EBOOK: Enhancing Primary Science: Developing Effective Cross-Curricular Links Lois Kelly, Di

Stead, 2013-02-16 How can other subjects in the primary curriculum enhance the teaching and learning of primary science The key argument in the book is that children's learning is enriched through both discrete subject teaching and cross curricular approaches to the curriculum and that children become more effective learners when they make links between the different subjects This book gives helpful insights into why making effective cross curricular links enriches science and discusses when and how to make effective and authentic links between science and other subjects Each chapter tackles a particular subject and considers how it can enhance science learning through a variety of approaches and a wealth of ideas for the classroom Written in a clear accessible and informative style this book Includes contributions from a range of expert practitioners Provides a good balance between theory and practice Includes practical advice and tasks to help develop your confidence and skill in cross curricular teaching Is illustrated with examples of pupils' voice This book is ideal for students teachers and schools who wish to adopt a cross curricular approach to teaching and enhance their primary science curriculum Contributors Alison Brade Mark Hamill Sharon Harris Shelagh Hendry Alison Hermon Pat Hughes Arthur Kelly Liz Lawrence and Cliff Porter Let this book take you by the hand and guide you skilfully past the pitfalls of cross curricular teaching in primary science whilst enjoying the celebration of creative and effective links between science and other subjects It is full of practical suggestions for cross curricular work but it never loses sight of the need for clear learning goals Rooted in the principles of collaborative learning this book inspires and informs Anne Goldsworthy Independent Science Consultant This important book explores a practical framework for cross curricular teaching of science through a closely referenced theoretical rationale There are a range of open ended tasks that illustrate the rich learning opportunities that can be planned for when expert subject knowledge combines with a pedagogy for enquiry This is an essential read for all teachers inspired to tailor the curriculum to the needs and interests of their children Alison Peacock Headteacher of The Wroxham School and Transformative Learning Alliance Network Leader for the Cambridge Primary Review I enjoyed this book sharing insights

into cross curricular approaches to primary science The authors have successfully demonstrated how they have put theory into practice There are many useful activities clearly outlined for use in the classroom based on the authors own experiences The reader will gain sound knowledge and understanding of how and why cross curricular approaches can enhance primary science through worked examples My particular favourite was the History of Bread I will certainly recommend this book to my students Kathy Schofield Senior Lecturer for Primary Science Manchester Metropolitan University UK These ideas have given me the confidence that cross curricular approaches can enrich scientific provision rather than dilute it Primary School Teacher Knowledge and Understanding of the World Richard Woolley,Jane Johnston,Emily Rotchell,2011-01-13

Assessment in Geographical Education: An International Perspective Theresa Bourke,Reece Mills,Rod Lane,2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills **The First Book of Botany** Eliza Ann Youmans,1883 **Improving Teaching and Learning in the Humanities** Martin Ashley,2012-10-12 Focuses on religious education history geography and cross curricular planning in the primary school It includes discussion of the purpose of education and how the humanities fit with this purpose with particular reference to the 1998 Education Act and 1994 National Curriculum Review The book deals with the themes of time place values communication responsibilities and decision making These link the chapters and are fully complemented with case studies For each concept there are suggestions for practical classroom activities The reader will find the book

invaluable in integrating the subjects across the National Curriculum Teaching Humanities in Primary Schools Pat Hoodless, Elaine McCreery, Paul Bowen, Sue Bermingham, 2009-09-10 This book supports primary trainees in their learning and teaching approach to the core humanities subjects geography history and religion It promotes an integrated approach to these subject areas and encourages trainees to reflect on the links between subjects across the curriculum from the Early Years Foundation Stage through to Key Stage 2 This edition has been updated to incorporate the revised Professional Standards for the Award of QTS and addresses key initiatives such as Excellence and Enjoyment Every Child Matters and the Primary National Strategy for Literacy and Mathematics *Curriculum Simplicity: A Practical Guide for Developing Your Primary Curriculum* Melanie Moore, 2024-09-30 Are you a busy teacher subject lead or senior leader looking to improve your curriculum Based on the theory of simplicity the idea that clarity and logic can make even the most complex tasks manageable Curriculum Simplicity offers a practical and systematic planning aid guiding readers through the process of building a robust coherent whole school curriculum Recognising the role of teachers autonomy and professional judgement this essential read provides space for the flexibility and creativity needed for teachers to reflect their own values content aims and outcomes within the curriculum Divided into a series of easily digestible chapters and filled with templates worked examples and planning formats this book unpacks the process of creating a curriculum Topics explored include but are not limited to The importance of pedagogy Good subject leadership Building a curriculum progression framework Implementing delivering and evaluating your curriculum Assessment Highly practical and written in an accessible style teachers are encouraged to reflect on their curriculum planning development and delivery This is an essential read for any teacher subject lead or senior leader who wishes to improve their curriculum and support positive learning outcomes within their school

Teaching the Primary Curriculum for Constructive Learning Michael Littledyke, Laura Huxford, 2013-10-23 First Published in 1998 There is a current preoccupation with educational standards with claims that overall standards of achievement have fallen The purpose of this book therefore is to address the question of how children learn across the primary National Curriculum subjects with implications for effective teaching approaches The book emphasises a constructivist view of learning which acknowledges that children have views and attitudes which are formed as a result of experiences in and out of school and that these must be taken into account if meaningful and transferable learning is to be achieved **Teaching Outdoors Creatively** Stephen Pickering, 2017-04-21 Teaching Outdoors Creatively offers guidance and a variety of exciting ideas to suit the full range of primary schools and locations Underpinned by current research and practical experience it investigates innovative approaches to working creatively with children beyond the classroom While recognising the diverse needs and opportunities that primary schools have to develop the outdoors as part of their curriculum it presents a broad range of activities philosophies and approaches Key themes explored include Understanding and using local and home environments Investigating streets and buildings in your area Planning fieldwork Using rivers to

inspire children Forest schools Beach schools Physical education outdoors Learning through adventure Teaching Outdoors Creatively supports teaching and learning in a wide range of settings from schools in rural and urban areas to off site outdoor education centres and residential visits With a focus on developing effective and stimulating learning environments for children it is a must have resource for all busy trainee and practising teachers Learning Primary Geography Susan Pike,2015-12-22 Learning Primary Geography Ideas and inspiration from classrooms celebrates children s learning in primary geography It is a book for all student and practising teachers who would like children to learn about their world in an enjoyable and stimulating way Every page presents inspiring examples of children s learning and explains how and why creative approaches such as enquiry learning learning outside the classroom and using imaginative resources work so well in primary geography Using illustrated case studies from a range of schools and classrooms each chapter showcases the fantastic work all children can do in primary geography The book explores a wide variety of geographical learning with chapters focusing on key aspects of the subject including primary geography through the school grounds topical geography through issues and events learning about places in primary geography children s agency and action through primary geography Throughout the chapters the role of primary geography in helping children develop all types of literacies including spatial critical and digital literacies is explored Written by a highly experienced teacher and lecturer in education Learning Primary Geography is underpinned and illustrated by examples from a wide range of primary classrooms It will be a source of support guidance and inspiration for all those teaching geography in the primary school Teaching Primary Geography Simon Catling,Tessa Willy,2010-07-21 Written with reference to the 2007 Professional Standards for the Award of QTS and initiatives such as the Primary National Strategy each chapter offers practical guidance on topics such as planning assessment and the creation of resources It provides summaries of key topics in primary geography including the study of places environmental sustainability learning beyond the classroom global issues citizenship and cross curricular approaches to promote children s subject knowledge well being and learning within primary geography With research summaries practical and reflective tasks and classroom examples this book helps trainees and NQTs teach primary geography confidently and creatively throughout the primary school
