Religion, Truth, and Social Transformation Lambert Zuidervart, 2016-04-01 Reformational philosophy rests on the ideas of nineteenth century educator church leader and politician Abraham Kuyper and it emerged in the early twentieth

century among Reformed Protestant thinkers in the Netherlands Combining comprehensive criticisms of Western philosophy with robust proposals for a just society it calls on members of religious communities to transform harmful cultural practices social institutions and societal structures Well known for his work in aesthetics and critical theory Lambert Zuidervaat is a leading figure in contemporary reformational philosophy In *Religion Truth and Social Transformation* the first of two volumes of original essays from the past thirty years he forges new interpretations of art politics rationality religion science and truth In dialogue with modern and contemporary philosophers among them Immanuel Kant G F H Hegel Martin Heidegger Theodor Adorno J rgen Habermas and reformational thinkers such as Herman Dooyeweerd Dirk Vollenhoven and Hendrik Hart Zuidervaat explains and expands on reformational philosophy s central themes This interdisciplinary collection offers a normative critique of societal evil a holistic and pluralist conception of truth and a call for both religion and science to serve the common good Illustrating the connections between philosophy religion and culture and daring to think outside the box *Religion Truth and Social Transformation* gives a voice to hope in a climate of despair      *Religious Truth* Edward Hitchcock,1857      **Phenomenology of the Truth Proper to Religion** Daniel Guerriere,1990-05-29 The question is what constitutes truth in religion Represented here is the whole spectrum of phenomenology transcendental existential hermeneutic ethical and deconstructive presented by some of the most respected names in the philosophy of religion today Louis Dupr Merold Westphal and Edward Farley Here is also engagement with a wide variety of twentieth century thinkers such as Husserl Scheler and Heidegger Ricoeur Gadamer and Derrida Freud van der Leeuw and Eliade and Rosenzweig Tillich and Schillebeeks This volume provides unique sources for anyone interested in the philosophical theological or scientific study of religion      **Religious Truth, Illustrated From Science, Addresses and Sermons on Special Occassions** Edward Hitchcock,2022-10-27 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant      *Social Domains of Truth* Lambert Zuidervaat,2023-03-10 Truth is in trouble In response this book presents a new conception of truth It recognizes that prominent philosophers have questioned whether the idea of truth is important Some have asked why we even need it Their questions reinforce broader trends in Western society where many wonder whether or why we should pursue truth Indeed some pundits say we have become a post truth society Yet there are good reasons not to embrace the cultural Zeitgeist or go with the philosophical flow reasons to regard truth as a substantive and socially significant idea This book explains why First it argues that propositional truth is only one kind of truth an important kind but not all important Then it shows how

propositional truth belongs to the more comprehensive process of truth as a whole This process is a dynamic correlation between human fidelity to societal principles and a life giving disclosure of society The correlation comes to expression in distinct social domains of truth where either propositional or nonpropositional truth is primary The final chapters lay out five such domains science politics art religion and philosophy Anyone who cares about the future of truth in society will want to read this pathbreaking book
