Reason Awake Science For Man:

EPA-600/5 ,1974-02 **The Jobless Future** Stanley Aronowitz,1994 The Jobless Future challenges beliefs in the utopian promise of a knowledge based high technology economy Reviewing a vast body of encouraging literature about the postindustrial age Aronowitz and DiFazio conclude that neither theory history nor contemporary evidence warrants optimism about a technological economic order Instead they demonstrate the shift toward a massive displacement of employees at all levels and a large scale degradation of the labor force As they clearly chart a major change in the nature scope and amount of paid work the authors suggest that notions of justice and the good life based on full employment must change radically as well They close by proposing alternatives to our dying job culture that might help us sustain ourselves and our well being in a science and technology based economic future One alternative discussed is reducing the workday to fewer hours without reducing pay Water from Heaven Robert S. Kandel,2003 Covering a vast array of scientific fields and recent discoveries this book tracks a remarkable substance in its liquid solid and gaseous states as it cycles through the seas the atmosphere land icecaps and under the earth Robert Kandel describes what we humans are doing to the water cycle and the climate and explains where we are heading **The Anthropology of Complex Economic Systems** Niccolo Leo Caldararo,2013-11-14 Today we live in what Ulrich Beck has aptly characterized as a risk society shaped by intensifying crises outside of our control and seemingly outside of our comprehension The master narrative that was supposed to lead us to secular salvation economics has proved to be a large part of the problem rather than the much anticipated solution In The Anthropology of Complex Economic Systems Niccolo Caldararo offers a much more radical and challenging answer that the fundamental assumptions on which the modern science of economics has been erected are false and that it is through the medium of anthropology particularly the relatively neglected field of economic anthropology that an alternative and sound basis for both the understanding of economic behavior and for the shaping of economic futures can be constructed Caldararo not only challenges the foundational assumptions of conventional economic theory but situates economic behavior something quite different and universal amongst human beings in both a historical and an ecological context Contemporary discussions of sustainability especially in the field of development studies have oddly neglected to look to anthropology Economic anthropology is the repository of a vast store of wisdom both about actual alternative and workable economic systems and about their evolution By drawing on this source Caldararo builds a model of the evolution of human economies which stir up substantial debate shows how economic anthropology provides a tool for the interrogation of economic theory and ties economics to ecology It has been the rupture of this fundamental relationship that lies at the basis of much of our present crisis and the unsustainable economic patterns that humans have created By bringing together in a new configuration economic anthropology ecology and culture history Caldararo not only proposes a new model of human social evolution but equally importantly creates a methodology for speaking to and against our present economic and environmental situation

Glickman, Michael Gough, 2013-10-18 Developed for use as a reference work in graduate and undergraduate courses as well as for researchers policymakers and interested laypersons the book is a unique collection of authoritative yet accessible journal articles about risk Drawn from a variety of disciplines including the physical and social sciences engineering and law the articles deal with a wide range of public policy regulatory management energy and environmental issues The selections are accompanied by introductory notes questions for thought and discussion and suggestions for further reading

Case Study Methodology for Nursing Donna M. Zucker, 2024-07-11 This innovative text introduces and illustrates case study methodology for nursing research by exploring how it can be used to uncover the varied and complex life experiences of persons with chronic illness and post traumatic stress conditions Nursing practice demands care and compassion but often nurses do not have the tools to examine their clients health and wellness experiences This book presents an approach to finding shared solutions for common health problems from a nursing perspective It provides readers with the tools to develop their own case study approach and the skills to translate their findings into innovative ways to influence nursing care for people across their health illness trajectories Rather than a prescriptive approach to care it highlights the necessity of understanding what people are feeling thinking and doing to enhance health and improve quality of life This book is an essential read for nursing and qualitative health researchers It is also an important companion for clinicians and academics concerned with caring for people with chronic illness and post traumatic stress conditions **No**

Requiem for the Space Age Matthew D. Tribbe, 2014-06-06 During the summer of 1969 the summer Americans first walked on the moon musician and poet Patti Smith recalled strolling down the Coney Island Boardwalk to a refreshment stand where pictures of Jesus President Kennedy and the astronauts were taped to the wall behind the register Such was the zeitgeist in the year of the moon Yet this holy trinity of 1960s America would quickly fall apart Although Jesus and John F Kennedy remained iconic by the time the Apollo Program came to a premature end just three years later few Americans mourned its passing Why did support for the space program decrease so sharply by the early 1970s Rooted in profound scientific and technological leaps rational technocratic management and an ambitious view of the universe as a realm susceptible to human mastery the Apollo moon landings were the grandest manifestation of postwar American progress and seemed to prove that the United States could accomplish anything to which it committed its energies and resources To the great dismay of its many proponents however NASA found the ground shifting beneath its feet as a fierce wave of anti rationalism arose

throughout American society fostering a cultural environment in which growing numbers of Americans began to contest rather than embrace the rationalist values and vision of progress that Apollo embodied Shifting the conversation of Apollo from its Cold War origins to larger trends in American culture and society and probing an eclectic mix of voices from the era including intellectuals religious leaders rock musicians politicians and a variety of everyday Americans Matthew Tribbe paints an electrifying portrait of a nation in the midst of questioning the very values that had guided it through the postwar years as it began to develop new conceptions of progress that had little to do with blasting ever more men to the moon No Requiem for the Space Age offers a narrative of the 1960s and 1970s unlike any told before with the story of Apollo as the story of America itself in a time of dramatic cultural change **The Environmental Future** Nicholas Polunin,1972-06-18

Bulletin of the Atomic Scientists ,1971-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **The Information Society** Armand Mattelart,2003-04-03 The impact of the information society are multiform and transdisciplinary There are few areas of social political and economic life that have not been affected or challenged by the new technologies of information and communication In this short introduction Armand Mattelart unpacks the notion of the information society and examines why it has become the dominant paradigm for social change in the 21st Century Critically he also asks why the notion has come to dominant in the absence of any critical examination of the conditions under which it has been produced Combining a long term historical and geopolitical perspective Mattelart questions the axioms used to legitimate the Information Society and critically assesses the ways in which it has been conceptualised as a theoretical concept as well as policy making tool This introduction will be of interest to all students of media and communication as well as social scientists in general **Monthly Labor Review** ,1970 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews **Scientists and World Order** Ernst B.
