Police Leadership and Management Margaret Mitchell, John Peter Casey, 2007 This volume presents the new contexts and challenges for contemporary police leaders and managers in the changing landscapes of policing The governance of contemporary police organisations requires leaders and managers even at the local level to work in and understand complex social political and organisational environments The wide range of topics in this collection explores what is changing what is known about the impact of these changes and what leaders and managers now need to be able to do or anticipate as a consequence Operational policing is no longer the militaristic singular activity it once was but embraces new models of partnership and community to manage crime and disorder Equally while command and control models are still an essential of many aspects of policing managing police officers and staff increasingly depends on their professional development and encouraging enthusiasm and innovation Policing takes place under conditions of intense scrutiny from the media and from the community and crime and disorder is the subject of much political debate Each of these broad areas are addressed and present a surprising range of perspectives The volume is aimed at every level of management and leadership in policing researchers of policing and students of police management and leadership

The Psychology of Leadership David M. Messick, Roderick M. Kramer, 2004-09-22 In this book some of the world's leading

scholars come together to describe their thinking and research on the topic of the psychology of leadership. Most of the chapters were originally presented as papers at a research conference held in 2001 at the Kellogg School of Management of Northwestern University. The contributions span traditional social psychological areas as well as organizational theory examining leadership as a psychological process and as afforded by organizational constraints and opportunities. The editors' goal was not to focus the chapters on a single approach to the study and conceptualization of leadership but rather to display the diversity of issues that surround the topic. Leadership scholars have identified a host of approaches to the study of leadership. What are the personal characteristics of leaders? What is the nature of the relation between leaders and followers? Why do we perceive some people to be better leaders than others? What are the circumstances that evoke leadership qualities in people? Can leadership be taught? And so on. The contributions to this book examine these important questions and fall into three categories: conceptions of leadership; factors that influence the effectiveness of leadership; and the consequences and effects of leadership on the leader. All in all, the chapters of this volume display part of a broad spectrum of novel and important approaches to the study of the psychology of leadership. We hope that they are equally useful to those who are or would be leaders and to those who study the topic. As recent events have served to remind us, it is too important a topic to be ignored by psychologists.
