Realism And Nationalism 1852-1871 Robert C. Binkley, 2013-05-31 A fascinating history of nationalistic policies in Europe in the mid nineteenth century Both Germany France and Italy experienced huge nationalistic political reforms and they helped create the modern Europe we know today      **Realism and Nationalism** Robert Cedric Binkley, 1958      Realism and Nationalism, 1852-1871, Etc. Beklemishev, 2000-04-01 Provability Computability and Reflection      **The Cambridge History of War: Volume 4, War and the Modern World** Roger Chickering, Dennis Showalter, Hans van de Ven, 2012-09-27 Volume IV of The Cambridge History of War offers a definitive new account of war in the most destructive period in human history Opening with the massive conflicts that erupted in the mid nineteenth century in the US Asia and Europe leading historians trace the global evolution of warfare through the age of mass the age of machine and the age of management They explore how industrialization and nationalism fostered vast armies whilst the

emergence of mobile warfare and improved communications systems made possible the total warfare of the two World Wars. With military conflict regionalized after 1945 they show how guerrilla and asymmetrical warfare highlighted the limits of the machine and mass as well as the importance of the media in winning hearts and minds. This is a comprehensive guide to every facet of modern war from strategy and operations to its social, cultural, technological and political contexts and legacies.

Eastern Europe David Turnock, 2002-11      Islam and the West Michael J. Thompson, 2003-08-18 Since the terrorist attacks of September 11th the topic of Islam's political, cultural, religious and spiritual tendencies and beliefs has been thrust into the spotlight. However, most discussions concerning Islam's relation to the West tend to simplify and distort the intricate nature of the problem. The essays in *Islam and the West* approach the interactions of Islam, the West and modernity through overlapping social, historical, economic, cultural and philosophical layers. Viewed through this complex prism of analysis the full dimensions of the relationship become clear. The result is a deeper understanding of the nature of modernity and how other societies can relate to each other in an increasingly complex globalizing world.

*German Realpolitik and American Sociology* James A. Aho, 1975 A critical history of the sociologies of conflict of Lester Ward, Albion Small, Robert Park and Arthur Bentley, all of whom fell under the influence of German sociologists who explicitly approached the study of conflict from the perspective of realpolitik.

*Fictions of State* Patrick Brantlinger, 2019-06-30 In this ambitious book Patrick Brantlinger offers a cultural history of Great Britain focused on the concept of public credit from the 1694 founding of the Bank of England to the present. He draws on literary texts ranging from Augustan satire such as *Gulliver's Travels* to postmodern satire such as Martin Amis's *Money* and *A Suicide Note*. All critique the misrecognition of public credit as wealth. The economic foundations of modern nation states involved national debt, public credit and paper money. Brantlinger traces the emergence of modern imperial Great Britain from those foundations. He analyzes the process whereby nationalism, both the cause and the result of wars and imperial expansion, multiplied national debt and produced crises of public credit resolved only through more nationalism and war. During the first half of the eighteenth century conservatives attacked public credit as fetishistic and characterized national debt as alchemical. From the 1850s the stabilizing theories of public credit authored by David Hume, Adam Smith, Henry Thornton and others helped initiate the first social science economics. In the nineteenth century literary criticism both paralleled and questioned early capitalist discourse on public credit and nationalism while the Victorian novel refigured debt as the individual private credit and debt. During the era of high modernism and Keynesian economics the notion of high culture as genuine value recast the debate over money and national indebtedness. Brantlinger relates this cultural historical trajectory to Marxist, poststructuralist and postcolonial theories about the decline of the European empires after World War II, the global debt crisis and the weakening of western nation states in the postmodern era.

practitioners of science writers of fiction and journalists wrote about electricity in ways that defied epistemological and disciplinary boundaries Revealing electricity as a site for intense and imaginative Victorian speculation Stella Pratt Smith traces the synthesis of nineteenth century electricity made possible by the powerful combination of science literature and the popular imagination With electricity resisting clear description even by those such as Michael Faraday and James Clerk Maxwell who knew it best Pratt Smith argues that electricity was both metaphorically suggestive and open to imaginative speculation Her book engages with Victorian scientific texts popular and specialist periodicals and the work of leading midcentury novelists including Charles Dickens Charlotte Bronte Emily Bronte William Makepeace Thackeray and Wilkie Collins Examining the work of William Harrison Ainsworth and Edward Bulwer Lytton Pratt Smith explores how Victorian novelists attributed magical qualities to electricity imbuing it with both the romance of the past and the thrill of the future She concludes with a case study of Benjamin Lumley s *Another World* which presents an enticing fantasy of electricity s potential based on contemporary developments Ultimately her book contends that writing and reading about electricity appropriated and expanded its imaginative scope transformed its factual origins and applications and contravened the bounds of literary genres and disciplinary constraints *Wagner in Retrospect* ,2023-12-18 [Taking Stock - Twenty-Five Years of Comparative Literary Research](#) ,2019-10-29 Read an interview with Norbert Bachleitner In this 200th volume of *Internationale Forschungen zur Allgemeinen und Vergleichenden Literaturwissenschaft* the editors Norbert Bachleitner Achim H H Iter and John A McCarthy take stock of the discipline It focuses on recurrent questions in the field of Comparative Literature What is literature What is meant by comparative Or by world What constitute transgressions or refractions What ultimately does being at home in the world imply When we combine the answers to these individual questions we might ultimately reach an intriguing proposition Comparative Literature contributes to a sense of being at home in a world that is heterogeneous and fractured rather than affirming a monolithic canon marked by territory and homogeneity The volume unites essays on world literature literature in the context of the history of ideas comparative women and gender studies aesthetics and textual analysis and literary translation and tradition *Political Repression in 19th Century Europe* Robert Justin Goldstein,2013-06-17 Originally published in 1983 The nineteenth century was a time of great economic social and political change As Europe modernized previously ignorant and apathetic elements in the population began to demand political freedoms There was pressure also for a freer press for the rights of assembly and association The apprehension of the existing elites manifested itself in an intensification of often brutal form of political repression The first part of this book summarizes on a pan European basis the major techniques of repression such as the denial of popular franchise and press censorship This is followed by a chronological survey of these techniques from 1815 1914 in each European country The book analyzes the long and short term importance of these events for European historical development in the 19th and 20th centuries **April '65** William A. Tidwell,1995 This text examines the history of the Confederate Secret Service and its

involvement in the assassination of President Lincoln The author uses previously unknown records and traces the development of Confederate doctrine for the conduct of irregular warfare      **Russian Officialdom in Crisis** Thomas S. Pearson, 2004-02-12 This book is the first full account of the development of rural self government in Russia from the emancipation of the serfs to its bureaucratisation in the counter reforms of 1889 90 Through analysis of central and provincial perceptions of local self government and conflicting ideologies of reform Professor Pearson challenges the conventional view of the counter reforms as a concession to gentry class interests and a reaction against zemstvo political activity The study illuminates the rural administrative breakdown during Russia s crisis of autocracy beginning in the late 1870s and reinterprets the role of the landed gentry prominent state officials and key commissions ministries and administrative ideologies in the debates leading to the counter reforms
