

A person is lying on their back on a grassy field at night. The sky is dark blue and filled with stars. A bright, glowing comet streaks across the upper left portion of the sky. The person's legs are visible, and they appear to be wearing dark clothing. The overall scene is serene and contemplative.

Global Brain Ervin Laszlo,2008-02-27 The shift from scientific materialism to a multidimensional worldview in harmony with the world s great spiritual traditions Articulates humanity s critical choice to be the last decade of an outgoing obsolete world or the first of a new and viable one Presents a new reality map to guide us through the environmental scientific and geopolitical upheavals we are experiencing Our world is in a Macroshift The reality we are experiencing today is a substantially new reality climate change global corporations industrialized agriculture challenging us to change with our rapidly changing world lest we perish In this book Ervin Laszlo presents a new reality map to guide us through the world shifts we are experiencing the problems opportunities and challenges we face individually as well as collectively in order to help us understand what we must do during this time of great transition Science s cutting edge now views reality as broader as multiple universes arising in a possibly infinite meta universe as well as deeper extending into dimensions at the subatomic level Laszlo shows that aspects of human experience that had previously been consigned to the domain of intuition and speculation are now being explored with scientific rigor and urgency There has been a shift in the materialistic scientific view of reality toward the multidimensional worldview of multiple interconnected realities long known by the world s great

spiritual traditions By understanding the interconnectedness of our changing world as well as our changing map of the world we can navigate with insight wisdom and confidence

Intentional Transformative Experiences Sarah Perez,Bastiaan van Rijn,Jens Schlieter,2024-09-23 This book offers new theoretical insights into religious esoteric and philosophical practices and narratives that deal with intentional transformative experiences Exceptional life changing experiences are often believed to be beyond the individual s control they are thought to simply happen However many individuals actively and self reflectively search for transformative experiences Intentional Transformative Experiences provides analyses of such intentionally sought experiences in different spiritual religious and esoteric milieus Case studies range from South and Central Asian traditions to Western esoteric practices compare autobiographical narratives of self cultivation and explore attempts to systematize intentional transformative experiences Next to applying established theoretical frameworks such as the cognitive science of religion and philosophy this volume also includes considerations on subsets of transformative experiences such as the dichotomy of intentionality and unintentionality risk and failure as well as the transformation of others instead of one s own self The result is an important contribution for researchers who deal with narratives or practices that include transformative experiences

The Metaphysics of Virtual Reality Michael Heim,1994-10-27 Computers have dramatically altered life in the late twentieth century Today we can draw on worldwide computer links speeding up communications by radio newspapers and television Ideas fly back and forth and circle the globe at the speed of electricity And just around the corner lurks full blown virtual reality in which we will be able to immerse ourselves in a computer simulation not only of the actual physical world but of any imagined world As we begin to move in and out of a computer generated world Michael Heim asks how will the way we perceive our world change In *The Metaphysics of Virtual Reality* Heim considers this and other philosophical issues of the Information Age With an eye for the dark as well as the bright side of computer technology he explores the logical and historical origins of our computer generated world and speculates about the future direction of our computerized lives He discusses such topics as the effect of word processing on the English language while word processors have led to increased productivity they have also led to physical hazards such as repetitive motion syndrome which causes inflamed hand and arm tendons Heim looks into the new kind of literacy promised by Hypertext technology which allows the user to link audio and video elements the disadvantages including disorientation and cognitive overload And he also probes the notion of virtual reality cyberspace the computer simulated environments that have captured the popular imagination and may ultimately change the way we define reality itself Just as the definition of interface itself has evolved from the actual adapter plug used to connect electronic circuits into human entry into a self contained cyberspace so too will the notion of reality change with the current technological drive Like the introduction of the automobile the advent of virtual reality will change the whole context in which our knowledge and awareness of life are rooted And along the way Heim covers such intriguing topics as how computers have altered our thought habits how we will

be able to distinguish virtual from real reality and the appearance of virtual reality in popular culture as in Star Trek's holodeck William Gibson's Neuromancer and Stephen King's Lawnmower Man Vividly and entertainingly written The Metaphysics of Virtual Reality opens a window on a fascinating world that promises or threatens to become an integral part of everyday life in the 21st century As Heim writes not only do we face a breakthrough in the technology of computer interface but we face the challenge of knowing ourselves and determining how the technology should develop and ultimately affect the society in which it grows

Not Just Another Theory Alan E Halonen,2016-03-24 Something is deeply wrong with the field of physics and how it informs our understanding of the natural world Despite years of effort the theories of Einstein cannot be reconciled with our current approach to the strange effects we measure at the quantum level No law of physics can stand alone and yet the field is splintered into competing theories and disparate observations that work against attempts to unify science in a single theory of everything Using the fundamental nature of gravity quantum fluctuations and energy Not Just Another Theory reimagines the interaction between all aspects of the physical universe to push towards a unified theory of everything free of the assumptions and gaps currently found in the scientific establishment Far from rehashing old

information this complete theory of nature starts from the beginning by re establishing what we know and how we know it to move past contradictory approaches and incompatible theories It casts the whole universe in a new perspective from the massive movements of galaxies to the tiny fluctuations of quantum loops Our understanding of nature will never be the same
