Rearming The French:

Rearming the French Marcel Vigneras, 2015-08-14 Every thoughtful American interested in the history of our present mutual assistance program should find this a profitable and illuminating book In rearming the French the War Department and the U S Army became agents of an Allied policy which not only enabled this country to further a friendship for France that dated from the Revolution but in addition served the military interests of both nations It equipped Frenchmen with the means to fight and by so doing increased at minimum cost the forces available to the United Nations The Army can take pride in the success with which it administered a policy involving both political and military matters The policy of mutual aid has since been extended throughout the world with the Army again designated as the agency principally responsible for its administration The present thorough and objective study of an early large scale American experiment with mutual aid should therefore be highly instructive to all concerned This volume tells how the French forces were rearmed from the time they re entered World War II after their temporary eclipse from the battlefields of Europe The text inescapably focuses attention on the part played by America in the undertaking if for no other reason than that the undertaking itself while shared between the United States and the United Kingdom was largely American The purpose of this volume is twofold It is a historical account of a sizable and laborious enterprise that enabled a friendly military establishment in dire need of assistance to take its place among the forces aligned against the Axis It is intended also to serve as a guide for the solution of problems likely to arise out of similar future enterprises While this volume is not primarily concerned with operational matters it contains sufficient operational material to establish the extent of the contribution made by the rearmed French forces toward the final victory of the United Nations The reader is warned that only such French political developments that had a definite influence on the course of rearmament are discussed and the discussion is limited to that sufficient to place the evolution of French rearmament in its proper perspective *Rearming the French* Marcel Vigneras, 1957 The reemergence of French national forces in the war against the Axis Powers and the role of large scale American aid *Rearming the French*. By Marcel Vigneras. [With Illustrations and a Map.]. United States. Department of the Army. Office of Military History, Marcel Vigneras, 1957 *Rearming the French* Marcel Vigneras, 2013-03 United States Army In World War II Additional Contributors Are John H Stokes And Hugh M Cole The Reemergence Of French National Forces In The War Against The Axis Powers And The Role Of Large Scale American Aid *Rearming the French* Marcel Vigneras, 1957 The reemergence of French national forces in the war against the Axis Powers and the role of large scale American aid **Rearming the French in World War II.** Monro MacCloskey, 1972 **Rearming the French** Marcel Vigneras, 2003-04-01 In rearming the French the War Department and the U S Army became agents of an Allied policy which not only enabled the United States to further a friendship for France that dated from the Revolution but in addition served the military interests of both nations It equipped Frenchmen with the means to fight and by so doing increased at minimum cost the forces available to the United

Nations The Army can take pride in the success with which it administered a policy involving both political and military matters The policy of mutual aid has since been extended throughout the world with the Army again designated as the agency principally responsible for its administration The present thorough and objective study of an early large scale American experiment with mutual aid should therefore be highly instructive to all concerned Rearming the French United States. The Fall and Rise of French Sea Power Hugues Canuel,2021-04-15 The Fall and Rise of French Sea Power explores the renewal of French naval power from the fall of France in 1940 through the first two decades of the Cold War The Marine nationale continued fighting after the Armistice a service divided against itself The destruction of French sea power at the hands of the Allies the Axis and fratricidal confrontations in the colonies continued unabated until the scuttling of the Vichy fleet in 1942 And yet just over twenty years after this dark day Charles de Gaulle announced a plan to complement the country's nuclear deterrent with a force of nuclear powered ballistic missile carrying submarines Completing the rebuilding effort that followed the nadir in Toulon this force provided the means to make the Marine nationale a fully fledged blue water navy again ready to face the complex circumstances of the Cold War An important continuum of cooperation and bitter tensions shaped naval relations between France and the Anglo Americans from World War II to the Cold War The rejuvenation of a fleet nearly wiped out during the hostilities was underpinned by a succession of forced compromises often the least bad possible reluctantly accepted by French politicians and admirals but effectively leveraged in their pursuit of an independent naval policy within a strategy of alliance Hugues Canuel demonstrates that the renaissance of French sea power was shaped by a naval policy formulated within a strategy of alliance closely adapted to the needs of a continental state with worldwide interests This work fills a distinct void in the literature concerned with the evolution of naval affairs from World War II to the 1960s The author drawing upon extensive research through French British American and NATO archives including those made public only recently regarding the sensitive circumstances surrounding the French nuclear deterrent maps out for readers the unique path adopted in France to rebuild a blue water fleet during unprecedented circumstances

United States Army in World War II United States. Military History, Office of the Chief of,1957 The Crash of Ruin Peter Schrijvers,2001-02 In the ruined Europe of World War II American soldiers on the frontline had no eye for breathtaking vistas or romantic settings The brutality of battle profoundly darkened the soldiers perceptions of the Old World Drawing on soldiers diaries letters poems and songs Peter Schrijvers offers a compelling account of the experiences of U S combat ground forces their struggles with the European terrain and seasons their confrontations with soldiers and their often startling encounters with civilians Schrijvers relays how the GIs became so desensitized and dehumanized that the sight of dead animals often evoked more compassion in them than enemy dead The Crash of Ruin concludes with a dramatic and moving account of the final Allied offensive into German held territory and the soldiers bearing witness to the ultimate

symbol of Europe's descent into ruin the death camps of the Holocaust **Special Studies** Marcel Vigneras, 1957 Bogen beskriver USA og de Allieredes problematiske forhold til Frankrig under 2. Rearming the French, Special Studies CMH 11-6, 2017, 2018 **The French Secret Services** Douglas Porch, 2003-11 Chronicles the development of the French secret services in the modern era asks some fundamental questions about what France expected and expects from them and offers a assessment of their role and influence in the state and the military *War of Supply* David D. Dworak, 2022-05-17 The era of modern warfare introduced in World War II presented the Allied Powers with one of the more complicated logistical challenges of the century how to develop an extensive support network that could supply and maintain a vast military force comprised of multiple services and many different nations thousands of miles away from their home ports The need to keep tanks rolling airplanes flying and food and aid in continuous supply was paramount to defeating the Nazi regime In this extensively researched book David Dworak takes readers behind the scenes and breaks down the nuances of strategic operations for each of the great Mediterranean military campaigns between 1942 and the conclusion of World War II on May 8 1945 Dworak gives readers a glimpse behind the curtain to show how the vast administrative bureaucracy developed by the Allies waged a literal war of materiel that gave them a distinct strategic advantage over the Axis powers From North Africa to Southern France their continued efforts and innovation developed the framework that helped create and maintain the theater of war and ultimately paved the path to victory
