Reason Vs Emotion Current Perspectives In Society And Culture:

Reason Vs. Emotion Salvador Fernando Rodriguez,1998 Cultural Variations in Psychopathology Sven Barnow,Nazli Balkir,2012-01-01 Improving mental health care through culturally sensitive research and practice Culturally sensitive practice is a vital component of effective mental health care in our increasingly diverse societies Mental illnesses vary in prevalence between cultural and ethnic groups as do the meanings attached to them and people s responses to them The important implications of this interplay between culture and psychopathology for diagnosis and treatment are scrutinized and elucidated in this comprehensive and well organized book which uniquely looks at a range of practical examples involving various ethnic minority populations in North America and Europe Leading experts from around the world have integrated divergent topics into a systematic and clinically relevant volume *Cultural Variations in Psychopathology From Research to Practice* is an important resource for researchers and in particular for any mental health professional who works with ethnically diverse communities **Current Perspectives on Substance Use Disorders in South Asia** S. M. Yasir Arafat,Sujita Kumar Kar,2024-11-25 This book is about public mental health needs and aspects of substance use disorders in South Asian countries South Asia consists of eight countries with low and middle income backgrounds The people of this region with a combined population of around 2 billion share common cultures beliefs and behavioral patterns regarding physical and mental health Among them more than 66 million people use different forms of substances including cannabis opium and opiates amphetamine and prescription drugs Substance abuse brings deadly consequences It affects almost all spheres of life i e personal social recreational criminal and family aspects both physical and mental health and economy of the society as well as the country Advanced management and holistic prevention are public health priorities However very little attention has been paid to the issues as a region as well as in countries like Afghanistan Bangladesh and Pakistan Hence the editors of this book aimed to publish a book that discusses the public mental health and healthcare issues related to substance use disorder in a densely populated low and middle income setting The Role of Culture in Human Thinking and Reasoning Hiroshi Yama,Niall Galbraith,Jean Baratgin,Hirofumi Hashimoto,2022-11-01 A Cultural Approach to Emotional Disorders E. Deidre Pribram,2016-01-13 In her latest contribution to the growing field of emotion studies Deidre Pribram makes a compelling argument for why culturalist approaches to the study of emotional disorders continue to be eschewed even as the sociocultural and historical study of mental illness flourishes The author ties this phenomenon to a tension between two fundamentally different approaches to emotion an individualist approach which regards emotions as the property of the individual whether biologically or psychologically and a culturalist approach which regards emotions as collective social processes with distinctive histories and meanings that work to produce particularized subjects While she links a strong preference for the individualist construct in Western culture to the rise of the psychological and psychiatric disciplines at the turn of the twentieth century Pribram also engages with a diverse set of case studies tied to psychological

and aesthetic discourses on emotions These range from Van Gogh's status as emotionally disordered to the public emotional aesthetics of 19th century melodrama to the diagnostic categories of the DSMs and the fear of globalizing emotional disorders in the 21st century This genuinely interdisciplinary approach makes for a text with potential application in a wide range of disciplines within cultural studies including sociocultural and historical analysis of psychiatry and psychology gender theory subject and identity theory popular culture studies and history and theory of the arts **Globalized**

Knowledge Flows and Chinese Social Theory Xiaoying Qi, 2014-01-21 This book considers the nature and possibilities of conceptual change and transformation under conditions of globalization especially with regard to Chinese social and cultural concepts It argues that the influence of globalization promotes the spread of West European and American social science concepts and methods at the expense of local concepts and approaches and at the same time paradoxically provides opportunities for the incorporation of local concepts including Chinese concepts into Western or mainstream social science

Emotions in Social Life Gillian Bendelow, Simon J Williams, 2002-09-11 The development of a sociology of emotions is crucial to our understanding of social life as they hold the key to our understanding of social processes and sociological investigation First published in 1997 *Emotions in Social Life* consolidates the sociology of emotions as a legitimate and viable field of enquiry It provides a comprehensive assessment of the sociology of emotions using work from scholars of international stature as well as newer writers in the field It presents new empirical research in conjunction with innovative and challenging theoretical material and will be essential reading for students of sociology health psychology anthropology and gender studies **Mixed Emotions** Kay Milton, Marushka Svasek, 2020-08-28 Emotions are of increasing interest in all the human sciences In the past two decades a growing number of anthropologists have explored emotional dynamics in a variety of geographic and cultural settings and have developed various at times conflicting theories of emotion This book fills a major gap by providing a concise introduction to the anthropology of emotions that outlines some of the major themes and controversies Drawing on fieldwork undertaken in Europe Japan and Melanesia the authors explore how consciousness memory identity and politics are intimately related to emotional processes A broad range of case studies covers such topics as how fear is managed in Belfast how Spanish gypsies grieve and why Japanese tourists are drawn to monkey parks This book will be of interest to anyone seeking to understand the formative impact emotions have on culture and society in an increasingly globalized world

The Nature of Emotion Andrew S. Fox, Regina C. Lapate, Alexander J. Shackman, Richard J. Davidson, 2018-08-23 Building on the legacy of the groundbreaking first edition the Editors of this unique volume have selected more than 100 leading emotion researchers from around the world and asked them to address 14 fundamental questions about the nature and origins of emotion For example What is an emotion How are emotions organized in the brain How do emotion and cognition interact How are emotions embodied in the social world How and why are emotions communicated How are emotions physically embodied What develops in emotional development At the end of each chapter

the Editors Andrew Fox Regina Lapate Alexander Shackman and Richard Davidson highlight key areas of agreement and disagreement In the final chapter The Nature of Emotion A Research Agenda for the 21st Century the Editors outline their own perspective on the most important challenges facing the field today and the most fruitful avenues for future research Not a textbook offering a single viewpoint The Nature of Emotion reveals the central issues in emotion research and theory in the words of many of the leading scientists working in the field today from senior researchers to rising stars providing a unique and highly accessible guide for students researchers and clinicians *The Role of Experience in Children's Language Development: A Cultural Perspective* Priya Shimpi, Eliana Colunga, He Sun, Douglas Sperry, Lulu Song, 2022-12-02

Teaching with Emotion Michalinos Zembylas, 2006-04-01 The purpose of this book is to provide new theoretical methodological and empirical directions in research on teacher emotion An attempt is made to encourage a missing conversation in the area of emotions in teaching by invoking a discussion of ideas that explore how discursive political and cultural aspects define the experience of teacher emotion I begin to build an analysis upon which the role of emotion emotional rules and emotional labor in curriculum and teaching might be investigated This book includes both conceptual chapters and chapters based on empirical work and in particular a three year ethnographic study with an early childhood teacher in the context of science teaching that together illustrate new approaches and perspectives in researching and theorizing about emotion in teaching Essentially then there are two overlapping aims in this book First to critically examine some of the contemporary ways in which emotions have been conceptualized and understood in teaching and second to explore the role of emotion in teaching through different methodologies and theorizations Brain-Based Therapy with

Children and Adolescents John B. Arden, Lloyd Linford, 2008-11-17 Designed for mental health professionals treating children and adolescents Brain Based Therapy with Children and Adolescents Evidence Based Treatment for Everyday Practice is a simple but powerful primer for understanding and successfully implementing the most critical elements of neuroscience into an evidence based mental health practice Written for counselors social workers psychologists and graduate students this new treatment approach focuses on the most common disorders facing children and adolescents taking into account the uniqueness of each client while preserving the requirements of standardized care under evidence based practice *Twelve Infallible Men* Matthew Pierce, 2016-06-13 In the tenth century Shi a scholars assembled accounts of twelve imams lives portraying them as miracle workers who were betrayed These biographies invoked shared cultural memories shaped communal responses and ritual practices of mourning and inspired Shi a identity and religious imagination for centuries to come Matthew Pierce shows Cultural Consultation Laurence J. Kirmayer, Jaswant Guzder, Cécile Rousseau, 2013-08-15 Based on a recently completed project of cultural consultation in Montreal Cultural Consultation presents a model of multicultural and applicable health care This model used clinicians and consultants to provide in depth assessment treatment planning and limited interventions in consultation with frontline primary care and mental health practitioners working with immigrants refugees and members of indigenous and ethnocultural communities Evaluation of the service has demonstrated that focused interventions by consultants familiar with patients cultural backgrounds could improve the relationship between the patient and the primary clinician This volume presents models for intercultural work in psychiatry and psychology in primary care general hospital and specialty mental health settings The editors highlight crucial topics such as Discussing the social context of intercultural mental health care conceptual models of the role of culture in psychopathology and healing and the development of a cultural consultation service and a specialized cultural psychiatric service Examining the process of intercultural work more closely with particular emphasis oto strategies of consultation the identity of the clinician the ways in which gender and culture position the clinician and interaction of the consultant with family systems and larger institutions Highlighting special situations that may place specific demands on the clinician working with refugees and survivors of torture or political violence with separated families and with patients with psychotic episodes This book is of valuable use to mental health practitioners who are working in multidisciplinary settings who seek to understand cultural difference in complex cases Psychiatrists psychologists social workers nurse practitioners primary care providers and trainees in these disciplines will make thorough use of the material covered in this text **Intimate Relationships** Ralph Erber, Maureen Erber, 2016-01-08 Intimate Relationships covers both classic and current material in a concise yet thorough and rigorous manner Chapters range from attraction to love attachment to jealousy conflict to relationship dissolution all written in a warm personal and engaging voice Each chapter is organized around the major issues and relevant theories in addition to a critical evaluation about the research When appropriate the authors discuss and evaluate popular ideas about

relationship processes in the context of scientific research This includes critical evaluations of evolutionary approaches to attraction victim based accounts of abuse and the separate cultures view of the sexes

Routledge Handbook of Social and Cultural Theory Anthony Elliott, 2013-12-04 If today students of social theory read Jurgen Habermas Michel Foucault and Anthony Giddens then proper regard to the question of culture means that they should also read Raymond Williams Stuart Hall and Slavoj Zizek The Routledge Handbook of Social and Cultural Theory offers a concise comprehensive overview of the convergences and divergences of social and cultural theory and in so doing offers a novel agenda for social and cultural research in the twenty first century This Handbook edited by Anthony Elliott develops a powerful argument for bringing together social and cultural theory more systematically than ever before Key social and cultural theories ranging from classical approaches to postmodern psychoanalytic and post feminist approaches are drawn together and critically appraised There are substantive chapters looking at among others structuralism and post structuralism critical theory network analysis feminist cultural thought cultural theory and cultural sociology Throughout the Handbook there is a strong emphasis on interdisciplinarity with chapters drawing from research in sociology cultural studies psychology politics anthropology women s studies literature and history Written in a clear and direct style this Handbook will appeal to a wide undergraduate and postgraduate audience across the social sciences and humanities

Cognitive Processes in Individual and Collective Creativity: A Cross-Cultural Perspective Chang Liu, Linden John Ball, Haiying Long, Wangbing Shen, 2019-12-30 Creativity the highest level of human wisdom has become an increasingly important concept in different fields of psychological enquiry particularly because it is portrayed as contributing to many aspects of society including personal development economic prosperity and technological advancement However although considerable research attention from a wide range of disciplinary backgrounds has focused on trying to understand creativity the specific nature of creativity its theoretical underpinnings and cognitive mechanisms remain unclear not least when it comes to the understanding of creativity at the individual level and creativity at the collective level On the one hand there are crucial distinctions between individual and collective creativity On the other hand the process of being creative involves not only independent or individual efforts but also interdependent or collective efforts Understanding these differences and interrelationships is crucially important in studies of creativity In this Research Topic we bring together research from a wide variety of cognitive and psychological approaches and perspectives in order to provide a comprehensive and in depth understanding of creativity at both the individual and collective levels Furthermore cognitive mechanisms in the creativity process are unavoidably affected by sociocultural factors and these mechanisms look different across cultures particularly between Eastern cultures and Western cultures two worlds that often imply dramatically dissimilar values and perspectives Despite the fact that many studies have compared and contrasted these two cultures in various respects little research has focused on the specific topic of cultural variation in creative cognition In addition very few studies have examined the

differences in the cognitive mechanisms underpinning the cultural variations that can be observed at a surface level This Research Topic aims to fill this gap in the literature and examine the cognitive processes and mechanisms in the creativity process at both individual and collective levels across different cultures by using theoretical and empirical evidence
