VB: From early on, parallel to practicing, you were very active in writing about architecture. You even founded a magazine *Arquitextura-Bis*. What was it that you wanted to address in your writings?

RM: For me to be critical helps to find the way to explain what you do as an architect. And extending this approach, I like to establish a dialogue with my colleagues' work. I always wrote essays on buildings by many architects. This is the way for me to understand architects' works and intentions. I like to explain projects by discovering ideas and identifying problems. Architecture is important as a part of history, but also as a critical discipline. I wrote a book *Theoretical*

**Women, Space and Utopia 1600-1800** Nicole Pohl, 2017-05-15 The first full length study of women's utopian spatial imagination in the seventeenth and eighteenth centuries this book explores the sophisticated correlation between identity and social space The investigation is mainly driven by conceptual questions and thus seeks to link theoretical debates about space gender and utopianism to historiographic debates about the gendered social production of space As Pohl's primary aim is to demonstrate how women writers explore the complex gender politics of space specific attention is given to spaces that feature widely in contemporary utopian imagination Arcadia the palace the convent the harem and the country house The early modern writers Lady Mary Wroth and Margaret Cavendish seek to recreate Paradise in their versions of Eden and Jerusalem the one yearns for Arcadia the other for Solomon's Temple Margaret Cavendish and Mary Astell redefine the convent as an emancipatory space dismissing its symbolic meaning as a confining and surveilled architecture The utopia of the country house in the work of Delarivier Manley Sarah Scott and Mary Hamilton will reveal how women writers resignify the traditional metonym of the country estate The study will finish with an investigation of Oriental tales and travel writing by Ellis Cornelia Knight Lady Mary Montagu Elizabeth Craven and Lady Hester Stanhope who unveil the seraglio as a location for a Western specifically masculine discourse on Orientalism despotism and female sexuality and offers their own utopian judgment

*The Secret History of Domesticity* Michael McKeon, 2006-12-06 Taking English culture as its representative sample *The Secret History of Domesticity* asks how the modern notion of the public private relation emerged in the seventeenth and eighteenth centuries Treating that relation as a crucial instance of the modern division of knowledge Michael McKeon narrates its pre history along with that of its essential component domesticity This narrative draws upon the entire spectrum of English people's experience At the most public extreme are political developments like the formation of civil society over against the state the rise of contractual thinking and the devolution of absolutism from monarch to individual Subject The middle range of experience takes in the influence of Protestant and scientific thought the printed publication of the private the conceptualization of virtual publics society public opinion the market and the capitalization of production the decline of the domestic economy and the increase in the sexual division of labor The most private pole of experience involves the privatization of marriage the family and the household and the complex entanglement of femininity interiority Subjectivity and sexuality McKeon accounts for how the relationship between public and private experience first became intelligible as a variable interaction of distinct modes of being not a static dichotomy but a tool to think with Richly

illustrated with nearly 100 images including paintings engravings woodcuts and a representative selection of architectural floor plans for domestic interiors this volume reads graphic forms to emphasize how susceptible the public private relation was to concrete and spatial representation McKeon is similarly attentive to how literary forms evoked a tangible sense of public private relations among them figurative imagery allegorical narration parody the author character reader dialectic aesthetic distance and free indirect discourse He also finds a structural analogue for the emergence of the modern public private relation in the conjunction of what contemporaries called the secret history and the domestic novel A capacious and synthetic historical investigation The Secret History of Domesticity exemplifies how the methods of literary interpretation and historical analysis can inform and enrich one another

*English Houses 1300-1800* Matthew H. Johnson, 2014-06-11 Houses are more than a shelter from the elements they also offer an unparalleled insight into the beliefs ideas and experiences of the people who built and lived in them In this engaging book Matthew Johnson looks at the traditional houses that still exist throughout the English countryside and examines the lives of the ordinary people who once occupied them His wide ranging narrative takes in the medieval hall and the community it framed the rebuilding and

improvement of houses in the sixteenth and seventeenth centuries and the rise of the Georgian Order in both architecture and eighteenth century culture This passionate book is animated by the conviction that old houses are much more than just pretty tableaux of an idyllic unchanging rural England Vernacular houses are compared to their larger polite counterparts and English houses are placed in the wider context of the British Isles and the Atlantic world beyond The result is a dynamic compelling account of the development of houses in the English countryside and through this a portrait of changing patterns of social life from medieval to modern times Richly illustrated throughout with photographs and drawings this book will be of interest to anyone who wants to understand the significance of our built heritage and the historic landscape

Transparency Daniel Jutte,2023-03-28 A wide ranging illustrated history of transparency as told through the evolution of the glass window Transparency is a mantra of our day It is key to the Western understanding of a liberal society We expect transparency from for instance political institutions corporations and the media But how did it become such a powerful and global idea From ancient glass to Apple s corporate headquarters this book is the first to probe how Western people have experienced conceptualized and evaluated transparency Daniel Jtte argues that the experience of transparency has been inextricably linked to one element of Western architecture the glass window Windows are meant to be unnoticed Yet a historical perspective reveals the role that glass has played in shaping how we see and interpret the world A seemingly pure material glass has been endowed throughout history with political social and cultural meaning in manifold and sometimes conflicting ways At the same time Jtte raises questions about the future of vitreous transparency its costs in terms of visual privacy but also its ecological price tag in an age of accelerating climate change

**The Great Rebuildings Of Tudor And Stuart England** Colin Platt,2013-10-18 Rural England s Great Rebuilding of 1570 1640 first identified by W G Hoskins in 1953 has been vigorously debated ever since Some critics have re dated it on a regional basis Still more have seen Great Rebuildings around every corner causing them to dismiss Hoskins s thesis In this first full length study of the rebuilding phenomenon Colin Platt an accomplished architectural and social historian addresses these issues and presents a persuasive fresh assessment of the legacy of this revolution in housing design Although accepting Hoskins s definition of a first Great Rebuilding starting with the 1570s and ending in the devastations of the Civil War the author argues convincingly for a more influential second Great Rebuilding after peace had returned In examining architectural change both in the buildings themselves and through the writings of discerning contemporaries today s family house whether in town or country is shown to owe almost nothing to the Middle Ages Instead its origins lie in the increasingly sophisticated world of the Tudor and Jacobean courts in the refined taste of returned travellers and in a growing popular demand for personal privacy unobtainable in houses of medieval plan This fascinating and challenging study of changing tastes marks an important contribution to our understanding of Tudor and Stuart society and as such will not only be welcomed by students and historians of early modern England but by the interested general reader

**John Evelyn** Gillian Darley,2006-01-01 This new

biography is the first to make full use of Evelyn's huge unpublished archive deposited at the British Library in 1995. This crucial source evokes a broader and richer picture of Evelyn, his life and his friendships than permitted by his own celebrated diaries. Dust jacket

**St Paul's Cathedral** John Schofield, 2016-09-30 This is the first volume concerned solely with the archaeology of a major late 17th century building in London and the major changes it has undergone. St Paul's Cathedral in the City of London was built in 1675-1711 to the designs of Sir Christopher Wren and has been described as an iconic building many times. In this major new account John Schofield examines the cathedral from an archaeological perspective, reviewing its history from the early 18th to the early 21st century as illustrated by recent archaeological recording, documentary research and engineering assessment. A detailed account of the construction of the cathedral is provided based on a comparison of the fabric with voluminous building accounts which have survived and evidence from recent archaeological investigation. The construction of the Wren building and its embellishments are followed by the main works of later surveyors such as Robert Mylne and Francis Penrose. The 20th century brought further changes and conservation projects including restoration after the building was hit by two bombs in World War II and all its windows blown out. The 1990s and first years of the present century have witnessed considerable refurbishment and cleaning involving archaeological and engineering works. Archaeological specialist reports and an engineering review of the stability and character of the building are provided.

**The History of Gauged Brickwork** Gerard Lynch, 2010-05-14 This book takes a look at the history and use of cut, rubbed and gauged brickwork, the use of tools and equipment and the differences between historic and contemporary bricks with a view to inform conservation and restoration decisions. The book uses case studies from England, Ireland and the US to illustrate the use of different materials and techniques on buildings ranging in age. Written by Dr Gerard Lynch, the leading authority in this subject area, this book will be of particular interest to architectural historians, architects working on historic buildings and building conservators.

**Ichnographia Rustica** William Alvis Brogden, 2017-02-17 One of the most significant occurrences in the history of design was the creation of the English Landscape Garden. Accounts of its genesis, the surprising structural change from the formal to a seeming informal, are numerous. But none has ever been quite convincing and none satisfactorily placed the contributions of Stephen Switzer. Unlike his contemporaries, Switzer, an 18th century author of books on gardening and agricultural improvement, grasped a quite new principle: that the fashionable pursuit of great gardens should be rural and extensive rather than merely the ornamentation of a particular part of an estate. Switzer saw that a whole estate could be enjoyed as an aesthetic experience and by the process of improving its value could increase wealth. By encouraging improvers to see the garden in his enlarged sense, he opened up the adjoining countryside, the landscape, and made the whole a subject of unified design. Some few followed his advice immediately, such as Bathurst at Cirencester. But it took some time for his ideas to become generally accepted. Could this vision and its working out in practice between 1710 and 1740 be the very reason for such changes? 300

years after the first volume of his writings began to be published this book offers a timely critical examination of lessons learned and Switzer's roles. In major influential early works at Castle Howard and Blenheim and later the more minor works such as Spy Park, Leeswood or Rhual, the relationships between these designs and his writings is demonstrated. In doing so it makes possible a major reassessment of the developments and thus our attitudes to well-known works. It provides an explanation of how he and his colleagues and contemporaries first made what he had called *Ichnographia Rustica* or more familiarly Modern Gardening from the mid 1740s and later landscape gardens. It reveals an exceptional innovator who by transforming the philosophical way in which nature was viewed integrated good design with good farming and horticultural practice for the first time. It raises the issue of the cleavage in thought of the later 18th century essentially whether the *ferme ornée* as the mixture of *utile* and *dulci* was the perfect designed landscape or whether this was the enlarged garden with features of unadorned nature. The book discusses these considerable and continuing contrary influences on later work and suggests Switzer has many lessons for how contemporary landscape and garden design ought to be perceived and practised.

**The History of Gauged Brickwork** Gerard C. J. Lynch, 2007. This book takes a look at the history and use of cut rubbed and gauged brickwork, the use of tools and equipment and the differences between historic and contemporary bricks with a view to inform conservation and restoration decisions. The book uses case studies from England, Ireland and the US to illustrate the use of different materials and techniques on buildings ranging in age. Written by Dr Gerard Lynch, the leading authority in this subject area, this book will be of particular interest to architectural historians, architects working on historic buildings and building conservators.

**The Stuart Court in Exile and the Jacobites** Eveline Cruickshanks, Edward T. Corp, 1995-01-01. Based on original research in a wide range of contemporary sources, this collection of original essays illuminates the early development of Jacobitism, placing the movement in a coherent historical context. The volume includes a substantial introduction by Edward Corp on the Stuart court and a major essay by Eveline Cruickshanks on the importance of Jacobitism in Britain and its links with the exiled court.

*Built from Below: British Architecture and the Vernacular* Peter Guillery, 2010-09-13. This book extends the concept of British vernacular architecture beyond its traditional base of pre-modern domestic and industrial architecture to embrace other buildings such as places of worship, villas, hospitals, suburban semis and post-war mass housing. Engaging with wider issues of social and cultural history, this book is of use to anyone with an interest in architectural history. Presented in an essentially chronological sequence from the medieval to the post-war, diverse fresh viewpoints in the chapters of this book reinforce understanding of how building design emerges not just from individual agency that is architects but also from the collective traditions of society.

**English Architecture Public & Private** John F. Bold, 1993-07-01. This book brings together twenty-four original essays by colleagues, pupils and friends of Kerry Downes. The essays range from the late middle ages to the twentieth century but are concentrated on the period to the study of which Kerry Downes has contributed so much, that of Wren, Vanbrugh and Hawksmoor. Taken together, these essays

display the different approaches taken by architectural historians and the rich variety of English architecture      **Sir William Chambers** John Harris, 1996-02-25 Published on the occasion of the exhibition Courtauld Gallery London 10 October 1996 5 January 1997 Natiobalmuseum Stockholm 20 February 20 April 1997      **The Birth of the English Kitchen, 1600-1850** Sara Pennell, 2016-06-30 Tracing the emergence of the domestic kitchen from the 17th to the middle of the 19th century Sara Pennell explores how the English kitchen became a space of specialised activity sociability and strife Drawing upon texts images surviving structures and objects The Birth of the English Kitchen 1600 1850 opens up the early modern English kitchen as an important historical site in the construction of domestic relations between husband and wife masters mistresses and servants and householders and outsiders and as a crucial resource in contemporary heritage landscapes
