Prose Poems of the French

Enlightenment Fabienne Moore, 2017-11-30 By examining nearly sixty works the author traces the prehistory of the French prose poem demonstrating that the disquiet of some eighteenth century writers with the Enlightenment gave rise to the genre nearly a century before it is habitually supposed to have existed In the throes of momentous scientific philosophical and socioeconomic changes Enlightenment authors turned to the past to revive sources such as Homer the pastoral Ossian the Bible and primitive eloquence favoring music to construct alternatives to the world of reason The result the author argues were prose poems including F l on s Les Aventures de T maque Montesquieu s Le Temple de Gnide Rousseau s Le L te d Ephra m Chateaubriand s Atala as well as many lesser known texts most of which remain out of print The author's treatment of Bible criticism and eighteenth century religious reform movements reveal the often neglected spiritual side of Enlightenment culture and tracks its contribution to the period's reflection about language and poetic invention The author includes in appendices four unusual texts adjudicating the merits of prose poems making evidence of their controversial nature now accessible to readers
