Sociétés maritimes, droits et institutions des pêches en Méditerranée occidentale Food and Agriculture Organization of the United Nations, 2001-01-01 Depuis des temps immémoriaux la Méditerranée est riche d'expériences d'aménagement basées sur des droits collectifs et des systèmes d'centralisation

discipline professionnelle Ce document aborde les politiques de gestion des pêches en Méditerranée au regard des nouveaux objectifs de durabilité et de gouvernance L'accent est mis sur la décentralisation de l'action publique et la réforme des mécanismes institutionnels

Effects of Riverine Inputs on Coastal Ecosystems and Fisheries Resources, 1995-01-01 Five chapters are presented which address a number of aspects of riverine and runoff effects on coastal marine systems Examples are presented and documented in which the apparent effects of runoff related nutrient enrichment and consequent eutrophication have been important Various other aspects such as sedimentation etc are explored The purpose is to advance the scientific policy and political dialogue on issues related to utilization and protection of coastal marine ecosystems The Marine Catchment Basin or MCB appears to be the logical scale of policy and management interest wherever terrestrial runoff has substantial impacts on a marine system The MCB expands the marine ecosystem concept to include not only the marine aquatic system but also the adjacent land areas that drain into it The MCB concept has been identified primarily with semi enclosed seas where effects have been particularly dramatic and where the catchment basin retains an easily visualized geological context However even along open ocean coasts hydrodynamic processes act to retain coherent masses of water together with their contained organisms and materials against the coast Thus open coastal areas may exhibit MCB features similar to those of enclosed or semi enclosed basins
