Recent Advances in Mucosal Immunity Warren Strober, Lars Å Hanson, Kenneth W. Sell, 1982 **Recent Advances in Oral Immunity** Avi-Hai Hovav, Asaf Wilensky, Jean-Pierre Allam, 2021-08-03 The oral mucosa is a challenging environment from an immunological perspective containing discrete niches with a unique architecture and function that requires precise adjustment of the immune system Being the port of entry to the gastrointestinal and respiratory tracts the oral cavity is also constantly challenged by antigens derived from air and food Moreover the oral cavity is the sole tissue of the body harboring a hard surface i e the tooth that is exposed to the hostile external environment resulting in the formation of a complex biofilm that has local and systemic effects To deal with such challenges the oral immune system aims to prevent the invasion of pathogens harmful antigens and to tolerate non pathogenic counterparts in order to maintain homeostasis In recent years numerous studies have addressed these fundamental issues revealing sophisticated mechanisms engaged by the immune system to maintain oral mucosal homeostasis and to combat various immunological insults Some of these studies have identified novel immunological mechanisms emphasizing the uniqueness of the oral immune system and the necessity to further investigate its functions

Recent Advances in Immunology to Target Cancer, Inflammation and Infections Jagat Kanwar, 2012-05-09 Immunology is the branch of biomedical sciences to study of the immune system physiology both in healthy and diseased states Some aspects of autoimmunity draws our attention to the fact that it is not always associated with pathology For instance autoimmune reactions are highly useful in clearing off the excess unwanted or aged tissues from the body Also generation of autoimmunity occurs after the exposure to the non self antigen that is structurally similar to the self aided by the stimulatory molecules like the cytokines Thus a narrow margin differentiates immunity from auto immunity as already discussed Hence finding answers for how the physiologic immunity turns to pathologic autoimmunity always remains a question of intense interest However this margin could be cut down only if the physiology of the immune system is better understood The individual chapters included in this book will cover all the possible aspects of immunology and pathologies associated with it The authors have taken strenuous effort in elaborating the concepts that are lucid and will be of reader s interest

Recent Advances in Veterinary Immunology Concepts and Methodology Armin Saalmueller, Dirk Werling, Crystal L. Loving, Philip John Griebel, 2021-03-03 We acknowledge the initiation and support of this Research Topic by the International Union of Immunological Societies IUIS We hereby state publicly that the IUIS has had no editorial input in articles included in this Research Topic thus ensuring that all aspects of this Research Topic are evaluated objectively unbiased by any specific policy or opinion of the IUIS *Recent Advances in Animal Nutrition 2008* P. C. Garnsworthy, J. Wiseman, 2009-09-01 Authored by international experts in the animal production industry this record of the proceedings of the 42nd University of Nottingham Feed Conference explores topics such as the improvements of feed efficiency the impact of biofuel co products the use of enzymes to increase nutritive value and the techniques for coping with

disease outbreaks Filled with comprehensive analyses of the issues as well as practical applications this is an essential read for researchers consultants animal science students legislators and practitioners The newest volume in the series this detailed account contains the most recent information in the livestock industry *Recent Advances in the Immunology of Helminth Infection - Protection, Pathogenesis and Panaceas* Kara Filbey, Constance Finney, Paul Giacomini, Mark C. Ussher, 2022-02-11 **Recent Advancement in White Biotechnology Through Fungi** Ajar Nath Yadav, Sangram Singh, Shashank Mishra, Arti Gupta, 2019-04-24 White biotechnology is industrial biotechnology dealing with various biotech products through applications of microbes The main application of white biotechnology is commercial production of various useful organic substances such as acetic acid citric acid acetone glycerine etc and antibiotics like penicillin streptomycin mitomycin etc and value added product through the use of microorganisms especially fungi and bacteria The value added products included bioactive compounds secondary metabolites pigments and industrially important enzymes for potential applications in agriculture pharmaceuticals medicine and allied sectors for human welfare In the 21st century techniques were developed to harness fungi to protect human health through antibiotics antimicrobial immunosuppressive agents value added products etc which led to industrial scale production of enzymes alkaloids detergents acids biosurfactants The first large scale industrial applications of modern biotechnology have been made in the areas of food and animal feed production agricultural green biotechnology and pharmaceuticals medical red biotechnology In contrast the production of bio active compounds through fermentation or enzymatic conversion is known industrial or white biotechnology The beneficial fungal strains may play important role in agriculture industry and the medical sectors The beneficial fungi play a significance role in

plant growth promotion and soil fertility using both direct solubilization of phosphorus potassium and zinc production of indole acetic acid gibberellic acid cytokinin and siderophores and indirect production of hydrolytic enzymes siderophores ammonia hydrogen cyanides and antibiotics mechanisms of plant growth promotion for sustainable agriculture The fungal strains and their products enzymes bio active compounds and secondary metabolites are very useful for industry The discovery of antibiotics is a milestone in the development of white biotechnology Since then white biotechnology has steadily developed and now plays a key role in several industrial sectors providing both high valued nutraceuticals and pharmaceutical products The fungal strains and bio active compounds also play important role in the environmental cleaning This volume covers the latest research developments related to value added products in white biotechnology through fungi

Recent Advances in Mucosal Immunology Jiri Mestecky, Jerry R. McGhee, John Bienenstock, Pearay L. Ogra, 2012-12-06 Increasing interest in the immunology of mucosal surfaces is obvious from the number of publications in scientific journals and from the frequency of national and international symposia devoted to this subject Particularly encouraging are the large numbers of young investigators who have chosen to work in this area of theoretical immunology with profound practical implications The two volumes represented here are the result of an International Congress Of Mucosal Immunology held at the Niagara Falls Convention Center and the Niagara Falls Hilton on June 29 July 3 1986 This satellite meeting of the International Congress of Immunology placed emphasis on all aspects of the Mucosal Immune System This included the regulation of differentiation of mucosal lymphocytes mucosa associated lymphoreticular tissue and lymphocyte homing the immunology of mucosa associated tissues and glands effector functions in mucosal immunity and the effects of environmental antigens on the immune response all of which are included in Volume I The second volume has emphasized studies of the immune response and effector functions IgA biosynthesis and transport IgA proteases and effector functions developmental aspects and immunodeficiency the immunopathology of IgA and mucosal immunoprophylaxis A total of 218 papers are included in these two volumes and a comparison to past meetings held at four to five year intervals indicates the explosive growth of mucosal immunology

Recent Advances in Animal Nutrition and Metabolism Guoyao Wu, 2021-11-22 This book covers hot topics in the nutrition and metabolism of terrestrial and aquatic animals including the interorgan transport and utilization of water minerals amino acids glucose and fructose the development of alternatives to in feed antibiotics for animals e g swine and poultry and metabolic disorders or diseases resulting from nutrient deficiencies It enables readers to understand the crucial roles of nutrients in the nutrition growth development and health of animals Such knowledge has important implications for humans Readers will also learn from well written chapters about the use of new genome editing biotechnologies to generate animals e g cows and swine as bioreactors that can produce large amounts of pharmaceutical proteins and other molecules to improve the health and well being of humans and other animals as well as the growth and productivity of farm animals Furthermore the book provides useful information on the use of animals e g cattle swine sheep

chickens and fish as models in biomedical research to prevent and treat human diseases develop infant formulas and improve the cardiovascular and metabolic health of offspring with prenatal growth restriction Editor of this book is an internationally recognized expert in nutrition and metabolisms He has about 40 years of experience with research and teaching at world class universities in the subject matters He has published more than 660 papers in peer reviewed journals 90 chapters in books and authored two text reference books with a very high H index of 127 and more than 66 000 citations in Google Scholar This publication is a useful reference for nutrition and biomedical professionals as well as undergraduate and graduate students in animal science aquaculture zoology wildlife veterinary medicine biology biochemistry food science nutrition pharmacology physiology toxicology and other related disciplines In addition all chapters provide general and specific references to nutrition and metabolism for researchers and practitioners in animal agriculture including aquaculture dietitians animal and human medicines and for government policy makers

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1983 **Advanced Therapy of Otitis Media** Cuneyt M. Alper,2004 Advanced Therapy of Otitis Media provides answers to clinical care questions from the most common problems to rare complications and sequelae of otitis media The book targets clinicians who take care of patients with a variety of otolaryngological presentations every day Each chapter in the book focuses on an approach to a specific clinical topic diagnostic technique therapeutic method complication related question or controversy The chapters describe the subject incidence importance etiology pathogenesis and management options

Recent Advances in Animal Virology Yashpal Singh Malik,Raj Kumar Singh,Mahendra Pal Yadav,2019-11-14 This book discusses the prominence and implication of the viral diseases that are a major threat to animals around the globe A number of these diseases have also shown links with human populations which has implications for public health This book offers detailed and up to date information on viral diseases in livestock and poultry that were and or are still a problem Including cutting edge developments it also highlights several landmark contributions in the field of virology from India Additionally the book features tables and figures showing important clinical data and recommendations with references for further information It also explores the economic impact of viral diseases for farmers and the livestock industry providing several examples Further it presents the latest information on viral diseases in global context with a focus on state of art molecular tools for the development of diagnostics prophylactics and therapeutics Lastly the book also describes the challenges posed by the emerging and transboundary viral infections and our preparedness to counter them

Handbook of Vertebrate Immunology Paul-Pierre Pastoret,1998-06-02 This unique book provides a comprehensive and comparative guide to the immune systems of major vertebrate species including domestic and wild animals of veterinary or medical interest fish and amphibia Data in this essential reference work has been compiled by world renowned editors and an international group of authors For each species the information is presented in a structured user friendly format allowing easy cross reference and comparison between the various species This book will be

considered the definitive reference work on vertebrate immunology and will be essential for scientists and professionals working in Immunology Vaccinology or with Animal Models for students of Veterinary or Human Medicine Biology and researchers in Comparative Medicine and Physiology Each section devoted to a major animal group covers Lymphoid organs and their anatomical disposition Leukocytes and their markers Leukocyte traffic and associated molecules Cytokines T cell receptors Immunoglobulins MHC antigens Ontogeny of the immune system Passive transfer of immunity Neonatal immune responses Non specific immunity Complement system Mucosal immunity Immunodeficiencies Tumours of the immune system Autoimmunity

Reproductive Immunology Satish Kumar Gupta, 2012-12-06 Reproductive Immunology is a compilation of research articles presented during the VII International Congress of Reproductive Immunology which was held in New Delhi India on 27-30 October 1998 The articles pertain to the following six major themes Molecular and Immunological Aspects of Sperm Egg Interaction Embryonic Endometrial Cross Talk Immunobiology of Pregnancy Autoantibodies and Infertility Immunocontraception Mucosal Immunology and Reproductive Tract Infections The first section deals with our current understanding of various steps involved in fertilization The functional significance of sperm surface mannosidase and glutathione S transferases to bind zona pellucida is described The role of zona pellucida glycoproteins in the binding of sperm induction of acrosome reactions and avoidance of polyspermy is discussed In the second section the role of various cytokines growth factors and immunomodulatory agents in implantation of embryos is described In the field of reproductive immunology one of the major issues is to explore the successful gestation of the histoincompatible fetus in the uterus of an immunologically competent mother The Proceedings presents the issues of paternal antigens at the feto maternal interface and shows that Th2 type of immunity is involved in normal successful conception The role of membrane bound and soluble HLA G in protecting the fetus from the lytic activities of maternal uterine and peripheral blood natural killer NK cells is also presented Nature's experiments suggest that antibodies against sperm specific antigens are responsible for infertility in some women The possibility that an immunogenetic background contributes to production of sperm immobilizing antibodies in infertile women is discussed in the section on autoantibodies and infertility The Proceedings presents the issue of Th1 type cytokines in inducing recurrent spontaneous abortions of unexplained etiology The roles of 2 glycoprotein 1 2 GP1 dependent anticardiolipin antibody lupus anticoagulant antiphospholipids anti thyroid antibody and anti nuclear antibody in miscarriages are also described The rising global human population particularly in the developing countries has driven the need for new and safer methods of contraception Fertility regulation by vaccines is thus an interesting proposition The section on contraceptive vaccines discusses the latest advances in this area and describes the current status of vaccines

based on hCG sperm antigens zona pellucida glycoproteins and riboflavin carrier proteins The issues of mucosal immunity and strategies for enhancing local genital immune responses to combat HIV infection is discussed The role of inflammatory and related cytokines in chorioamnionitis is described The contents of this Proceedings describes various facets of reproductive immunology which will help us to design strategies to combat genital infections and miscarriages caused by immunological etiology Descriptions of the molecular basis of gamete recognition implantation and survival of the allogenic fetus will help in designing strategies for overcoming infertility and also new contraceptive approaches The Proceedings will be useful to researchers and clinicians involved in basic or applied research in the disciplines of reproductive biology reproductive immunology and obstetrics and gynecology

Immunotoxicology The Commission of the European Communities & UNEP, ILO, WHO International Programme on Chemical Safety, 1987-02-28 IX The International Seminar on the Immunological System as a Target for Toxic Damage was held at The Commission of the European Communities CEC in Luxembourg on 6-9 November 1984 It was organized by the CEC and the International Programme on Chemical Safety of UNEP ILO WHO with the support of the U.S. Environmental Protection Agency and the National Institute of Environmental Health Sciences USA and with the participation of the International Society of Immunopharmacology These bodies are actively concerned with the scientific and applied aspects of immunotoxicology The Seminar consisted of thirty-four invited papers and three major panel discussions covering current and future test strategies for the screening of immunotoxic substances hypersensitivity and the health implications of immunotoxicological problems It was attended by more than 200 scientists from 27 countries representing all the Member states of the European Economic Community and the six Regions of the World Health Organization These scientists represented many different disciplines and interests The Seminar's principal objectives were a review of recent advances in knowledge concerning the structure function and dysfunction of the immunological system a review of the effects of xenobiotics on the immune system in animals and humans an examination of the human health implications of immunotoxicity discussion and critical analysis of the procedures for the assessment of immunological damage a discussion of needs for the further development of laboratory and epidemiological methods and their validation and a consideration of current test strategies
