Fuertes-Olivera,Sven Tarp,2014-09-23 This book is the first comprehensive monograph on the Function Theory of Lexicography which originated at the Aarhus School of Business Aarhus University Function Theory considers dictionaries to be tools that are constructed for assisting specific users with punctual needs in specific usage situations e g communicative oriented situations and cognitive oriented situations The book s main focus is on defending the independent academic status of lexicography and its corollary The process of designing compiling and updating specialised online dictionaries needs a

theoretical framework that addresses general and specific aspects The former are common to all types of information tools the latter are mainly dependent on the media for which the information tool is constructed and their specific target users This books offers both aspects and moves from the highest level of abstraction to very detailed aspects of lexicographic work e g how to convert an originally conceived polyfunctional online dictionary into several monofunctional usage based ones The book illustrates that the theory and the methodology currently used by advocates of the Function Theory of Lexicography offers better results than other approaches and therefore makes its case for proposing the Function Theory for terminological terminographical work *Unhealthy Language: Linguistic Investigations of Covid-19 Discourse* Justyna Robinson,Roberta Piazza ,Rodney Jones,2024-10-01 The proposed volume reflects on the Coronavirus pandemic as a still evolving phenomenon and captures critically its socially constructed dimension The papers by well established international contributors deal with a variety of themes that range from the different discourses of the first and second lockdown the comparative responses to Covid in different parts of the world in light of the relationship between language and culture and the reflection of who the actors are who talk and are talked about in relation to the pandemic This last theme in particular offers a wide variety of responses from politicians and health experts communiqu s to the voices of marginal individuals and groups like the refugees The overall questions the papers as a whole try to answer is whether the discourses of and around Covid are equalizing or inciting inequality whether they perpetuate existing structures of dominance and exclusion and if and how they contributed to language change The volume offers an opportunity to both discourse analysts and sociolinguists to cross paths and work together The variety of analytic approaches adopted in both linguistic fields from corpus assisted and computational approaches to survey and interview based studies guarantees a ground breaking interdisciplinary volume with contributions designed to include linguistic analysis at all levels including the plane of grammatical description lexis phonology and discourse analysis **A Guide to Practical Online Lexicography** Pedro A.
