Family Violence Robert L. Hampton,1993 What factors contribute to family violence and how can they be identified early so that future violence can be prevented Addressing these and related issues the papers in this volume are a testimony to the rapid expansion of research theory and practice in the family violence field Leading researchers and clinicians explore the roots of family violence including both physical and sexual abuse and examine assessment treatment and prevention Topics addressed include whether children or the elderly are at greater risk and the role of substance abuse in family violence *Fetal Alcohol Syndrome* Committee to Study Fetal Alcohol Syndrome,Institute of Medicine,1996-04-15 It sounds simple Women who drink while pregnant may give birth to children with defects so women should not drink during pregnancy Yet in the 20 years since it was first described in the medical literature fetal alcohol syndrome FAS has proved to be a stubborn problem with consequences as serious as those of the more widely publicized crack babies This volume discusses FAS and other possibly alcohol related effects from two broad perspectives diagnosis and surveillance and prevention and treatment In addition it includes several real life vignettes of FAS children The committee examines fundamental concepts for setting diagnostic criteria in general reviews and updates the diagnostic criteria for FAS and

related conditions and explores current research findings and problems associated with FAS epidemiology and surveillance. In addition, the book describes an integrated multidisciplinary approach to research on the prevention and treatment of FAS. The committee discusses levels of preventive intervention, reviews available data about women and alcohol abuse and treatment among pregnant women, explores the psychological and behavioral consequences of FAS at different ages, examines the current state of knowledge about medical and therapeutic interventions, education efforts, and family support programs. This volume will be of special interest to physicians, nurses, mental health practitioners, school and public health officials, policymakers, researchers, educators, and anyone else involved in serving families and children, especially in high-risk populations.

The Alcoholic Family in Recovery Stephanie Brown, Virginia Lewis, 2012-01-19. Family relationships change dramatically when one or more members stops drinking. Far from offering a quick fix to family problems, in fact, the first years of sobriety are often marked by continuing tension that fuels marital stress, acting out, kids, and difficulties at work. This book explores the process of recovery from addiction as it affects the entire family, presenting an innovative model for understanding and treating families navigating this difficult period. The authors draw upon extensive clinical and research experience to demonstrate how families can be helped to regroup after abstinence, weather periods of emotional upheaval, and find their way to establishing a more stable yet flexible family system.

Alcohol and Interpersonal Violence Susan Ehrlich Martin, 1993.

Impact of Substance Abuse on Children and Families Christine Fewell Huff, 2012-12-06. Help children overcome the increasing dangers they face because of their parents' addictions. *Impact of Substance Abuse on Children and Families* addresses the growing concern over children at risk of developing physical and mental health problems because of their parents' addictions to alcohol and other drugs (AOD), including a chapter on the troubling increase of methamphetamine abuse by parents. The book's contributors examine current research findings from the United States, Australia, Ireland, and Israel to provide much needed insight into the effects of addiction on family dynamics, parental attachment styles, and family characteristics. The book also looks at the impact of addiction on school-aged children and on mothers in residential treatment with their children, survey assessment instruments, and treatment outcomes, and the value of Student Assistance Services for older children. Almost 25 percent of children in the United States live in a household where a parent or other adult is a heavy or binge drinker. More than 10 percent live in a family where illicit drugs are used. Children of alcoholics are nearly 10 times more likely to develop an alcohol use disorder than other children and often develop behavior problems such as depression, anxiety, attention deficit hyperactivity disorder, conduct disorder, and oppositional defiant disorder. Children of illicit drug abusers are more likely than other children to demonstrate immature, impulsive, or irresponsible behavior, to have lower IQ scores, and poorer school attendance. *Impact of Substance Abuse on Children and Families* focuses on these critical and often ignored aspects of addiction, providing the latest evidence-based qualitative and quantitative research findings as well as a summary of available literature. *Impact of Substance Abuse on Children and*
