The Mystical Element of Religion features a critical but largely appreciative philosophy of mysticism The author s three elements of religion are his most enduring contribution to theological thinking The human soul the movements of western civilization and the phenomena of religion itself he characterized by these three elements the historical institutional element the intellectual speculative element and the mystical experiential element This typology provided for him an understanding of the balance tension and friction that exists in religious thinking and in the complexity of reality and existence It was an organizing paradigm that remained central to his project The effort to hold these sometimes disparate dimensions together was structurally and theologically dominant throughout his writing The main subject of H gel s study are the life and teaching of Catherine of Genoa 1447 1510 the Italian Roman Catholic saint and mystic admired for her work among the sick and the poor and remembered because of various writings describing both these actions and her mystical experiences
