Official Guide to ABA-Approved Law Schools, 2005 Edition Law School Admission Council, 2004-04-05 **Inclusive Socratic Teaching** Jamie R. Abrams, 2024-06-04 For more than fifty years scholars have documented and critiqued the marginalizing effects of the Socratic teaching techniques that dominate law school classrooms In spite of this law school budgets staffing models and course requirements still center Socratic classrooms as the curricular core of legal education In this clear eyed book law professor Jamie R Abrams catalogs both the harms of the Socratic method and the deteriorating well being of modern law students and lawyers concluding that there is nothing to lose and so much to gain by reimagining Socratic teaching Recognizing that these traditional classrooms are still necessary sites to fortify and catalyze other innovations and values in legal education Inclusive Socratic Teaching provides concrete tips and strategies to dismantle the autocratic power and inequality that so often characterize these classrooms A galvanizing call to action this hands on guide equips educators and administrators with an inclusive teaching model that reframes the Socratic classroom around teaching techniques that are student centered skills centered client centered and community centered *Courting Your Clients* Margaret Grisdela, 2007 **Searching the Law, 3d Edition** Frank Bae, Edward Bander, Francis Doyle, Joel Fishman, Paul Richert, 2021-12-13 *American Judicial Process* Pamela C. Corley, Artemus Ward, Wendy L. Martinek, 2015-09-25 This text is a general introduction to American judicial process The authors cover the major institutions actors and processes that comprise the U S legal system viewed from a political science perspective Grounding their presentation in empirical social science terms the authors identify popular myths about the structure and processes of American law and courts and then contrast those myths with what really takes place Three unique elements of this myth versus reality framework are incorporated into each of the topical chapters 1 Myth versus Reality boxes that lay out the topics each chapter covers using the myths about each topic contrasted with the corresponding realities 2 Pop Culture boxes that provide students with popular examples from film television and music that tie in to chapter topics and engage student interest 3 How Do We Know boxes that discuss the methods of social scientific inquiry and debunk common myths about the judiciary and legal system Unlike other textbooks American Judicial Process emphasizes how pop culture portrays and often distorts the judicial process and how social science research is brought to bear to provide an accurate picture of law and courts In addition a rich companion website will include PowerPoint lectures suggested topics for papers and projects a test bank of objective questions for use by instructors and downloadable artwork from the book Students will have access to annotated web links and videos flash cards of key terms and a glossary **The SAGE Encyclopedia of Online Education** Steven L. Danver, 2016-04-15 Online education both by for profit institutions and within traditional universities has seen recent tremendous growth and appeal but online education has many aspects that are not well understood The SAGE Encyclopedia of Online Education provides a thorough and engaging reference on all aspects of this field from the theoretical dimensions of teaching online to the technological aspects of implementing online courses with a central focus on the effective education

of students Key topics explored through over 350 entries include Technology used in the online classroom Institutions that have contributed to the growth of online education Pedagogical basis and strategies of online education Effectiveness and assessment Different types of online education and best practices The changing role of online education in the global education system

Investing in College Malcolm GETZ,2009-06-30 College education is one of the most important investments a family will make But between the viewbooks websites insider gossip and magazine rankings students and their worried parents face a dizzying array of options What do the rankings really mean Is it wise to choose the most prestigious school a student can get into What are the payoffs of higher education and by the way how do we pay for them In a unique approach to these conundrums an economist and award winning teacher walks readers through the opportunities risks and rewards of heading off to college Warning against the pitfalls of numerical rankings Malcolm Getz poses questions to guide a student toward not necessarily the best college but the right one Famous professors suggest quality but do they teach undergraduates Are smaller classes always better When is a state university the best deal around In a concise overview of decades of research Getz reviews findings on the long term returns of college education in different careers from law to engineering from nursing to financial management Sorting through personal professional and institutional variables he helps families determine when paying 40 000 a year might make sense and when it merely buys an expensive rear window decal He breaks down the formidable admissions game into strategies to improve the odds of acceptance and he offers tips on tax breaks subsidized loans federal grants 529 accounts merit scholarships and much more Shrewd and sensible Investing in College is an invaluable resource and a beacon of sanity for college bound students and the families who support them
