistic category somehow devoid of contamination by the social are taken to be patently absurd Scull points out however that the commitment to examine psychiatry and its ministrations with a critical eye by no means entails the romantic idea that the problems it deals with are purely the invention of the professional mind or the Manichean notion that all psychiatric interventions are malevolent and ill conceived It is the task of unromantic criticism that is attempted in this book
