## Office Party:

*East Asian Sexualities* Stevi Jackson, Jieyu Liu, Juhyun Woo, 2009-04-15 This book paints a vivid picture of women's active involvement in reshaping intimate and public sexual life in East Asia. In bringing together exciting new feminist research on sexuality from East Asia and making it available to a wider audience, *East Asian Sexualities* unsettles stereotypes, rectifies lack of awareness and demonstrates that East Asia matters. The chapters address the diversity and variety of everyday sexual lives and sexual politics in China, Hong Kong, Taiwan, Korea, and Japan. They range from workplace sexual cultures, transnational sexual relations, the conditions of sex work, and the emergence of new sexual desires, cultures, and movements. The contributors highlight the gendered and sexual consequences of globalization and rapid social change. In doing so, they engage with western debates on late modernity while also exploring the contested understandings of modernization and westernization in the East. This is a collection which illuminates the local situations in which women's sexual lives are lived and offers fresh perspectives on global issues.

*Political science in motion* Ramona Coman, Jean-Frédéric Morin, 2019-08-06 What are the main trends in contemporary political science research? This book examines recent developments in political science research. What are the new influences to which the discipline opens itself up? Is political science research converging towards a single model or splitting into different streams? What are the new challenges at the beginning of the 21st century? This collection of essays discusses three interrelated topics: the relationship between political science and the problems of politics; the relationship between political science and other fields of research; and the transformation of the profession.

EXTRACT The past, the present, and the future of political science have always been a topic of inquiry for political scientists. This collection of essays is not the first to explore the evolution of the discipline. Since its inception, scholars of politics of all persuasions have reproduced the story of the field as a discipline and as a profession. Farr et al. 1990: 598; Blondiaux 1997: 10; Gunnell 2002: 339; Dryzek 2002, 2006. They have explored the discipline's relation with its social and political environment; they have questioned its epistemological and ontological specificities; and more recently, they have documented its professional standards, codes, and practices. As the discipline expands in different parts of the world, the attention devoted to its evolution and development has increased. Political science is a recognized object of study, and state-of-the-discipline studies are flourishing. This book seeks to contribute to these recent debates about the evolution of the discipline by exploring three interrelated themes: namely, 1) the discipline's co-evolution with politics; 2) its changing relations with sister disciplines; 3) and the transformation of its practices for knowledge production and dissemination. We argue in this volume that these topics are fundamental as they directly address the core identity of political science.

ABOUT THIS BOOK There is very little literature on academic journals and how they function or what they achieve, and *Political Science in Motion* is to be welcomed as a step towards filling that gap. It is well edited, as is evident from the cross-references between chapters. It answers some of the questions that one might want to ask, while others remain unanswered. *Article 45, husband and wife, to Article 100, work ,1888      Democracy and the Cartelization of Political Parties Richard*

S. Katz, Peter Mair, 2018-07-04 Political parties have long been recognized as essential institutions of democratic governance. Both the organization of parties and their relationships with citizens, the state and each other have evolved since the rise of liberal democracy in the 19th and early 20th centuries. Going into the 21st century it appears that parties losing popular support putting both parties and potentially democracy in peril. This book traces the evolution of parties from the model of the mass party through the catch-all party model to argue that by the late 20th century the principal governing parties and their allied smaller parties collectively the political mainstream were effectively forming a cartel in which the form of competition might remain and indeed even appear to intensify while its substance was increasingly hollowed out. The spoils of office were increasingly shared rather than restricted to the temporary winners; contentious policy questions were kept off the political agenda and competition shifted from large questions of policy to minor questions of managerial competence. To support this cartel the internal arrangements of parties changed to privilege the party in public office over the party on the ground. The unintended consequence has been to stimulate the rise of extra-cartel challengers to these cozy arrangements in the form of anti-party system parties and populist oppositions on the left but especially on the right. Comparative Politics is a series for researchers, teachers and students of political science that deals with contemporary government and politics. Global in scope, books in the series are characterised by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit [www.ecpr.net/eu](http://www.ecpr.net/eu). The series is edited by Emilie van Haute, Professor of Political Science, Université libre de Bruxelles; Ferdinand Müller-Rommel, Director of the Center for the Study of Democracy, Leuphana University; and Susan Scarrow, John and Rebecca Moores Professor of Political Science, University of Houston.
