**Chinese Politics in the Xi Jinping Era** Cheng Li, 2016-10-18 Chinese politics are at a crossroads as President Xi Jinping amasses personal power and tests the constraints of collective leadership In the years since he became general secretary of the Chinese Communist Party in 2012 Xi Jinping has surprised many people in China and around the world with his bold anti corruption campaign and his aggressive consolidation of power Given these new developments we must rethink how we analyze Chinese politics an urgent task as China now has more influence on the global economy and regional security than at any other time in modern history Chinese Politics in the Xi Jinping Era examines how the structure and dynamics of party leadership have evolved since the late 1990s and argues that inner party democracy the concept of collective leadership that emphasizes deal making based on accepted rules and norms may pave the way for greater transformation within China's political system Xi's legacy will largely depend on whether he encourages or obstructs this trend of political institutionalization in the governance of the world's

most populous and increasingly pluralistic country Cheng Li also addresses the recruitment and composition of the political elite a central concern in Chinese politics China analysts will benefit from the meticulously detailed biographical information of the 376 members of the 18th Central Committee including tables and charts detailing their family background education occupation career patterns and mentor patron ties *Young People Re-Generating Politics in Times of Crises* Sarah Pickard, Judith Bessant, 2017-07-31 This book provides insight into the diverse ways young people from around the world are regenerating politics in innovative and multifaceted ways The authors who include academics and activists challenge claims that young people are apolitical apathetic and living up to the me generation stereotype Contributions cover a rich body of case examples of traditional and new forms of youth politics in response to situated injustices and political and socio economic crises Significant and optimistic the collection presents strong evidence from across the globe that these developments are not isolated incidences but are in fact part of a systemic large scale transformation leading to a regeneration of the political landscape by young people The book is aimed at students and scholars in the fields of politics sociology policy studies and youth and childhood studies *Congressional Record* United States.
