The Authority of Reason Jean E. Hampton, 1998-02-28 This challenging and provocative book argues against much contemporary orthodoxy in philosophy and the social sciences by showing why objectivity in the domain of ethics is really no different from the objectivity of scientific knowledge Many philosophers and social scientists have challenged the idea that we act for objectively authoritative reasons Jean Hampton takes up the challenge by undermining two central assumptions of this contemporary orthodoxy that one can understand instrumental reasons without appeal to objective authority and that the adoption of the scientific world view requires no such appeal In the course of the book Jean Hampton examines moral realism the general nature of reason and norms internalism and externalism instrumental reasoning and the expected utility model of practical reasoning The book is sure to prove to be a seminal work in the theory of rationality that will be read by a broad swathe of philosophers and social scientists

Making Moral Sense Logi Gunnarsson, 2000-09-18 Is it rational to be moral Can moral disputes be settled rationally Which criteria determine what we have a good reason to do In this innovative book Logi Gunnarsson takes issue with the assumption made by many philosophers faced with the problem of reconciling moral norms with a scientific world view namely that morality must be offered a non moral justification based on a formal concept of rationality He argues that the criteria for the rationality of an action are irreducibly substantive rather than purely formal and that assuming that morality must be given a non moral justification amounts to a distortion of both rationality and morality His discussion includes substantial critical engagement with major thinkers from two very different philosophical traditions and is notable for its clear and succinct account of Habermas discourse ethics It will appeal to anyone interested in practical reason and the rational credentials of morality

beneficial social order The second part considers how this system of social moral authority can be justified to all moral persons Drawing on the tools of game theory social choice theory experimental psychology and evolutionary theory Gaus shows how a free society can secure a moral equilibrium that is endorsed by all and how a just state respects and develops such an equilibrium

The Moral Skeptic Anita M. Superson, 2009-03-13 Anita Superson challenges the traditional picture of the skeptic who asks Why be moral While holding that the skeptic's position is important she builds an argument against it by understanding it more deeply and then shows what it would take to successfully defeat it Superson argues that we must defeat not only the action skeptic but the disposition skeptic who denies that being morally disposed is rationally required and the motive skeptic who believes that merely going through the motions in acting morally is rationally permissible We also have to address the amoralist who is not moved by moral reasons he recognizes Superson argues for expanding the skeptic's position from self interest to privilege to include morally unjustified behavior targeting disenfranchised social groups as well as revising the traditional expected utility model to exclude desires deformed by patriarchy as irrational Lastly she argues that the challenge can be answered if it can be shown that it is in an important way inconsistent and therefore irrational to privilege oneself over others The Moral Skeptic makes an important contribution to both metaethics moral theory and feminist philosophy and brings feminist thinking into the larger discussion of the skeptical challenge

The Happiness Philosophers Bart Schultz, 2017-04-24 A colorful history of utilitarianism told through the lives and ideas of Jeremy Bentham John Stuart Mill and its other founders In The Happiness Philosophers Bart Schultz tells the colorful story of the lives and legacies of the founders of utilitarianism one of the most influential yet misunderstood and maligned philosophies of the past two centuries Best known for arguing that it is the greatest happiness of the greatest number that is the measure of right and wrong utilitarianism was developed by the radical philosophers critics and social reformers William Godwin the husband of Mary Wollstonecraft and father of Mary Shelley Jeremy Bentham John Stuart and Harriet Taylor Mill and Henry Sidgwick Together they had a profound influence on nineteenth century reforms in areas ranging from law politics and economics to morals education and women's rights Their work transformed life in ways we take for granted today Bentham even advocated the decriminalization of same sex acts decades before the cause was taken up by other activists As Bertrand Russell wrote about Bentham in the late 1920s There can be no doubt that nine tenths of the people living in England in the latter part of last century were happier than they would have been if he had never lived Yet in part because of its misleading name and the caricatures popularized by figures as varied as Dickens Marx and Foucault utilitarianism is sometimes still dismissed as cold calculating inhuman and simplistic By revealing the fascinating human sides of the remarkable pioneers of utilitarianism The Happiness Philosophers provides a richer understanding and appreciation of their philosophical and

political perspectives one that also helps explain why utilitarianism is experiencing a renaissance today and is again being used to tackle some of the world's most serious problems
