*Madness, Religion and the State in Early Modern Europe* David Lederer, 2006-05-04 From the ideological crucible of the Reformation emerged an embittered contest for the human soul In the care of souls the clergy zealously dispensed spiritual physic for countless early modern Europeans the first echelon of mental health care During its heyday spiritual physic touched the lives of thousands from penitents and pilgrims to demoniacs and mad people Ironically the phenomenon remains largely unexplored Why Through case histories from among the records of over 1 000 troubled and desperate individuals this regional study of Bavaria investigates spiritual physic as a popular ritual practice during a tumultuous era of religious strife material crises moral repression and witch hunting By the mid seventeenth century secular forces ushered in a psychological revolution across Europe However spiritual physic ensconced itself by proxy upon emergent bourgeois psychiatry Today its remnants raise haunting questions about science and the pursuit of objective knowledge in the ephemeral realm of human consciousness Associative Political Culture in the Holy Roman Empire Duncan Hardy, 2018-08-21 What was the Holy Roman Empire in the fourteenth to sixteenth centuries At the turning point between the medieval and early modern periods this vast Central European polity was the continent's most politically fragmented The imperial monarchs were often weak and distant while a diverse array of regional actors played an autonomous role in political life The Empire's obvious differences compared with more centralized European kingdoms have stimulated negative historical judgements and fraught debates which have found expression in recent decades in the concepts of fractured territorial states and a disjointed imperial constitution Associative Political Culture in the Holy Roman Empire challenges these interpretations through a wide ranging case study of Upper Germany the southern regions of modern day Germany plus Alsace Switzerland and western Austria between 1346 and 1521 By examining the interactions of princes prelates nobles and towns comparatively Associative Political Culture in the Holy Roman Empire demonstrates that a range of actors and authorities shared the same toolkit of technologies rituals judicial systems and concepts and configurations of government Crucially Upper German elites all participated in leagues alliances and other treaty based associations As frameworks for collective activity associations were a vital means of enabling and regulating warfare justice and arbitration and even lordship and administration On the basis of this evidence Associative Political Culture in the Holy Roman Empire offers a new and more coherent depiction of the
