Of Separateness Merging:

Dreams of Love and Fateful Encounters Ethel S. Person, 2007-04-02 This groundbreaking study has been widely hailed for its focus on a human emotion generally considered impervious to rational analysis romantic passionate love Ethel Person views romantic love as a powerful agent of change arguing that it is as central to human culture as it is to human existence This new edition of Dreams of Love and Fateful Encounters emphasizes the relevance of passion not only to lovers but also to mental health professionals whose patients often enter treatment because of love related issues from the inability to love or make a commitment to the perils of extramarital love to love sickness or loss of love She forthrightly addresses not only the power of love to unlock the soul but also its inherent paradoxes and conflicts Employing a philosophical perspective in order to understand the existential dilemmas posed by love and a cultural perspective in order to understand its cultural variability Dr Person breaks with contemporary intellectual and philosophical dismissive assumptions about romantic love She acknowledges love s vital importance and power proposing that passion serves an important function not only for the individual but also for the culture while charging psychoanalysis with a reductionist emphasis on sexuality and psychopathology that has narrowed the focus of inquiry into love Among the issues she discusses are romantic love s sources in our early lives its relationship to imagination and creativity and its capacity to enable the lover to transcend the self how romantic love often demands a reordering of values and promotes personal growth by exposing the self to new risks and possibilities the transformational potential of transference love in the therapy process flaws in the common misperception that women are more influenced by romantic love than men considerations of homosexual love love across generations and love triangles focusing on the individual growth that can result from such relationships Citing accounts of love drawn from literature film and real life Person focuses on the lover's internal soliloguy and external dialogue with the beloved that can develop over an individual s life An uplifting resource for people experiencing failing or unorthodox romances Dreams of Love and Fateful Encounters boldly takes on issues pertinent to lovers to professionals who encounter patients for whom key conflicts revolve around romantic love and to anyone who has struggled to understand the importance of romantic love in his or her own life Mergers Policy Session United States. Federal Trade Commission. Office of Policy Planning and Evaluation, 1979 **The Sexual Century** Ethel Spector Person, 1999-01-01 Over the course of the past century sexual liberation has transformed the way in which most of us regard our bodies and live our sexual lives Now a preeminent psychoanalytic theoretician on sex and gender discusses what has gone into this unquiet revolution the roles played by sexologists and psychoanalysts antibiotics and birth control the liberation movements and Freud's insight that sex has as much to do with the mind as with the genitals In this collection of new and previously published papers Ethel Person writes of the centrality of sexuality to our identity She describes the role of fantasy in desire its different expression in the sexes and the way in which desire is inevitably intertwined with power Her classic papers on transvestism transsexualism and cross

dressing homosexuals written with Lionel Ovesey help us to understand how gender and sex develop in all of us The public acceptance of the transsexual says Person is emblematic of the profound scientific and intellectual shifts that have taken place in the past hundred years The way that sex and gender develop and are experienced and expressed is the resultnot only of nature and nurture but also of the cultural zeitgeist its unspoken values and biases

Modell, 1990 Nearly a century has passed since Freud's theories unleashed a revolution in our understanding of the human psyche Yet as Arnold Modell firmly points out we still do not possess a theory that explains how psychoanalysis works Other Times Other Realities provides brilliant insight into this perplexing problem and lays the foundation for a comprehensive theory of psychoanalytic treatment Modell's careful consideration of Freudian theory the interpretations of contemporary ego psychology and the contribution of object theory discloses the changing significance of the fundamental elements of the therapeutic process In Other Times Other Realities readers will discover an illuminating synthesis of concepts underlying the Safe People Henry Cloud, John Townsend, 2009-05-26 Safe People various interpretations of the psychoanalytic process will help you discover why good people can get tangled in bad relationships how to avoid repeating your own mistakes and how to pick safe healthy people for the friends you make and the company you keep Too many of us have invested in relationships that have gone wrong Maybe you ve been judged manipulated or controlled Or maybe you ve trusted the wrong people in the past It's easy to make the same mistakes of judgment over and over or worse to give up on trying to have great authentic relationships again But it doesn t have to be that way In Safe People Drs Henry Cloud and John Townsend teach you that being with an unsafe person can be damaging to your confidence your trust in others and even your health You ll

Congress. House. Committee on Energy and Commerce. Subcommittee on Oversight and Investigations, 1994 Reading Beyond the Code Terence Cave, Deirdre Wilson, 2018-04-28 This book explores the value for literary studies of the model of communication known as relevance theory Drawing on a wide range of examples lyric poems by Yeats Herrick Heaney Dickinson and Mary Oliver novels by Cervantes Flaubert Mark Twain and Edith Wharton nine of the ten essays are written by literary specialists and use relevance theory both as a broad framing perspective and as a resource for detailed analysis The final essay by Deirdre Wilson co founder with Dan Sperber of relevance theory takes a retrospective view of the issues addressed by the volume and considers the implications of literary studies for cognitive approaches to communication Relevance theory described by Alastair Fowler as nothing less than the makings of a radically new theory of communication the first since Aristotle's offers a comprehensive pragmatics of language and communication grounded in evidence about the ways humans think and behave While designed to capture the everyday murmur of conversation gossip peace making hate speech love speech body language and the chatter of the internet it covers the whole spectrum of human modes of communication including literature in the broadest sense as a characteristically human activity Reading Beyond the Code is unique in using relevance theory as a prime resource for literary study and it is also the first to claim that the model works best for literature when understood in the light of a broader cognitive approach focusing on a range of phenomena that support an embodied conception of cognition and language This broadened perspective serves to enhance the value for literary studies of the central claim of relevance theory that the code model is fundamentally inadequate to account for human communication and in particular for the modes of communication that are proper to literature A Body of Vision R. Bruce Elder, 2006-01-01 Elder examines how artists such as Brakhage Artaud Schneemann Cohen and others have tried to recognize and to convey primordial forms of experiences He argues that the attempt to convey these primordial modes of awareness demands a different conception of

artistic meaning from any of those that currently dominate contemporary critical discussion By reworking theories and speech in highly original ways Elder formulates this new conception His remarks on the gaps in contemporary critical practices will likely become the focus of much debate **Geographies of Exclusion** David Sibley, 2002-09-26 Analyses the construction of socio spatial boundaries seen in gedner colour sexuality age lifestyle and disability arguing that powerful groups tend to dominate space to create fear of minorities in the home community and state The key to the Mystery of Buddha lies in the clear apperception of the constitution of man Helena Petrovna Blavatsky, 2020-08-30 The key to the Mystery of Buddha and that of other Adepts lies in the correct understanding of the reflections in man of the Seven Principles or Powers in Nature physically and of the Seven Hierarchies of Being intellectually and spiritually The Seven Principles are the manifestation of One Indivisible Spirit but only at the end of the Manvantara when the seven merge once again into Absolute Unity uncreated and impartite The purified Egotistical Principle the astral and personal ego of an Adept though merging with its Highest Ego Atma Buddhi may for purposes of universal mercy and benevolence separate itself from its divine Monad as to lead on this plane of illusion and temporary being a distinct independent conscious life of its own under a borrowed illusive shape thus serving at one and the same time a double purpose the exhaustion of its own individual Karma and the saving of millions of human beings less favoured than itself from the effects of mental blindness Disembodied consciousness is not an effect but a cause Such consciousness is a ray of the all pervading limitless Flame the reflections of which alone can differentiate And as such consciousness is ubiquitous it can be neither localized nor centred on any particular subject Its effects alone are felt in the region of matter but consciousness in itself remains the highest quality of the sentient spiritual principle within the Divine Soul and does not belong to the plane of materiality After the death of the physical man if he be an Initiate his human consciousness is transformed into the independent Principle itself and therefore the former personal ego becomes pure and impersonal consciousness untainted by any ego The Bodhisattva becomes a Buddha Enlightened and a Nirvani through personal effort and merit after having had to undergo all the hardships of every other neophyte not by virtue of a divine birth as thought by some It was only the reaching of Nirvana while still living in the body on this earth that was due to his having been in previous births high on the Path of Inner Wisdom Once a man delivers himself from the snare of separateness merging his self in the Universal Self spiritual powers hitherto dormant in him are awakened mysteries in invisible Nature are unveiled to him and he becomes a Dhyani Buddha divine Flame and free Will in man Then as a Dhyani Buddha himself he can create mind born Bodhisattvas Twenty years after His outward death Tathagata in His immense love and mercy for erring and ignorant humanity refused Parinirvana in order that He might continue to help men on earth Vajrasattva is the regent or chief of the Dhyani Chohans or Dhyani Buddhas the Supreme Buddha personal yet never manifesting objectively He is the One without Beginning or End in short the Logos of Buddhism Vajrasattva is also Vajradhara or Dorjechang The two are one and over them is the Supreme Unmanifested and Universal

Wisdom that has no name As two in one They are the Power that subdues and conguers evil from the beginning allowing it to reign only over willing subjects on earth and having no power over those who despise and hate it This dual personage has the same role assigned to it in canonical and dogmatic Tibetan Buddhism as have Jehovah and the Archangel Mikael the Metatron of the Jewish Kabbalists which is an absurdity The Roman Catholics identify Christ with Mikael who is also his ferouer or face mystically This is precisely the position of Vajrasattva in Northern Buddhism For the latter in His Higher Eqo as Dorjechang is never manifested except to the seven Dhyani Chohans the primeval Builders Esoterically He is the Spirit of the Seven collectively and Their highest principle or Atman Metatron is the Greek Messenger or Great Teacher Mikael fights Satan the Dragon and conquers him and his Angels The War in Heaven of the Christian legend is based upon bad angels having discovered the magical wisdom of the good ones and the mystery of the Tree of Life Let anyone read simply the exoteric accounts in the Hindu and Buddhist Pantheons the latter version being taken from the former and he will find both resting on the same primeval archaic allegory from the Secret Doctrine At whatever age one puts off his outward body by free will at precisely that age will he be made to die a violent death against his will in his next rebirth Who then was punished by Karma Karma cannot act unjustly There is some terrible mystery involved in this story one that no uninitiated intellect can ever unravel Shankaracharya died at thirty two years of age or rather disappeared from the sight of his disciples as the legend goes All is darkness and mystery in it for it is evidently written but for those who are already instructed Lord Buddha lived one hundred years in reality though having reached Nirvana in his eightieth year he was regarded as one dead to the world of the living It is not lawful to say any more for the time has not yet come when nations are prepared to hear the whole truth It will be sufficient to know that while Gautama Buddha remains merged in Nirvana ever since his death Gautama Shakyamuni may have had to reincarnate His dual inner personality being one of the greatest mysteries of Esoteric psychism Karma exercises its sway over the Adept as much as over any other man Gods can escape it as little as simple mortals Karma is absolute justice and infallible in its selections Thus Buddha s first reincarnation was produced by Karma and it led Him higher than ever the two following were out of pity and Keys to the Enneagram A. H. Almaas, 2021-10-05 More than just a tool to diagnose your personality type the Enneagram was originally developed to help people find the ultimate freedom of consciousness and achieve spiritual liberation A H Almaas brings us back to this original mission as he shares the essential keys that will help readers break free from the limitations and distortions of each type s fixation and to express their true spiritual nature in everyday life **Bharati Mukherjee** Emmanuel S. Nelson, 2017-04-07 The twelve essays that form this book first published in 1993 interpret Bharati Mukherjee's oeuvre from a variety of critical perspectives. The authors approaches range from the biographical to the poststructuralist from cultural analysis to comparative commentary to deconstructive reading Such diversity in the contributors theoretical stances and interpretive strategies enables this collection of essays to serve a key purpose to offer not only multiple but conflicting perspectives on Mukherjee's art and

achievement Self-Seeking and the Pursuit of Justice David P. Levine, 2019-05-23 First published in 1997 this volume delves into the most influential theories of economic justice which ground themselves in utilitarian or related contractarian ideas about the self These ideas take self interest to be transparent and unproblematic Favoured assumptions about the self also make scarcity the primary reality with which economic justice must deal Much is lost in consideration of the justness of economic arrangements when we take the wants and interests of the self for granted in this way and treat scarcity as a premise In this book the author places the discussion of economic justice on a sounder foundation as regards the nature and ends of the self The book begins with a discussion of the self as a structure and proceeds to consider aspects of self interest public ends economic welfare needs and wants the limits of the market economic democracy global inequality and justice as the end of development The Nature of Love, Volume 2 Irving Singer, 2009-02-20 An examination of ideas and ideals of medieval courtly love and the transition into later Romantic love analyzing the work of Dante Shakespeare and Schopenhauer among many others Review monumental Boston Globe one of the major works of philosophy in our century Nous wise and magisterial Times Literary Supplement and a masterpiece of critical thinking that is a timely eloquent and scrupulous account of what after all still makes the world go round Christian Science Monitor In the second volume Singer studies the ideas and ideals of medieval courtly love and nineteenth century Romantic love as well as the transition between these two perspectives According to the traditions of courtly love in the twelfth century and thereafter not only God but also human beings in themselves are capable of authentic love The pursuit of love between man and woman was seen as a splendid ideal that ennobles both the lover and the beloved It was something more than libidinal sexuality and involved sophisticated and highly refined courtliness that emulated religious love in its ability to create a holy union between the participants Adherents to Romantic love in later centuries affirmed the capacity of love to effect a merging between two people who thus became one Singer analyzes the transition from courtly to Romantic by reference to the writings of many artists beginning with Dante and ending with Richard Wagner as well as Neoplatonist philosophers of the Italian Renaissance Descartes Spinoza Rousseau Hume Kant Hegel and Schopenhauer In relation to romanticism itself he distinguishes between two aspects benign romanticism and Romantic pessimism that took on renewed importance in the twentieth century **Regulating Mergers** and Acquisitions of U.S. Electric Utilities: Industry Concentration and Corporate Complication Scott Hempling, 2020-10-30 What happens when electric utility monopolies pursue their acquisition interests undisciplined by competition and insufficiently disciplined by the regulators responsible for replicating competition Since the mid 1980s mergers and acquisitions of U S electric utilities have halved the number of local independent utilities Mostly debt financed these transactions have converted retiree suitable investments into subsidiaries of geographically scattered conglomerates Written by one of the U S s leading regulatory thinkers this book combines legal accounting economic and financial analysis of the 30 year march of U S electricity mergers with insights from the dynamic field of behavioral economics Lesbian

Gustafson,2014-07-14 Much of what was central to Tolstoy seems embarrassing to Western and Soviet critics points out Richard Gustafson in his absorbing argument for the predominance of Tolstoy's religious viewpoint in all his writings Received opinion says that there are two Tolstoys the pre conversion artist and the post conversion religious thinker and prophet but Professor Gustafson argues convincingly that the man is not two but one Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
