

# Realism

An interest in how things really exist without them being colored by emotion, perception, narrative and abstractions.

## Overview

Simplifiable

- The perspective that human perceptions and concepts do not shape reality but rather reality has its own properties that don't necessarily bend to human ideas.
- A character trait whereby an individual looks for concrete evidence without accepting theories that might be true.
- A movement in art, literature and film that depicts everyday life without romanticizing or idealizing it.
- Realism can be a form of pessimism based on the claim that negative assumptions are realistic. For example, the assumption that people are purely motivated by a desire for power.

## Examples

1. A manager who asks for data when an employee comes up with an inventive new product design.
2. A film that depicts how a historical person really was without dramatizing, idealizing or politicizing their depiction.
3. A person with a tendency to stick to the facts with little interest in wild theories.
4. An academic who rejects the notion of idealism -- the theory that human thinking and abstractions shape reality.
5. A media commentator who is uninterested in the narratives used to frame issues and events but rather looks at the facts using first principles.

## **Realism And The Explanation Of Behavior:**

**Realism and the Explanation of Behavior** Merle B. Turner, 1971 *Behavior Theory and Philosophy* Kennon A. Lattal, Philip N. Chase, 2013-03-14 This volume is based on a conference held at West Virginia University in April 2000 in recognition of the career long contributions to psychology of Hayne W Reese Centennial Professor of Psychology who retired from the University at the end of the 1999 2000 academic year Although Professor Reese may be even better known for his contributions to developmental psychology his influential scholarly work on philosophical and conceptual issues that impact all of psychology provided the impetus for the conference Behavior theory and philosophy was the name given by Professor Reese and one of the authors in this volume Jon Krapfl to a course that they developed at West Virginia University in the late 1970s It seemed appropriate to adopt its title for both the conference and this volume as the shared theme involves the ideas that have shaped modern behavior analysis A number of people contributed to the success of the May 2000 conference honoring Hayne Reese and we thank them all for their efforts Dean Duane Nellis of the Eberly College of Arts and Sciences at WVU offered enthusiastic support for the project both financially and through his assignment of staff to help with the conference Mark Dalessandro Relations Director for the Eberly College of Arts and Sciences served as the point man for the conference and made all of the local arrangements both within the university and the community

**Realism** Benjamin Frankel, 1996 The original essays collected in this book offer a comprehensive evaluation of realism as a theory of international relations

Darwin and International Relations Bradley A. Thayer, 2014-07-11 Pathbreaking and controversial Darwin and International Relations offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory Bradley A Thayer provides a new method for investigating and explaining human and state behavior while generating insights into the origins of human and animal warfare ethnic conflict and the influence of disease on international relations Using ethnological and statistical studies of warfare among tribal societies Thayer argues that humans wage war for reasons predicted by evolutionary theory to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans He notes that these behaviors once contributed to our ancestors success in radically different environments but they remain a part of us Darwin and International Relations makes a major contribution to our understanding of human history and the future of international relations

**Realism in International Relations: The Making of a Disarrayed Tradition**  
Mehmet Tabak, 2025-03-05 According to a pervasive view in the discipline of International Relations IR a realism is a historical tradition stretching all the way back to Thucydides b despite the important theoretical differences among themselves realists uphold the same set of core beliefs about the workings of international politics Together these two claims amount to the perspective that realism is a sui generis scholarly tradition with ancient origins The author critiques both aspects of this view by illustrating that realism is both a relatively recent tradition and a disarrayed one He shows that the realist tradition entails conscious membership and participation in a common realist discourse that has produced fundamentally different even opposing methodologies and theories about the same or related phenomena in international politics In illustrating this argument the author critically explores a variety of seminal statements of and debates about realism This exploration reveals that the conceptual and theoretical shortcomings of the major statements of realism significantly explain why realism evolved as a disarrayed tradition Overall this book makes an important contribution to the understanding of realism in particular and IR in general The comprehensive and critical analysis of many facets of realism this book offers also yields many didactic elements
