Religion And Technology A Study In The Philosophy Of Culture:

Religion and Technology Jay Newman,1997-04-30 Religion and technology have always been at the heart of any civilization says Newman and the changing relations between them have and will continue to have a powerful influence on social and personal development Newman begins with a look at religious criticism of technology most specifically the view that technology undermines religious world views religious practices and spirituality in general But what the religious antitechnologist might be misunderstanding he argues are the essence of technology its relation to progress and its significance as a religious endeavor Indeed religion may be a form of technology or both may be the same as culture itself

Beyond Cutting Edge? Paul C. Heidebrecht,2014-03-10 A quick scan of any newsstand is enough to confirm the widespread preoccupation with technological change As a myriad of articles and advertisements demonstrate not only are we preoccupied with technology but we are bombarded with numerous reminders that the cutting edge is in constant motion Most often the underlying assumption of Christians is that we have no choice but to find ways to cope with the latest and greatest Indeed it is often assumed that the church has no choice but to find ways to cope with its new technological context This book does not make the same assumptions Building on the work of Mennonite theologian John Howard Yoder it argues that the practices of the church make it possible for Christians to conscientiously engage technology This happens when we recognize that marks of the church such as patience vulnerability and servanthood can put technological ideals such as speed control and efficiency in their proper place In the course of grappling with three examples of morally formative technologies automobiles genetically modified food and the Internet this book goes beyond Yoder s thought by emphasizing that the church also plays a crucial role in our moral formation

Science, Technology & Society, 1996 The Catholic Faith and the Social Construction of Religion Peter Stuart, Allan M. Savage, 2011-09-02 The intent behind this book is to provide grist for the mill for research students and other interested readers Chapter one by author Allan Savage presents an understanding of the social construction of religious activity which maintains that social construction of religion arises from a dialectical engagement within the world from a phenomenological philosophical point of view Co author Peter Stuart presents a classical and traditional point of view and readers expecting academic accord between the authors will be disappointed A further rationale for writing this book is that both Savage and Stuart desire to express their personal convictions in the public forum Both have interests in the ebb and flow of civilization especially as it pertains to the place of faith religion politics and a variety of social phenomena including economics culture gender ethnicity and the family as well as the ebb and flow of money power property and prestige as articulated throughout history They believe that writing about the place of faith and religion in French Canada is crucial if one is to understand the place that this keystone civilization occupies within confederation and its enduring ambivalence regarding its belonging or not to Canada

The Humanities and the Dynamics of African Culture in the 21st Century John Ayotunde Isola Bewaji, Kenneth W. Harrow, Eunice E. Omonzejie, 2017-05-11 That Africa is at a crossroads in an increasingly globalised world is indisputable Equally unassailable is the fact that the humanities as a broad field of intellection research and learning in Africa appears to have been pigeonholed in debates of relevance in the development aspirations of many African nations Historical experiences and contemporary research outputs indicate however that the humanities in its various shades is critical to Africa s capacity to respond effectively to such problems as security corruption political ineptitude poverty superstition and HIV AIDS among many other mounting challenges which confront the people of Africa The vibrancy and resilience of Africa s cultures against these and other odds of globalisation episodes in the course of our history demand the focused attention of academia to exploit their relevance to contemporary issues This collection provides a comprehensive overview of issues in the humanities at the turn of the 21st century which create a veritable platform for the global redefinition and understanding of Africa s rich

cultures and traditions Such areas covered include ruminations in metaphysics and psychology pathos and ethos cinematic and literary connections and historical conceptualisations *Index to Book Reviews in Religion* ,1999 Historical Abstracts ,2000 **Work in Ancient and Medieval Thought** B. van de Hoven,2023-01-16 The main object of this study is

to find out whether the differences between classical and medieval thinking about work occupations and technology are so significant that we are justified in speaking of a real break between Antiquity and the Middle Ages in this connection or whether there is a possible continuity of ideas From a comparative perspective five themes are being researched to shed light on this question In the first two chapters the author looks into the traditional view of negative ideas about work in Antiquity Chapter three subsequently deals with monks and their attitude towards labour In chapter four the place of the so called artes mechanicae in medieval classifications of knowledge is being studied In chapter five we find an analysis of twelfth century sermons ad status These three chapters principally deal with the question whether Christianity brought about a change in attitude towards work **Cognitive Systems and Signal Processing** Fuchun Sun,Huaping Liu,Dewen Hu,2019-04-26 This two volume set CCIS 1005 and CCIS 1006 constitutes the refereed proceedings of the 4th International Conference on Cognitive Systems and Signal Processing ICCSIP2018 held in Beijing China in November and December 2018 The 96 revised full papers presented were carefully reviewed and selected from 169 submissions The papers are organized in topical sections on vision and image algorithms robotics human computer interaction deep learning information processing and automatic driving **The Disunity of American Culture** John C. Caiazza,2017-07-28 The Disunity of American Culture describes culture now when different forces are influencing it than in the past altering it to near incomprehensibility Identity issues have an effect on culture and politics more influential is the question of what support the state is obligated to provide the individual John C Caiazza seeks to explain how this situation came to be He begins with an explanation of the origins of Protestantism in America Caiazza describes how the American religion has declined and the recent responses the decline has provoked Caiazza follows with an analysis of science as it presently exists in American culture The work of three scientists prominent in their respective fields Steven Weinberg in physics E O Wilson in biology and Stanley Milgram in psychology are examined with respect to how their work has influenced culture The author examines the failure of America's school of philosophy pragmatism to explain the relationship between religion science and general culture even though its founders Charles S Peirce and William James made serious efforts to do so He concludes by making the case that there is a contradiction between scientific reason and the claim of state power Caiazza argues that cultural disharmony will guarantee that the secular state never achieves the dominance over culture and political life it desires **Thinking Jewish Culture in America** Ken Koltun-Fromm,2013-12-11 Thinking Jewish Culture in America argues that Jewish thought extends our awareness and deepens the complexity of American Jewish culture This volume stretches the disciplinary boundaries of Jewish thought so that it can productively engage expanding arenas of culture by drawing Jewish thought into the orbit of

cultural studies The eleven contributors to *Thinking Jewish Cultures* together with Chancellor Arnold Eisen's postscript position Jewish thought within the dynamics and possibilities of contemporary Jewish culture These diverse essays in Jewish thought re-imagine cultural space as a public and sometimes contested performance of Jewish identity and they each seek to re-enliven that space with reflective accounts of cultural meaning How do Jews imagine themselves as embodied actors in America Do cultural obligations limit or expand notions of the self How should we imagine Jewish thought as a cultural performance What notions of peoplehood might sustain a vibrant Jewish collectivity in a globalized economy How do programs in Jewish studies work within the academy These and other questions engage both Jewish thought and culture opening space for theoretical works to broaden the range of cultural studies and to deepen our understanding of Jewish cultural dynamics *Thinking Jewish Culture* is a work about Jewish cultural identity reflected through literature visual arts philosophy and theology But it is more than a mere reflection of cultural patterns and choices the argument pursued throughout *Thinking Jewish Culture* is that reflective sources help produce the very cultural meanings and performances they purport to analyze
