The Evangelical Age of Ingenuity in Industrial Britain Joseph Stubenrauch, 2016-07-28 The Evangelical Age of Ingenuity in Industrial Britain argues that British evangelicals in the late eighteenth and early nineteenth centuries invented new methods of spreading the gospel as well as new forms of personal religious practice by exploiting the era's growth of urbanization industrialization consumer goods technological discoveries and increasingly mobile populations While evangelical faith has often been portrayed standing in inherent tension with the transitions of modernity Joseph Stubenrauch demonstrates that developments in technology commerce and infrastructure were fruitfully linked with theological shifts and changing modes of religious life This volume analyzes a vibrant array of religious consumer and material culture produced during the first half of the nineteenth century Mass print and cheap mass produced goods from tracts and ballad sheets to teapots and needlework mottoes were harnessed to the evangelical project By examining ephemera and decorations alongside the strategies of evangelical publishers and benevolent societies Stubenrauch considers often overlooked sources in order to take the pulse of vital religion during an age of upheaval He explores why and how evangelicals turned to the radical alterations of their era to bolster their faith and why serious Christianity flowered in an industrial age that has usually been deemed inhospitable to it

Entrepreneurs and Capitalism since Luther Ivan Light, Léo-Paul Dana, 2020-08-20 In *Entrepreneurs and Capitalism since Luther* Rediscovering the Moral Economy Ivan Light and L o Paul Dana study the history of business capitalism and entrepreneurship to examine the values of social and cultural capital Six chapters evaluate case studies that illustrate contrasting relationships between social networks vocational culture and entrepreneurship Light and Dana argue that in capitalism s early stages cultural capital is scarcer than social capital and therefore more crucial for business owners Conversely when capitalism is well established social capital is scarcer than cultural capital and becomes more crucial Light and Dana then trace moral legitimations of capitalism from the Reformation to the Enlightenment the Gilded Age and finally to Joseph Schumpeter whose concept of creative destruction freed elite entrepreneurs from moral restraints that encumber small business owners After examining the availability of social and cultural capital in the contemporary United States Light and Dana show that business owners social capital enforces conventional morality in markets facilitating commerce and legitimating small businesses the old fashioned way As their networks become more isolated elite entrepreneurs must claim and ultimately deliver successful results to earn public toleration of immoral or predatory conduct

the USA The Foundations of Female Entrepreneurship Alison Kay,2012-08-21 The Foundations of Female Entrepreneurship explores the relationship between home household headship and enterprise in Victorian London It examines the notions of duty honor and suitability in how women s ventures are represented by themselves and others and engages in a comparison of the interpretation of historical female entrepreneurship by contemporaries and historians in the UK Europe and America It argues that just as women in business have often been hidden by men they have often also been hidden by the home and the conceptualization of separate spheres of public and private agency and of the entrepreneur Drawing on contextual evidence from 1747 to 1880 including fire insurance records directories trade cards newspapers memoirs the census and extensive record linkage this study concentrates on the early to mid Victorian period when ideals about gender roles and appropriate work for women were vigorously debated Alison Kay offers new insight into the motivations of the Victorian women who opted to pursue enterprises of their own By engaging in empirical comparisons with men s business it also reveals similarities and differences with the small to medium sized ventures of male business proprietors The link between home and enterprise is then further excavated by detailed record linkage revealing the households and domestic circumstances and responsibilities of female proprietors Using both discourse and data to connect enterprise proprietor and household The Foundations of Female Entrepreneurship provides a multi dimensional picture of the Victorian female proprietor and moves beyond the stereotypes It argues that active business did not exclude women although careful representation was vital and this has obscured the similarities of their businesses with those of many male business proprietors **Trademarks, Brands, and Competitiveness** Teresa da Silva Lopes,Paul Duguid,2010-05-04 Trade Marks Brands and Competitiveness brings together scholars from a variety of disciplines to provide a critical account of the contribution of branding to economic growth the relationship between trademark law and brand strategy and the building and repositioning of individual brands as case studies in the effects of competition **The Power of Corporate Networks** Thomas David,Gerarda Westerhuis,2014-08-27 Corporate networks the links between companies and their leaders reflect a country s economic organization and its corporate governance system Most research on corporate networks focuses on individual countries or particular time periods however making fruitful comparisons over longer periods of time difficult This book provides a unique long term analysis of the rise consolidation decline and occasional re emergence of these networks in fourteen countries across North and South America Europe and Asia in the 20th and early 21st centuries In this volume the editors bring together the most internationally well known specialists to investigate the long term development of corporate networks Using a combination of quantitative and qualitative research approaches the authors describe the main developments and changes in the corporate network over time by focusing on important network indicators in benchmark years and identify historical explanations for these developments This unique long term perspective allows readers insight into how and why national corporate networks have evolved over time *Family Multinationals* Christina Lubinski,Jeffrey

Fear, Paloma Fernández Pérez, 2013-07-18 In contrast to widespread assessments that family enterprises lack sufficient resources and capabilities to go global many family companies are competing successfully in an increasingly globalized business environment Worldwide a large number of thriving multinationals are still family owned and or under family control While there is abundant literature on the phenomenon of globalization from many different disciplines neither the literature on multinationals nor the growing field of family business studies have systematically investigated family multinationals yet This volume is one of the first to deal explicitly with family multinationals and the role of the family in internationalization It situates itself at the crossroads of internationalization studies on the one hand and family business research on the other Why do families continue to play such a large role in some of the most prominent firms in emerging and mature economies How did they manage to maintain ownership control yet divest of unrelated business ventures How did they internationalize yet maintain control This book identifies the idiosyncratic strategies and structures of family multinationals in different countries and at different points in time A comparative historical and case study approach allows us to explore the role of the family through the firms various internationalization pathways and understand long term developments and path dependencies
