101 Reasons to Be Episcopalian, 2003 These 101 thoughtful, poignant and sometimes humorous responses not only entertain but also teach about the Church's gifts. From the beauty of its prayer and liturgy to its inclusiveness and its reliance on Scripture, tradition and reason in balance with one another, there is much to celebrate in the Anglican Episcopal tradition

God and the History of the Universe Jarvis Streeter, 2016-03-22 The popular belief that a scientific understanding of reality is incompatible with a Christian one is simply wrong. Some Christian understandings of reality do conflict with some scientific understandings. But a thoroughly rational Christian understanding of the origin and history of the universe will be informed by the best scientific theories and the facts founded on them. This book weaves a narrative of the origin and history of the universe from the perspective of contemporary science with a Christian understanding of God and of God's role in the origin and history of the universe. At the center of this integrated narrative is the view that God, who is pure unbounded Love, is Creator; the zest for life in the universe comes from God, and God is the source of Truth, Beauty and Goodness in the universe. God is amazed and delighted at what God and the world have created. God is saddened by ways creatures have fallen short of pure unbounded Love, Truth, Beauty and Goodness, and God's pure unbounded Love keeps on trying to persuade all creatures toward Truth, Beauty and Goodness

New Phenomenological Studies in Japan Nicolas de Warren, Shigeru Taguchi, 2019-05-18 The development of phenomenological philosophy in Japan is a well-established tradition that reaches back to the early 20th century. The past decades have witnessed significant contributions and advances in different areas of phenomenological thought in Japan that remain unknown or only partially known to an international philosophical public. This volume offers a selection of original phenomenological research in Japan to an international audience in the form of an English language publication. The contributions in this volume range over classical figures in the phenomenological movement: Husserl, Heidegger, Levinas, Merleau-Monty, recent trends in French phenomenology and contemporary interdisciplinary approaches. In addition to this diverse engagement with European thinkers, many of the contributions in this volume establish critical and complimentary discussions with 20th-century Japanese philosophers

Educating Oneself in Public Michael S. Moore, 2000 The eleven essays in *Educating Oneself in Public* constitute an education in the Anglo-American jurisprudence of the second half of the twentieth century. The book examines both the thought of major figures such as H. L. A. Hart, Joseph Raz, Ronald Dworkin, Lon Fuller and Richard Rorty and the general themes of major

movements such as legal realism post modernism and pragmatism Despite this focus on the thoughts of others the book is not a survey but is a critical probing of particular ideas often attributed to such figures Detailed depth of understanding is sought about Hart s conception of a general jurisprudence that describes law in general Dworkin s conception of an internal jurisprudence that interprets the concept of law of our legal culture Fuller s ideal of a functional jurisprudence that seeks the essence of law in the values it serves the place of rules in legal and moral reasoning Raz s idea that laws give exclusionary reasons to legal actors subject to such laws how judges should reason according to the legal realists whether there are right answers to all disputed law cases whether behind the obvious law of legal rules there can exist an unobvious law of legal principles Finnis s conception of the common good as the function law uniquely serves in what sense law practice and legal theory are interpretive activities whether all knowledge or some discrete realm of knowledge is peculiarly interpretive in character Michael Moore s views on each of these topics are detailed and original even if the springboards for each discussion are the writings of those who introduced such topics into modern discussions The introductory chapter includes responses by many of the figures examined in the other essays together with the author s rejoinders

Essays in Honor of John Dewey, on the Occasion of His Seventieth Birthday, October 20, 1929 John Dewey, 1929 *The Naturalistic Fallacy* Neil Sinclair, 2019 Presents a definitive guide to the text history and philosophy behind the most influential argument in the history of ethics

Epistemic Authority Linda Trinkaus Zagzebski, 2012-11-29 Gives an extended argument for epistemic authority from the implications of reflective self consciousness Epistemic authority is compatible with autonomy but epistemic self reliance is incoherent The book argues that epistemic and emotional self trust are rational and inescapable that consistent self trust commits us to trust in others and that among those we are committed to trusting are some whom we ought to treat as epistemic authorities modelled on the well known principles of authority of Joseph Raz Some of these authorities can be in the moral and religious domains The book investigates the way the problem of disagreement between communities or between the self and others is a conflict within self trust and argue against communal self reliance on the same grounds as the book uses in arguing against individual self reliance The book explains how any change in belief is justified by the conscientious judgment that the change will survive future conscientious self reflection The book concludes with an account of autonomy Publisher s description

From Clinic to Classroom Howard Radest, 2000-03-30 The current development of biomedical ethics is a source of radical critique not only in the clinic but also in the classroom This volume argues that today s moral education is too abstract to be effective and would benefit from the adoption of the practical approach which is typical of biomedical ethics thinking with cases In presenting this approach Radest explores various issues of moral epistemology and advocates the urgency of realism and decision in ethics The use of a rich and complex literature drawn from biomedical ethics pedagogy and philosophy serves to stimulate the reader to think through the moral complexity and ambivalence of

modern experience Hearings United States. Congress. Senate. Committee on Labor and Public Welfare,1970 **Satan and the Problem of Evil** Gregory A. Boyd,2025-08-04 Where does evil come from If there is a sovereign creator God as Christian faith holds is this God ultimately responsible for evil Does God s sovereignty mean that God causes each instance of sin and suffering How do Satan his demons and hell fit into God s providential oversight of all creation and history How does God interact with human intention and action If people act freely does God know in particular every human decision before the choice is made In this important book Gregory A Boyd mounts a thorough response to these ages old questions which remain both crucial and contentious both practical and complex In this work Boyd defends his scripturally grounded trinitarian warfare theodicy presented in *God at War* with rigorous philosophical reflection and insights from human experience and scientific discovery Critiquing the classical Calvinist solution to the problem of evil he advocates an alternative understanding of the sovereignty of the trinitarian God and of the reality of Satan that sheds light on our fallen human condition While all may not agree with Boyd s conclusions *Satan and the Problem of Evil* promises to advance the church s discussion of these critical issues The Myth of the Closed Mind Ray Scott Percival,2011-12-15 It s like talking to a brick wall and We ll have to agree to disagree are popular sayings referring to the frustrating experience of discussing issues with people who seem to be beyond the reach of argument It s often claimed that some people fundamentalists or fanatics are indeed sealed off from rational criticism And every month new pop psychology books appear describing the dumb ways ordinary people make decisions as revealed by psychological experiments The conclusion is that all or most people are fundamentally irrational Ray Scott Percival sets out to demolish the whole notion of the closed mind and of human irrationality There is a difference between making mistakes and being irrational Though humans are prone to mistakes they remain rational In fact making mistakes is a sign of rationality a totally non rational entity could not make a mistake Rationality does not mean absence of error it means the possibility of correcting error in the light of criticism In this sense all human beliefs are rational they are all vulnerable to being abandoned when shown to be faulty Percival agrees that people cling stubbornly to their beliefs but he maintains that not being too ready to abandon one s beliefs is rational *The Laws of Emotion* Nico H. Frijda,2017-09-25 *The Laws of Emotion* is an accessible work that reviews much of the insightful new research on emotions conducted over the last ten years It expands on the theory of emotions introduced in Nico Frijda s earlier work and addresses a number of unanswered basic problems on emotion theory The author s goal is to better understand the underlying psychological mechanisms of emotion In this book Professor Frijda also examines previously neglected topics of emotion such as determinants of emotional intensity the duration of emotions and sexual emotions It touches on both evolutionary and neuroscientific explanations The book begins by reviewing a number of principles governing emotion or the laws of emotion The author then examines the passionate nature of emotions and the motivational processes underlying them and the nature and causes of pleasure and pain Professor Frijda then explores the processes that

lead to emotional arousal including cognitive influences and why people care more about certain things than others Emotional intensity is then discussed including the often neglected topic of the course of emotions over time The book concludes with the author s insights into complex emotional domains such as sex revenge and the need to commemorate past events The Laws of Emotion will appeal to social cognitive and developmental psychologists social scientists philosophers and neuroscientists as well as anyone interested in the workings of the mind It also serves as a text for advanced courses in the psychology of emotions or the neuroscience of emotions *Social Reconstruction Learning* Jennifer Bleazby,2013-01-04 This volume argues that educational problems have their basis in an ideology of binary opposites often referred to as dualism which is deeply embedded in all aspects of Western society and philosophy and that it is partly because mainstream schooling incorporates dualism that it is unable to facilitate the thinking skills dispositions and understandings necessary for autonomy democratic citizenship and leading a meaningful life Drawing on the philosophy of John Dewey feminist pragmatism Matthew Lipman s Philosophy for Children program and the service learning movement Bleazby proposes an approach to schooling termed social reconstruction learning in which students engage in philosophical inquiries with members of their community in order to reconstruct real social problems arguing that this pedagogy can better facilitate independent thinking imaginativeness emotional intelligence autonomy and active citizenship *Chance and Intent* David L. Bodde,Caron H. St. John,2012-01-27 A compact and readable book will help executives entrepreneurs and venture investors learn to search out and plan for those enterprise hazards that reside outside the bell curve the conventional domain of risk Uncertainty where outcomes can be characterized in advance reliable estimates cannot be made for the likelihood that they will occur Ambiguity where the events and outcomes cannot be well characterized in some cases because we cannot imagine them and in others because characterization depends upon the institutional interests or cultural values of the observer and Ignorance where neither likelihood estimates nor well characterized events enjoy much credibility This edited volume emphasizes practical strategies for understanding and managing the hazards of the new venture in light of recent research It will help corporate innovators entrepreneurs and investors employ a wider spectrum of risk management strategies than is now possible **Nonathletic Extracurriculum Activities** William Claude Reavis,George Enoch Van Dyke,1933
