underwater cultural heritage and the protection and promotion of artistic expressions are just some of the pressing issues addressed by this book Contemporary intersections between art cultural heritage and the market are complicated by a variety of ethical and legal issues which often describe complex global relations Should works of art be treated differently from other goods What happens if a work of art currently exhibited in a museum turns out to have originally been looted What is the relevant legal framework What should be done with ancient shipwrecks filled with objects from former colonies Should such objects be kept by the finders Should they be returned to the country of origin This book addresses these different questions while highlighting the complex interplay between legal and ethical issues in the context of cultural governance The approach is mainly legal but interdisciplinary aspects are considered as well

**Our Blue Planet** Ben Ford, Jessi J. Halligan, Alexis Catsambis, 2020 Our Blue Planet provides a comprehensive introduction to the field of maritime and underwater archaeology Situating the field within the broader study of history and archaeology this book advocates that an understanding of how our ancestors interacted with

rivers lakes and oceans is integral to comprehending the human past Our Blue Planet covers the full breadth of maritime and underwater archaeology including formerly terrestrial sites drowned by rising sea levels coastal sites and a wide variety of wreck sites ranging across the globe and spanning from antiquity to World War II Beginning with a definition of the field and several chapters dedicated to the methods of finding recording and interpreting submerged sites Our Blue Planet provides an entry point for all readers whether or not they are familiar with maritime and underwater archaeology or archaeology in general The book then shifts to a thematic approach with chapters exploring human interactions with the watery world both along the coasts and by ship These chapters discuss the relationships between culture technology and environment that allowed humans through time to spread across the globe Because ships were the primary means for humans to interact with large bodies of water they are the focus of several chapters on the development of shipbuilding technology the lives of sailors and the uses of ships in exploration expansion and warfare The book ends with chapters on how and why the non renewable submerged archaeological record should be managed so that both current and future generations can learn from the achievements and failures of past societies as well as on how anyone can become involved in maritime and underwater archaeology Throughout the reader benefits from the personal reflections of a number of leading figures in the field

Sibley, 2021-01-14 Of all the third party movements in American history none have been as controversial as the Communist Party of the United States of America Although denounced as a tool of the Soviet Union accused of espionage and charged with advocating the revolutionary overthrow of the American government before WWII it had been an accepted part of the political landscape This collection offers an intriguing insight into this controversial political party in light of the Moscow archives that were made accessible after the end of the Cold War This collection of original essays explores new aspects in the history of American Communism drawing on a range of documents from Moscow and Eastern Europe Examining traditional subjects in the light of new evidence the essays cover a range of topics including party leaders espionage campaigns against racism the Spanish Civil War communism and gender the fate of members after the McCarthy era and ways in which Communists became Anti Communists *Spain's Long Shadow* María DeGuzmán, Reveals the dependence of American ethnic identity on Spain and Spanish imperialism **The Settlement of International Cultural Heritage**

**Disputes** Alessandro Chechi, 2014 The past forty years have seen a wide proliferation of an extensive range of disputes under international law concerning cultural heritage These disputes can concern a disparate variety of issues A substantial number of have concerned the restitution of stolen and illegally exported art objects Another set of controversies has involved the protection of immovable cultural heritage Unlike other fields of international law international cultural heritage law does not have an ad hoc mechanism of dispute settlement As a result controversies are to be settled through negotiation or if this fails through existing dispute resolution means which include arbitration and litigation before domestic courts or international

tribunals This ad hoc fashion of dealing with disputes is not without consequences The most serious problem is that the same or similar cases may be settled in different ways thereby bringing about an incoherent and fragmentary enforcement of the law This book offers a comprehensive and innovative analysis of the settlement of cultural heritage disputes It addresses the means the potential fragmentation can be resolved by providing a two fold analysis First it provides a detailed analysis of the existing legal framework and the available means of judicial and non judicial dispute settlement Second it explores the feasibility of two solutions for overcoming the lack of a specialized forum The first potential solution is the establishment of a new international court The second concerns existing judicial and extra judicial fora and means of increasing interaction between them by the practice of cross fertilization The book focuses on the substance of such interaction and identifies a number of culturally sensitive parameters which need to apply the common rules of adjudication Ultimately the book argues that existing judicial and non judicial fora should adopt a cross fertilizing perspective to use and disseminate jurisprudence containing these common rules of adjudication to enhance the effectiveness and coherence of their decision making processes Finally it sets out how such an approach would be conducive to the development of a wider body of international cultural heritage law
