

Gardeners work with an ever-receding ideal of perfection; no sooner is something growing well than they see how to place it better or give it a better neighbor. To other's eyes, all may look as well as could be expected, but a good gardener's eye sees more to be improved.

Receding Ideal

Edmond Holmes

Receding Ideal:

The Epistemology of Statistical Science Mauritz Van Aarde,2009-12-01 Whilst this is a book about higher education there are important lessons for schooling On the one hand the book is a powerful demonstration of the potential of DST for enhancing learning in schools particularly in schools serving the poor and marginalised On the other hand improving teaching and learning in higher education through the creative use of technology is essential to overcome the learning challenges of those entering tertiary level institutions **The Nemesis of Docility** Edmond Holmes,1916 **Education as**

Growth Lewis Henry Jones,1911 **The Very Late Goethe** Charlotte Lee,2017-07-05 Goethe s career was an unusually long and productive one he became a literary celebrity in the 1770s and remained so until his death in 1832 The distinguishing feature of his last works is their self consciousness their preoccupation both with the business of writing and with personal development In the first cross genre study of this period of Goethe s work Charlotte Lee traces the theme in his last major poems and autobiographical writings before turning to the two giants Wilhelm Meisters Wanderjahre and Faust II All these works share a tendency to allude subtly to earlier moments from Goethe s own literary output but to fashion them into writing which is quite new even though or perhaps because he himself is old This book seeks to understand the unique perspective of one nearing the end of a long life **Tradition and Authenticity in the Search for Ecumenic Wisdom**

Thomas Langan,1992 Br Tradition and Authenticity in the Search for Ecumenic Wisdom by Langan Thomas Terms of use Our emerging world system is bringing the great traditions and cultures it has spawned into ever more intimate and dangerous contact Langan argues that we must struggle toward a unity of discourse respectful of genuine experiences of varying civilizations if we are to live peacefully on one planet Descriptive content provided by Syndetics a Bowker service

Fashion Cultures Stella Bruzzi,Pamela Church Gibson,2013-10-18 From the catwalk to the shopping mall from the big screen to the art museum fashion plays an increasingly central role in contemporary culture Fashion Cultures investigates why we are so fascinated by fashion and the associated spheres of photography magazines and television and shopping Fashion Cultures re addresses the fashionable image considering the work of designers from Paul Smith to Alexander McQueen and Hussein Chalayan investigates the radicalism of fashion photography from William Klein to Corinne Day considers fashion for the unfashionable body the old and the big football and fashion and geographies of style explores the relationship between fashion and the moving image in discussions of female cinema icons from Grace Kelly to Gwyneth Paltrow and iconic male images from Cary Grant to Malcolm X and Mr Darcy that have redefined notions of masculinity and cool makes a significant intervention into contemporary gender politics and theory exploring themes such as spectacle masquerade and the struggle between fashion and feminism *Culture and Enlightenment* Paul Crittenden,2017-11-22 This title was first published in 2002 Culture and Enlightenment are the two words that best characterise the essence of Gyrgy Markus s career in whose honour this book is published Markus devoted the last twenty years of research towards a theory

of cultural objectifications and their pragmatics and the great depth of his knowledge of the history of culture and philosophy informs all his teaching and writing The pursuit of Enlightenment ideals attains reflective self consciousness in Markus works forged in the knowledge of its own historicity of the embeddedness of rationalities in culture and in an awareness of the paradoxes that cling to the conscious affirmation of ideals which are no longer self evident or beyond questioning In taking up the challenge of these paradoxes Markus spans the whole history of modern philosophy and culture with a matchless authority This book draws together contributions from leading figures in contemporary philosophy who are also friends colleagues and former students of Gy rgy Markus The book is divided into two sections the first presents critical assessments of various aspects of Markus wide ranging works the second presents contributions in celebration of his influence and his wide interests In their critical assessment of Markus work and in the demonstration of his influence the contributors hope to convey something of the breadth and something of the excitement of doing philosophy in the company of Gy rgy Markus

Racial Conditions Howard Winant, *Light* ,1918 *The Ohio Educational Monthly* ,1921 *A Political Companion to Marilynne Robinson* Shannon L. Mariotti, Joseph H. Lane Jr., 2016-11-08 Marilynne Robinson is arguably one of the most important writers of our time Her voice resonates across the richly imagined American landscapes within which she grounds her stories of love and loss alienation and belonging injustice and redemption Robinson s award winning body of work including *Gilead* winner of the 2005 Pulitzer Prize for Fiction and the National Book Critics Circle Award Home winner of the Orange Prize and the Los Angeles Times Book Prize and *Lila* winner of the National Book Critics Circle Award has cultivated admiration all over the world offering readers new and profound interpretations of the meanings of transience presence convention and resistance In *A Political Companion to Marilynne Robinson* Shannon L. Mariotti and Joseph H. Lane Jr. assemble both rising and established political theorists to explore the juxtaposition of Robinson s nonfiction works and her novels and to examine their connections to contemporary political issues The collection analyzes Robinson s writings on American democracy community and freedom and it includes an engrossing interview with the author specifically conducted for this volume From an exploration of the democratic potential in being a housekeeper of homelessness to a study of models of action against racial injustice this volume provides fascinating new insights into Robinson s work and how it reflects and reassesses American political culture and theory

Weighty Issues Jeffery Sobal, 2017-09-08 Many people consider their weight to be a personal problem when then does body weight become a social problem Until recently the major public concern was whether enough food was consistently available As food systems began to provide ample and stable amounts of food questions about food availability were replaced with concerns about ideal weights and appearance These interests were aggregated into public concerns about defining people as too fat and too thin Social constructionist perspectives can contribute to the understanding of weight problems because they focus attention on how these problems are created maintained and promoted within various social environments While there is much objectivist research concerning weight

problems few studies address the socially constructed aspects of fatness and thinness This book however draws from and contributes to social constructionist perspectives The chapters in this volume offer several perspectives that can be used to understand the way society deals with fatness and thinness The contributors consider historical foundations medical models gendered dimensions institutional components and collective perspectives These different perspectives illustrate the multifaceted nature of obesity and eating disorders providing examples of how a variety of social groups construct weight as a social problem

The Anorexic Self Paula Saukko, 2008-05-08 Critically examines diagnostic and popular discourses on eating disorders

[The Encyclopaedia Britannica ...](#), 1902 **Thinking Through Systems Thinking** Ion Georgiou, 2007 Guided by an original analysis of the fundamental idea of emergent property Thinking Through Systems Thinking uncovers the distinct significance but also incompleteness of the systems approach as a theory of human epistemological engagement

[The Cambridge Companion to Goethe](#) Lesley Sharpe, 2002-05-02 The Cambridge Companion to Goethe provides a stimulating and accessible survey of this many sided figure The volume places Goethe in the context of the Germany and Europe of his lifetime His literary work is covered in individual chapters on poetry drama with a separate chapter on Faust prose fiction and autobiography A wide ranging survey of reception inside and outside Germany and an extensive guide to further reading round off this volume which will appeal to students and specialists alike

[Objectivity](#) Lorraine Daston, Peter L. Galison, 2021-02-02 Objectivity has a history and it is full of surprises In Objectivity Lorraine Daston and Peter Galison chart the emergence of objectivity in the mid nineteenth century sciences and show how the concept differs from alternatives truth to nature and trained judgment This is a story of lofty epistemic ideals fused with workaday practices in the making of scientific images From the eighteenth

through the early twenty first centuries the images that reveal the deepest commitments of the empirical sciences from anatomy to crystallography are those featured in scientific atlases the compendia that teach practitioners of a discipline what is worth looking at and how to look at it Atlas images define the working objects of the sciences of the eye snowflakes galaxies skeletons even elementary particles Galison and Daston use atlas images to uncover a hidden history of scientific objectivity and its rivals Whether an atlas maker idealizes an image to capture the essentials in the name of truth to nature or refuses to erase even the most incidental detail in the name of objectivity or highlights patterns in the name of trained judgment is a decision enforced by an ethos as well as by an epistemology As Daston and Galison argue atlases shape the subjects as well as the objects of science To pursue objectivity or truth to nature or trained judgment is simultaneously to cultivate a distinctive scientific self wherein knowing and knower converge Moreover the very point at which they visibly converge is in the very act of seeing not as a separate individual but as a member of a particular scientific community Embedded in the atlas image therefore are the traces of consequential choices about knowledge persona and collective sight Objectivity is a book addressed to any one interested in the elusive and crucial notion of objectivity and in what it means to peer into the world scientifically
