

The background of the entire image is a classical painting of an angel. The angel is depicted from the waist up, standing on a checkered floor. He has large, white, feathered wings and is wearing a dark, flowing robe. He holds a sword in his right hand, which is extended downwards. The lighting is dramatic, with strong highlights on the angel's face, wings, and the floor.

**Stations in the Field** Raf De Bont, 2015-03-26 When we think of sites of animal research that symbolize modernity the first places that come to mind are grand research institutes in cities and near universities that house the latest in equipment and technologies not the surroundings of the bird's nest the octopus's garden in the sea or the parts of inland lakes in which freshwater plankton reside Yet during the late nineteenth and early twentieth centuries a group of zoologists began establishing novel indeed modern ways of studying nature propagating what present day ecologists describe as place based research Raf De Bont's *Stations in the Field* focuses on the early history of biological field stations and the role these played in the rise of zoological place based research Beginning in the 1870s a growing number of biological field stations were founded first in Europe and later elsewhere around the world and thousands of zoologists received their training and performed their research at these sites Through case studies De Bont examines the material and social context in which field stations arose the actual research that was produced in these places the scientific claims that were developed there and the rhetorical strategies that were deployed to convince others that these claims made sense From the life of parasitic invertebrates in northern France and freshwater plankton in Schleswig Holstein to migratory birds in East Prussia and pest insects in Belgium De Bont's book is a fascinating tour through the history of studying nature in nature *Traces on the Rhodian Shore* Clarence J. Glacken, 1976-08-24 In the history of Western thought men have persistently asked three questions concerning the habitable earth and their relationships to it Is the earth which is obviously a fit environment for man and other organic life a purposefully made creation Have its climates its relief the configuration of its continents influenced the moral and social nature of individuals and have they had an influence in molding the character and nature of human culture In his long tenure of the earth in what manner has man changed it from its hypothetical pristine condition From the time of the Greeks to our own answers to these questions have been and are being given so frequently and so continually that we may restate them in the form of general ideas the idea of a designed earth the idea of environmental influence and the idea of man as a geographic agent These ideas have come from the general thought and experience of men but the first owes much to mythology theology and philosophy the second to pharmaceutical lore medicine and weather observation the third to the plans activities and skills of everyday life such as cultivation carpentry and weaving The first two ideas were expressed frequently in antiquity the third less so although it was implicit in many discussions which recognized the obvious fact that men through their arts sciences and techniques had changed the physical environment about them This magnum opus of Clarence Glacken explores all of these questions from Ancient Times to the End of the Eighteenth Century

and responsible At the same time however they recognize that such internal forms of self propriety must be judged within the wider context of social and political life Kelly shows how the intellectual and practical demands of such a synthesis require these great writers to consider freedom as part of a broader set of arguments about the nature of personhood the potentially irrational impact of the passions and the obstinate problems of individual and political judgement By exploring these relationships The Propriety of Liberty not only revises the intellectual history of modern political thought but also sheds light on contemporary debates about freedom and agency

*French Pulpit Oratory, 1598-1650* Peter Bayley, 2011-08-11 This 1980 text was the first full length study of seventeenth century pulpit oratory since 1863 and the first to treat both Catholic and Protestant preaching The first part opens with a general discussion on the sermon as a literary form followed by a survey of ideas on preaching and the practical arts of preaching circulating in late Renaissance Europe Of the central chapters on the sermons themselves two are concerned with the style and complex formal structures of the sermons while two examine in turn the major themes of illusion and nature and the imagery associated with them The second part is a descriptive catalogue of extant sermons and some funeral orations of the period which provided a great deal of information never previously collected The book made a significant contribution both to the study of a neglected period of French literature the Baroque and to comparative studies of the sermon

*A History of Ancient Egypt, Volume 3* John Romer, 2023-05-25 The final chapter in the definitive three volume history of the world's first known state Archaeologist John Romer has spent a lifetime chronicling the history of Ancient Egypt and here he tells the epic story of an era dominated by titans of the popular imagination the radical iconoclast Akhenaten the boy king Tutankhamun and the all conquering Ramesses II But heroes do not forge history by themselves This was also a time of international trade cultural exchange and sophisticated art even in the face of violent change Alongside his visionary new history of this the most famous period in the long history of Ancient Egypt Romer turns a critical eye on Egyptology itself Paying close attention to the evidence he corrects prevailing narratives which cast the New Kingdom as an imperial state power in the European mould Instead he reveals through broken artefacts in ruined workshops or preserved letters between a tomb builder and his son a culture more beautiful and beguiling than we could have imagined Romer carefully reconstructs the real story of the New Kingdom as evidenced in the archaeological record and the result the final volume of a life long project secures his status as Ancient Egypt's finest chronicler

**From Paris to Pompeii** Göran Blix, 2009-01-12 In the early nineteenth century as amateur archaeologists excavated Pompeii Egypt Assyria and the first prehistoric sites a myth arose of archaeology as a magical science capable of unearthing and reconstructing worlds thought

to be irretrievably lost This timely myth provided an urgent antidote to the French anxiety of amnesia that undermined faith in progress and it armed writers from Chateaubriand and Hugo to Michelet and Renan with the intellectual tools needed to affirm the indestructible character of the past From Paris to Pompeii reveals how the nascent science of archaeology lay at the core of the romantic experience of history and shaped the way historians novelists artists and the public at large sought to cope with the relentless change that relegated every new present to history In postrevolutionary France the widespread desire to claim that no being city culture or language was ever definitively erased ran much deeper than mere nostalgic and reactionary impulses G ran Blix contends that this desire was the cornerstone of the substitution of a weak secular form of immortality for the lost certainties of the Christian afterlife Taking the iconic city of Pompeii as its central example and ranging widely across French romantic culture this book examines the formation of a modern archaeological gaze and analyzes its historical ontology rhetoric of retrieval and secular theology of memory before turning to its broader political implications

**Montesquieu: The Spirit of the Laws** Charles d Montesquieu, 1989 Beyond the Persecuting Society John Christian Laursen, Cary J. Nederman, 2011-07-18 There is a myth easily shattered that Western societies since the Enlightenment have been dedicated to the ideal of protecting the differences between individuals and groups and another too readily accepted that before the rise of secularism in the modern period intolerance and persecution held sway throughout Europe In Beyond the Persecuting Society John Christian Laursen Cary J Nederman and nine other scholars dismantle this second generalization If intolerance and religious persecution have been at the root of some of the greatest suffering in human history it is nevertheless the case that toleration was practiced and theorized in medieval and early modern Europe on a scale few have realized Christians and Jews the English French Germans Dutch Swiss Italians and Spanish had their proponents of and experiments with tolerance well before John Locke penned his famous Letter Concerning Toleration Moving from Abelard to Aphra Behn from the apology for the gentiles of the fourteenth century Talmudic scholar Menahem ben Solomon Ha Meliri to the rejection of intolerance in the New Israel of the Massachusetts Bay Colony Beyond the Persecuting Society offers a detailed and decisive correction to a vision of the past as any less complex in its embrace and abhorrence of diversity than the present

**How the Idea of Religious Toleration Came to the West** Perez Zagorin, 2013-12-03 Religious intolerance so terrible and deadly in its recent manifestations is nothing new In fact until after the eighteenth century Christianity was perhaps the most intolerant of all the great world religions How Christian Europe and the West went from this extreme to their present universal belief in religious toleration is the momentous story fully told for the first time in this timely and important book by a leading historian of early modern Europe Perez Zagorin takes readers to a time when both the Catholic Church and the main new Protestant denominations embraced a policy of endorsing religious persecution coercing unity and with the state's help mercilessly crushing dissent and heresy This position had its roots in certain intellectual and religious traditions which Zagorin traces before showing how out of the same traditions came the beginnings of pluralism in the West Here we see how sixteenth and seventeenth century thinkers writing from religious theological and philosophical perspectives contributed far more than did political expediency or the growth of religious skepticism to advance the cause of toleration Reading these thinkers from Erasmus and Sir Thomas More to John Milton and John Locke among others Zagorin brings to light a common if unexpected thread concern for the spiritual welfare of religion itself weighed more in the defense of toleration than did any secular or pragmatic arguments His book which ranges from England through the Netherlands the post 1685 Huguenot Diaspora and the American Colonies also exposes a close connection between toleration and religious freedom A far reaching and incisive discussion of the major writers thinkers and controversies responsible for the emergence of religious tolerance in Western society from the Enlightenment through the United Nations Universal Declaration of Human Rights this original and richly nuanced work constitutes an essential chapter in the intellectual history of the modern world

*The Skeptical Sublime* James Noggle, 2001 This title examines the role of scepticism in initiating the idea of the sublime in early modern British literature James Noggle draws on philosophy intellectual history and critical theory to illuminate the aesthetic ideology of Pope Swift Dryden and Rochester among other important writers of the period The Skeptical Sublime compares the view of sublimity presented by these authors with that of the dominant liberal tradition of 18th century criticism to offer a new understanding of how these writers helped construct proto aesthetic categories that stabilized British culture after years of civil war and revolution while at the same time their scepticism allowed them to express ambivalence about the emerging social order

**Painting the Sacred in the Age of Romanticism** Cordula Grewe, 2017-07-05 After a century of Rationalist scepticism and political upheaval the nineteenth century awakened to a fierce battle between the forces of secularization and the crusaders of a

Christian revival From this battlefield arose an art movement that would become the torchbearer of a new religious art Nazarenism From its inception in the Lukasbund of 1809 this art was controversial It nonetheless succeeded in becoming a lingua franca in religious circles throughout Europe America and the world at large This is the first major study of the evolution structure and conceptual complexity of this archetypically nineteenth century language of belief The Nazarene quest for a modern religious idiom evolved around a return to pre modern forms of biblical exegesis and the adaptation of traditional systems of iconography Reflecting the era s historicist sensibility as much as the general revival of orthodoxy in the various Christian denominations the Nazarenes responded with great acumen to pressing contemporary concerns Consequently the artists did not simply revive Christian iconography but rather reconceptualized what it could do and say This creativity and flexibility enabled them to intervene forcefully in key debates of post revolutionary European society the function of eroticism in a Christian life the role of women and the social question devotional practice and the nature of the Church childhood education and bible study and the burning issue of anti Judaism and modern anti Semitism What makes Nazarene art essentially Romantic is the meditation on the conditions of art making inscribed into their appropriation and reinvention of artistic tradition Far from being a reactionary move this self reflexivity expresses the modernity of Nazarene art This study explores Nazarenism in a series of detailed excavations of central works in the Nazarene corpus produced between 1808 and the 1860s The result is a book about the possibility of religious meanin
