**To Catch A Dream** David Koulack,1991-01-01 To Catch a Dream is a behind the scenes look at the exciting world of sleep and dream research It provides an intimate glimpse into our nocturnal creative activities as well as tentative answers to age old questions about dream recall and dream recall failure the relationship of daytime events to dream content and the possible adaptive function that dreams may have in helping us to cope with stress in our daily lives From product description

**Dreams on Film** Leslie Halpern,2010-06-28 Films with dream sequences or a dreamlike quality allow directors to create their own rules of logic and nature to meet a variety of artistic needs For instance an opening dream immediately establishes what a character is feeling a later dream or series of them provides viewers with a glimpse of the climax and a concluding dream ties up loose ends In real life of course dreams do not occur at such convenient times or serve such useful purposes This book explores why science is lost or distorted in the process of representing dreams on film and why audiences prefer this figurative truth of art over the literal truth of science Part One discusses changes in form and considers the history of dream theory Additionally the physiology of sleeping and dreaming dream structure sleep deprivation dreams under the influence of drugs or alcohol and waking up as depicted on film are examined Part Two investigates changes in content and delves into the psychology of sleeping and dreaming dream interpretation altered states of consciousness visions and prophecies dreams as wish fulfillment sex and death nightmares and reality versus illusion The author uses theories by Freud Jung and current experts in her analyses of dream sequences and their use in film

Murray, Eli Abraham Rubinstein, George A. Comstock, 1972 **Television and Social Behavior: Television's effects: further explorations** John P. Murray, Eli Abraham Rubinstein, George A. Comstock, 1972 **Science Fiction Film, Television, and Adaptation** Jay Telotte, Gerald Duchovnay, 2011-08-02 The book examines the difficulty of adapting from one screen medium to another by looking at both successful and unsuccessful efforts in the area of science fiction Those difficult efforts at moving from film to TV and from TV to film reveal much about the technologies involved and this highly technological genre as well **The Neuropsychology of Sleep and Dreaming** John S. Antrobus, Mario Bertini, 2013-01-11 This volume describes how the conceptual and technical sophistication of contemporary cognitive and neuroscientific fields has enhanced the neurocognitive understanding of dreaming sleep Because it is the only naturally occurring state in which the active brain produces elaborate cognitive processes in the absence of sensory input the study of dreaming offers a unique cognitive and neurophysiological view of the production of higher cognitive processes The theory and research included is driven by the search for the most direct relationships linking the neurophysiological characteristics of sleepers to their concurrent cognitive experiences The search is organized around three sets of theoretical models and the three classes of neurocognitive relationships upon which they are based The contributions to this volume demonstrate that the field has begun to move in new directions opened up by the rapid advances in contemporary cognitive science neuropsychology and neurophysiology **Subject Matter** Aron Vinegar, 2023-11-28 A theorization of habit that emphasizes its excessive and unsettling qualities rather than its mediating adaptive and stabilizing functions Subject Matter offers a bold counterpoint to prevalent conceptions of habit characterized by bodily fluidity and ease as the stabilizing foundation of an emerging subjectivity or more negatively as a numbing and deadening force Instead of facilitating the coordination of action with goal and self with environment habit appears here as a disruptively recursive operation with extreme ontological implications that are often more quotidian than exceptional Vinegar theorizes habit's more perturbing aspects from repetition compulsion to kenosis to breakdown through an encounter between Hegel's philosophy of habit psychoanalytic dimensions of repetition Tom McCarthy's novel *Remainder* and Omer

Fast's feature length film interpretation of the novel *Vinegar* starts with the premise that habit is an unhappy mediator a disturbance of the very medium and milieu that is constitutive of the subject. Subject Matter pays close attention to those aspects of habit that are usually considered deviations from or potential threats to habit proper and that generate a logic of breakdown automaticity mechanization thingness inertia and fixity. By plotting a topology of habit's unbearability through detailed accounts of its manifestation in writing art aesthetics and visibility and through an attentiveness to the unbalanced nonrelations between mediation and immediacy being and having fixity and fluidity vanishing and overflowing abbreviation and excess beginning and ending *Vinegar* exposes habit's failure to mediate and inhabit. In doing so he offers new and counterintuitive insights into how habit generates the unruly grounds it is supposed to settle thus allowing us to ask how we might break down differently.
