## **Reason And History Or Only A History Of Reason:**

**Between Reason and History** David S. Owen, 2002-07-18 The first book length treatment in English of Habermas's theory of social evolution and progress      [Georg Picht: A Pioneer in Philosophy, Politics and the Arts](#) Enno Rudolph, Johannes Picht, 2023-01-21 Aimed at an international readership this book offers a representative collection of essays by the German philosopher Georg Picht 1913-1982 who was a specialist in Greek philosophy practical philosophy and philosophy of religion Picht's themes address different disciplines such as ancient philosophy systematic philosophy and political analysis and often contain critical statements on significant developments from the European Enlightenment to the Cold War era Other essays offer a distinctive interdisciplinary approach characteristic of the author These contributions are relevant to both philosophy and science as they discuss for instance philosophical definitions of space and time or the relationship between history and evolution Another part of the book includes texts on art that present Picht's authentic definition of art and his theory of the interdependence of art and politics For the first time key texts of the German philosopher and political thinker Georg Picht are presented to a global readership in English Like Nietzsche's philosophy Picht's work is grounded in his outstanding professionalism in the different fields of classics embracing not only texts and theories of the great thinkers from the pre-Socratic to the post-Aristotelian and Stoic philosophies but also the main currents of ancient literature Picht's importance as a political author and public adviser is exceptional and may explain why his lifelong friend Carl Friedrich von Weizsäcker another pioneer presented in this series called him his teacher      **Reason and Nature** Morris R. Cohen, 2018-12-14 First published in 1931 this volume represents the culmination of twenty years of the study on the principles of science Noticing a widespread craving for philosophical light at a time of scant such offerings Morris R. Cohen aimed to demonstrate here the fundamental and ancient connection between nature and science between hearts and minds in an attempt to salve the developing mutual hostility between the two in the 1920s The volume bears particular relation to George Santayana's *Life of Reason* and Bertrand Russell's *Principles of Mathematics* and explores areas including the character of the insurgence against reason and reason in the contexts of the natural and social sciences

**Beyond Reason** Sanjay Seth, 2020-12-11 The knowledge disseminated by universities and mobilized by states to govern populations has been globally dominant for more than a century It first emerged in the early modern period in Europe and subsequently became globalized through colonialism Despite the historical and cultural specificity of its origins modern Western knowledge was thought to have transcended its particularities such that unlike pre-modern and non-Western knowledges it was universal or true for all times and places In this bold and ambitious book Sanjay Seth argues that modern knowledge and the social sciences are a product of Western modernity claiming a spurious universality that what we treat as the truths discovered by social scientific reason are instead a parochial knowledge Drawing upon and deriving its critical energies principally from postcolonial theory *Beyond Reason* traverses many disciplines including science studies social

history art and music history political science and anthropology and engages with a range of contemporary thinkers including Butler Habermas Chakrabarty Chatterjee and Rawls It demonstrates that while global in their impact the social sciences do not and cannot transcend the Western historical and cultural circumstances in which they emerged If the social sciences are not explained and validated simply by the fact that they are true it becomes possible to ask what purpose they serve what it is that they do A defining feature of modern knowledge is that it is divided into disciplines each with its own object of inquiry and corresponding protocols and thus asking what such knowledge does requires asking what purpose disciplines serve It also requires asking what ways of understanding the world they facilitate and what they disallow Beyond Reason proceeds to anatomize the disciplines of history and political science to ask what representations and relations with the past and with politics these academic disciplines enable and what ways of understanding and engaging the world they foreclose *Powers of Distinction* Nancy Levene, 2017-12-06 In this major new work philosopher of religion Nancy Levene examines the elemental character of religion and modernity Deep in their operating systems she argues are dualisms of opposition and identity that cannot be reconciled with the forms of life they ostensibly support These dualisms are dead ends but they conceal a richer position another kind of dualism constitutive of mutual relation This dualism is difficult to distinguish and its concept of relation difficult to commit to It risks contention and even violence But it is also the indispensable support for modernity's most innovative ideals democracy criticism and interpretation In readings from Abraham to the present Levene recovers this richer dualism in its difference from the alternatives other dualisms nondualism multiplication From Abraham we get the biblical call to give up tribal belonging for a promised land of covenantal relation Yet modernity inclusive of this call is also the principle that critiques the promise when it divides self from other us from them Drawing on a long tradition of thinkers and scholars even as she breaks new ground Levene offers here nothing less than a new way of understanding modernity as an ethical claim about our world a philosophy of the powers of distinction to include rather than to divide

**Theology in the Age of Scientific Reasoning** Nancey Murphy, 2018-07-05 In this timely and provocative book Nancey Murphy sets out to dispel skepticism regarding Christian belief She argues for the rationality of Christian belief by showing that theological reasoning is similar to scientific reasoning as described by contemporary philosophy of science Murphy draws on new historicist accounts of science particularly that of Imre Lakatos According to Lakatos scientists work within a research program consisting of a fixed core theory and a series of changing auxiliary hypotheses that allow for prediction and explanation of novel facts Murphy argues that strikingly similar patterns of reasoning can be used to justify theological assertions She provides an original characterization of the theological data and explores the consequences for theology and philosophy of religion of adopting such an approach **On Politics: A History of Political Thought: From Herodotus to the Present** Alan Ryan, 2012-10-22 Looks at the history of politics from Hobbes to the twenty first century *Between Philosophy and Religion: Hermeneutics and ontology* Brayton Polka, 2006-01-01 In *Between Philosophy and Religion* Volumes

I and II Brayton Polka examines Spinoza's three major works on religion politics and ethics in order to show that his thought is at once biblical and modern This book and its companion volume are essential reading for any scholar of Spinoza

**Reason's Traces** Matthew Kapstein,2001-06-15 Reason's Traces addresses some of the key questions in the study of Indian and Buddhist thought the analysis of personal identity and of ultimate reality the interpretation of Tantric texts and traditions and Tibetan approaches to the interpretation of Indian sources Drawing on a wide range of scholarship Reason's Traces reflects current work in philosophical analysis and hermeneutics inviting readers to explore in a Buddhist context the relationship between philosophy and traditions of spiritual exercise Modernity and the Final Aim of History F.

Tomasoni,2003-09-30 This book is intended for scholars and students in humanities history Jewish studies philosophy Christian theology and for those concerned with the roots of anti-Semitism and with the need for toleration and intercultural pluralism The book combines the development of German philosophy from the Enlightenment to Idealism and from Idealism to the revolutionary turning point of the mid nineteenth century with the Jewish question A Global History of Modern

Historiography Georg G Iggers,Q. Edward Wang,Supriya Mukherjee,2013-09-13 So far histories of historiography have concentrated almost exclusively on the West This is the first book to offer a history of modern historiography from a global perspective Tracing the transformation of historical writings over the past two and half centuries the book portrays the transformation of historical writings under the effect of professionalization which served as a model not only for Western but also for much of non Western historical studies At the same time it critically examines the reactions in post modern and post colonial thought to established conceptions of scientific historiography A main theme of the book is how historians in the non Western world not only adopted or adapted Western ideas but also explored different approaches rooted in their own cultures

**The Discipline of History and the History of Thought** M.C. Lemon,2002-06-01 Although much has been written of the nature of history and its disciplinary problems less attention has been paid to the history of thought M C Lemon's rigorously philosophical work first re asserts the discipline of history in general as narrative based

before pursuing the methodological implications for the history of thought This original work of scholarship will raise the level of argument in philosophy of history and provoke debate among historians philosophers and political theorists

**Faith, Reason, and Beyond Reason** Mark J. Boone, 2024-07-16 The relationship between faith and reason is multifaceted Faith transcends reason in that it is more than reason alone can contain or fully guarantee yet it is neither unreasonable nor something to which reason is irrelevant and reason says some pretty fine things about it This volume updates nine previously published articles on faith and reason by a Christian philosopher who has been studying these matters for two decades alongside one new essay and a philosophical dialogue These articles explain and integrate key ideas on faith and reason including Alvin Plantinga's account of how Christian belief can be knowledge even without evidence defenses of faith from Augustine and William James accounts of empirical evidence for faith from different world religions the distinction between faith and sight in the New Testament the structure of the evidence for the authority of the Bible the idea that faith transcends reason because some articles of faith are beyond human comprehension even if we have evidence that they are true and the nature of faith as a total commitment beyond what the evidence alone can guarantee Historical Roots of Cognitive Science Theo C. Meyering, 2012-12-06 Cognitive science in Howard Gardner's words has a relatively short history but a very long past While its short history has been the subject of quite a few studies published in recent years the current book focuses instead on its very long past It explores the emergence of the conceptual framework that was necessary to make the rise of modern cognitive science possible in the first place Over the long course of the history of the theory of perception and of cognition various conceptual breakthroughs can be discerned that have contributed significantly to the conception of the mind as a physical symbol system with intricate representational capacities and unimaginably rich computational resources In historical retrospect such conceptual transitions seemingly sudden and unannounced are typically foreshadowed in the course of enduring research programs that serve as slowly developing theoretical constraint structures gradually narrowing down the apparent solution space for the scientific problems at hand Ultimately the fundamental problem is either resolved to the satisfaction of the majority of researchers in the area of investigation or else and much more commonly one or more of the major theoretical constraints is abandoned or radically modified giving way to entirely new theoretical vistas In the history of the theory of perception this process can be witnessed at various important junctures **What Reason Promises** Wendy Doniger, Peter Galison, Susan Neiman, 2016-06-20 This collection demonstrates the range of approaches that some of the leading scholars of our day take to basic questions at the intersection of the natural and human worlds The essays focus on three interlocking categories Reason stakes a bigger territory than the enclosed yard of universal rules Nature expands over a far larger region than an eternal category of the natural And history refuses to be confined to claims of an unencumbered truth of how things happened Designing the City of Reason Ali Madanipour, 2007-04-11 With a practical approach to theory Designing the City of Reason offers new perspectives on how

differing belief systems and philosophical approaches impact on city design and development exploring how this has changed before during and after the impact of modernism in all its rationalism Looking at the connections between abstract ideas and material realities this book provides a social and historical account of ideas which have emerged out of the particular concerns and cultural contexts and which inform the ways we live By considering the changing foundations for belief and action and their impact on urban form it follows the history and development of city design in close conjunction with the growth of rationalist philosophy Building on these foundations it goes on to focus on the implications of this for urban development exploring how public infrastructures of meaning are constructed and articulated through the dimensions of time space meaning value and action With its wide ranging subject matter and distinctive blend of theory and practice this book furthers the scope and range of urban design by asking new questions about the cities we live in and the values and symbols which we assign to them

*The Routledge Companion to Historical Theory* Chiel van den Akker, 2021-11-15 This Companion provides a wide ranging and up to date overview of the conceptual issues that history as a discipline and mode of thought gives rise to The book offers both historical and systematic treatments of these issues as well as addressing their contemporary relevance Structured in three parts Modes and Schools of Historical Thought Epistemology and Metaphysics of History and Issues and Challenges in Historical Theory it offers the reader a wide scope and expert treatment of each topic in this vibrant field that can be read in any order An international team of experts both discuss the basis of their topic and present their own view offering the reader a cutting edge contribution while ensuring their chapters are of interest to both students and specialists in the field of historical theory and engaging with the very nature of historical thought the metaphysics of historical existence the politics of history writing and the intelligibility of the historical process The volume is an indispensable companion to the study of history and essential reading for anyone interested in the reflection on the nature of history and our historical existence
