

What is **REALITY**?

Reality encompasses the objective existence of the physical world, events, and entities, independent of perception. It includes the tangible and intangible elements that shape our experiences.

Reality is a dynamic interplay of matter, energy, space, and time, governed by natural laws. Human perception, cognition, and interpretation contribute subjective dimensions to reality, shaping individual perspectives.

Reality is the sum of universal truths, perceptions, and the ever-evolving nature of existence, challenging our understanding and pushing the boundaries of knowledge and consciousness.

Naturalism and Our Knowledge of Reality Dr R Scott Smith, 2013-06-28 Philosophical naturalism is taken to be the preferred and reigning epistemology and metaphysics that underwrites many ideas and

knowledge claims But what if we cannot know reality on that basis What if the institution of science is threatened by its reliance on naturalism R Scott Smith argues in a fresh way that we cannot know reality on the basis of naturalism Moreover the fact value split has failed to serve our interests of wanting to know reality The author provocatively argues that since we can know reality it must be due to a non naturalistic ontology best explained by the fact that human knowers are made and designed by God The book offers fresh implications for the testing of religious truth claims science ethics education and public policy Consequently naturalism and the fact value split are shown to be false and Christian theism is shown to be true
