The Political Economy of Organ Transplantation Hagai Boas, 2022-09-09 This thought provoking work examines how the relationships of organs tissues and cells transferred from one body to another through donation sale or gift are mediated by the state market and family The book is a thorough review of the sociological anthropological and ethical literature surrounding transplant organs but encased within the author's own personal dilemmas and lived experience His work skillfully underscores the negotiations and accommodations inherent in the use of these technologies and reveals the situatedness of decisions that belie any simplistic readings of the ethics of transplantations This is a stimulating and accessible book for those with an interest in transplantation ethics or the social implications of medical technologies Its strength lies in the reflexive accounts from the author of his own experience juxtaposed with the sensitive appraisals of the workings of the state market and family in the organ economy Andrea Whittaker Monash University reviewed for Social Forces This innovative work combines a rigorous academic analysis of the political economy of organ supply for transplantation with autobiographical narratives that illuminate the complex experience of being an organ recipient Organs for transplantations come from two sources living or post mortem organ donations These sources set different routes of movement from one body to another Postmortem organ donations are mainly sourced and allocated by state agencies while living organ donations are the result of informal relations between donor and recipient Each route traverses different social institutions determines discrete interaction between donor and recipient and is charged with moral meanings that can be competing and contrasting The political economy of organs for transplants is the gamut of these routes and their interconnections and this book suggests how such a political economy looks like what are its features and contours its negotiation of the roles of the state market and the family in procuring organs for transplantations and its ultimate moral justifications Drawing on Boas personal experiences of waiting searching and obtaining organs each autobiographical section of the book sheds light on a different aspect of the discussed political economy of organs post mortem donations parental donation and organ market and illustrates the experience of living with the fear of rejection and the intimidation of chronic shortage A Political Economy of Organ Transplantation is of interest to students and academics with an interest in bioethics sociology of health and illness medical anthropology and science and technology studies

This edited book addresses ways in which bodies conceived broadly get language and ways in which ideas of normalcy and normal bodies are held in place and reproduced. The articles show how it is through this medium that people with ailments or unusual bodies get positioned and slotted in certain ways. The present volume represents a departure from other works in at least two ways. First it brings in discourses around bodies per se into language related research, a realm that previous research has not directly engaged. Second it ushers in discussions about bodies by critically addressing the language by which experiences around bodily breakdowns and ailments occur. Calling attention to a host of discourses, biomedical, societal, poststructuralist, and drawing on a variety of disciplinary perspectives, critical theories, ethnographically gathered materials, and extant data, the chapters pierce the general veil of silence that we have collectively drawn regarding how some of our most intimate body disfunctions impact our everyday living and sense of normalcy.
