Rebuilding Societies After Civil War Critical Roles For International Assistance:

Rebuilding Societies After Civil War Krishna Kumar,2023 The authors seek to identify ways in which international aid to war torn societies can best promote political stability and economic growth [Guerrilla Veterans in Post-war Zimbabwe](#) Norma J. Kriger,2003-05-29 Zimbabwe's guerrilla veterans have burst into the international media as the storm troopers in Mugabe's new war of economic liberation In this book Norma Kriger gives the unfolding contemporary drama a historical background and shows continuities between the present and past Between 1980 and 1987 guerrilla veterans and the ruling party colluded with and manipulated each other to build power and privilege in the army police bureaucracy and among workers Both relied chiefly on violence and appeals to their participation in the anti colonial liberation war as they sought to vanquish their then political opponents Today violence and a liberation war discourse continue to be salient as Mugabe's party and its guerrilla veterans struggle to maintain power through land invasions and purges of a new political opposition This study gives a critical review of guerrilla programs and the war to peace transitions literatures thus changing the way we view post conflict societies

Explaining Post-Conflict Reconstruction Desha Girod,2015-02-02 The international community has donated nearly one trillion dollars during the last four decades to reconstruct post conflict countries and prevent the outbreak of more civil war Yet reconstruction has eluded many of these countries and 1.9 million people have been killed in reignited conflict Where did the money go This book documents how some leaders do bring about remarkable reconstruction of their countries using foreign aid but many other post conflict leaders fail to do so Offering a global argument that is the first of its kind Desha Girod explains that post conflict leaders are more likely to invest aid in reconstruction when they are desperate for income and thus depend on aid that comes with reconstruction strings attached Leaders are desperate for income when they lack access to rents from natural resources or to aid from donors with strategic interests in the country Using data on civil wars that ended between 1970 and 2009 and evidence both from countries that succeeded and from countries that failed at post conflict reconstruction Girod carefully examines the argument from different perspectives and finds support for it The findings are important for theory and policy because they explain why only some leaders have the political will to meet donor goals in the wake of civil war The findings also shed light on state building processes and on the political economy of postconflict countries Paradoxically donors are most likely to achieve reconstruction goals in countries where they have the least at stake

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace

in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it Conflict, Security and Development Paul Jackson,Danielle Beswick,2014-11-07 This textbook draws on academic theory field research and policy developments to provide an overview of the connections between security and development before during and after conflict This 2nd edition is revised and updated to take account of changes that have occurred in both policy and academic arenas which are relevant to students and practitioners in this area In an interdependent world it is often argued that the challenges of underdevelopment and insecurity have global implications This textbook charts an accessible course through these complex debates providing a comprehensive introduction for those encountering these issues for the first time The main aims of the revised edition are to set out how thinking on conflict security and development has changed over time and continues to evolve to explore the consequences of these changes particularly for the theory and practice of development and security promotion to introduce a range of case studies from across the globe in order to explore the implications of a combined approach to security and development The authors are experienced in both the theory and the practice of this field and illustrate the links between conflict security and development with practical examples drawing on key case studies from the past twenty years Each chapter is informed by student pedagogy and the book will be essential reading for all students of development studies war and conflict studies and human security and is recommended for students of international security and IR in general The Responsibility to Protect International Commission on Intervention and State Sovereignty,International Development Research Centre (Canada),2001 Responsibility to Protect Research bibliography background Supplementary volume to the Report of the International Commission on Intervention and State Sovereignty **Advances in Military Sociology** Giuseppe Caforio,2009-12-01 A selection of the papers presented at RC01 s international conference in Seoul July 2008 It offers an overview of the panorama of social studies on armed forces and conflict resolution in a context of fast moving change It presents studies that move beyond the very concept of globalization **Conflict, Security and Development** Danielle Beswick,Paul Jackson,2013-06-17 This textbook draws on academic theory field research and policy developments to provide an overview of the connections between security and development before during and after conflict

democracy Studies in Foreign Policy Warlord Democrats in Africa Anders Themnér, 2017-04-15 Post war democratization has been identified as a crucial mechanism to build peace in war ridden societies supposedly allowing belligerents to compete through ballots rather than bullets A byproduct of this process however is that military leaders often become an integral part of the new democratic system using resources and networks generated from the previous war to dominate the emerging political landscape The crucial and thus far overlooked question to be addressed therefore is what effect the inclusion of ex militaries into electoral politics has on post war security Can warlord democrats make a positive contribution by shepherding their wartime constituencies to support the building of peace and democracy or are they likely to use their electoral platforms to sponsor political violence and keep war affected communities mobilized through aggressive discourses This important volume containing a wealth of fresh empirical detail and theoretical insight and focussing on some of Africa s most high profile political figures from Paul Kagame to Riek Machar to Afonso Dhlakama represents a crucial intervention in the literature of post war democratization
