Remaking Chicago The Political Origins Of Urban I:

Remaking Chicago Joel Rast, 2002-06 Examining Chicago as a model for urban economic development in the post World War II era Joel Rast challenges the conventional belief that structural economic change has forced cities to concentrate resources on downtown revitalization efforts in order to remain fiscally viable Rast argues instead that cities face multiple economic development choices and that politics play a fundamental role in deciding among them During the late 1950s a coalition of city officials and downtown business leaders initiated planning efforts that would help reshape central Chicago into a modern mecca of service industries and affluent residential neighborhoods chasing viable manufacturers from the near downtown area in the process More recently however manufacturers have sought protection and support from city government forming alliances with labor and community organizations concerned with the decline of well paying industrial job opportunities Responding to these pressures city officials from the Harold Washington Eugene Sawyer and Richard M Daley administrations have taken steps to implement a citywide industrial policy *Remaking Chicago* portrays urban economic development as open ended and politically contested It demonstrates that who governs matters and shows how opportunities exist for creative local responses to urban economic restructuring Based on extensive research this well written case study will appeal to those interested in urban planning and politics economic development and Chicago history and politics

Cities in American Political History Richard Dilworth, 2011-09-13 Profiling the ten most populous cities in the United States during ten critical eras of political development *Cities in American Political History* presents a unique singular focus on American cities their government and politics industry commerce labor and race and ethnicity *Cities in American Political History* analyzes the role that large cities from New York to Chicago to San Jose have played in U S politics and policymaking Each entry is structured for straightforward comparison across issues and eras The city profiles include basic data and statistics for the era and are accompanied by maps of each era and the largest cities at that time **The Making of Urban**

America Raymond A. Mohl, Roger Biles, 2023-10-03 The revised and updated third edition of *The Making of Urban America* includes seven new articles and a richly detailed historiographical essay that discusses the vast urban history literature added to the canon since the publication of the second edition The authors extensively revised introductions and the fifteen reprinted articles trace urban development from the preindustrial city to the twentieth century city With emphasis on the social economic political commercial and cultural aspects of urban history these essays illustrate the growth and change that created modern day urban life Dynamic topics such as technology immigration and ethnicity suburbanization sunbelt cities urban political history and planning and housing are examined *The Making of Urban America* is the only reader available that covers all of U S urban history and that also includes the most recent interpretive scholarship on the subject *Rogues, Rebels, And Rubber Stamps* Dick Simpson, 2018-03-08 In *Rogues Rebels and Rubber Stamps* Dick Simpson challenges and recasts current theories of Regime Politics as he chronicles the dramatic story of the civic wars in the Chicago City Council

since the civil war At the same time the author provides a window into the broader struggle for democracy and justice Simpson points out that through analyzing city council floor fights battles at the ballot box and street demonstrations one can begin to see certain patterns of conflict emerge These patterns demonstrate that before the Great Depression fragmented city councils were dominant The author also discusses how since the Democrats seized control of Chicago government after the Great Depression Rubber Stamp City Councils have been predominant although they have been punctuated by brief eras of council wars and chaos This book is important for anyone wanting to understand the nature of these battles as a guideline for America s future and is well suited for courses in urban politics affairs and history Rogues Rebels and Rubber Stamps received an Honorable Mention for the 2001 Society of Midland Authors Book Award for Adult Non Fiction

Contesting the Postwar City Eric Fure-Slocum,2013-06-28 Focusing on midcentury Milwaukee Eric Fure Slocum charts the remaking of political culture in the industrial city Professor Fure Slocum shows how two contending visions of the 1940s city working class politics and growth politics fit together uneasily and were transformed amid a series of social and policy clashes Contests that pitted the principles of democratic access and distribution against efficiency and productivity included the hard fought politics of housing and redevelopment controversies over petty gambling questions about the role of organized labor in urban life and battles over municipal fiscal policy and autonomy These episodes occurred during a time of rapid change in the city s working class as African American workers arrived to seek jobs women temporarily advanced in workplaces and labor unions grew At the same time businesses and property owners sought to reestablish legitimacy in the changing landscape This study examines these local conflicts showing how they forged the postwar city and laid a foundation for the neoliberal city

Custodians of Place Paul George Lewis,Max Neiman,2009 Custodians of Place provides a new theoretical framework that accounts for how different types of cities arrive at decisions about residential growth and economic development Lewis and Neiman surveyed officials in hundreds of California cities of all sizes and socioeconomic characteristics to account for differences in local development policies This book shows city governments at the center of the action in shaping their destinies frequently acting as far sighted trustees of their communities They explain how city governments often can insulate themselves for the better from short term political pressures and craft policy that builds on past growth experiences and future vision Findings also include how conditions on the ground local commute times housing affordability composition of the local labor force play an important role in determining the approach a city takes toward growth and land use What types of cities tend to aggressively pursue industrial or retail firms What types of cities tend to favor housing over business development What motivates cities to try to slow residential growth Custodians of Place answers these and many other questions

Hambleton,2007-11-26 This book is about the role that ideas institutions and actors play in structuring how we govern cities and more specifically what projects or paths are taken Global changes require that we rethink governance and urban policy and that we do so through the dual lens of theory

educational process through which residents enhance their skills and knowledge as they participate Taken together these essays provide a comprehensive and multi faceted view of the issues facing contemporary urban neighborhoods

Chicago's Industrial Decline Robert Lewis,2020-12-15 In Chicago s Industrial Decline Robert Lewis charts the city s decline since the 1920s and describes the early development of Chicago s famed and reviled growth machine Beginning in the 1940s and led by local politicians downtown business interest financial institutions and real estate groups place dependent organizations in Chicago implemented several industrial renewal initiatives with the dual purpose of stopping factory closings and attracting new firms in order to turn blighted property into modern industrial sites At the same time a more powerful coalition sought to adapt the urban fabric to appeal to middle class consumption and residential living As Lewis shows the two aims were never well integrated and the result was on going disinvestment and the inexorable decline of Chicago s industrial space By the 1950s Lewis argues it was evident that the early incarnation of the growth machine had failed to maintain Chicago s economic center in industry Although larger economic and social forces specifically competition for business and for residential development from the suburbs in the Chicagoland region and across the whole United States played a role in the city s industrial decline Lewis stresses the deep incoherence of post WWII economic policy and urban planning that hoped to square the circle by supporting both heavy industry and middle to upper class amenities in downtown Chicago

A New Deal for Bronzeville Lionel Kimble,2015-09-03 Illinois State Historical Society Certificate of Excellence 2016 During the Great Migration of the 1920s and 1930s southern African Americans flocked to the South Side Chicago community of Bronzeville the cultural political social and economic hub of African American life in the city if not the Midwest The area soon became the epicenter of community activism as working class African Americans struggled for equality in housing and employment In this study Lionel Kimble Jr demonstrates how these struggles led to much of the civil rights activism that occurred from 1935 to 1955 in Chicago and shows how this working class activism and culture helped to ground the early civil rights movement Despite the obstacles posed by the Depression blue collar African Americans worked with leftist organizations to counter job discrimination and made strong appeals to New Deal allies for access to public housing Kimble details how growing federal intervention in local issues during World War II helped African Americans make significant inroads into Chicago s war economy and how returning African American World War II veterans helped to continue the fight against discrimination in housing and employment after the war The activism that appeared in Bronzeville was not simply motivated by the class consciousness rhetoric of the organized labor movement but instead grew out of everyday struggles for racial justice citizenship rights and improved economic and material conditions With its focus on the role of working class African Americans as opposed to the middle class leaders who have received the most attention from civil rights historians in the past A New Deal for Bronzeville makes a significant contribution to the study of civil rights work in the Windy City and enriches our understanding of African American life in mid twentieth century Chicago This publication

The New Political Economy of Urban Education Pauline Lipman, 2013-05-13 Urban education and its contexts have changed in powerful ways Old paradigms are being eclipsed by global forces of privatization and markets and new articulations of race class and urban space These factors and more set the stage for Pauline Lipman's insightful analysis of the relationship between education policy and the neoliberal economic political and ideological processes that are reshaping cities in the United States and around the globe Using Chicago as a case study of the interconnectedness of neoliberal urban policies on housing economic development race and education Lipman explores larger implications for equity justice and the right to the city She draws on scholarship in critical geography urban sociology and anthropology education policy and critical analyses of race Her synthesis of these lenses gives added weight to her critical appraisal and hope for the future offering a significant contribution to current arguments about urban schooling and how we think about relations between neoliberal education reforms and the transformation of cities By examining the cultural politics of why and how these relationships resonate with people's lived experience Lipman pushes the analysis one step further toward a new educational and social paradigm rooted in radical political and economic democracy

Local Officials and the Struggle to Transform Cities Claire Bénit-Gbaffou, 2024-02-27 Why are even progressive local authorities with the will to improve seldom able to change cities Why does it seem almost impossible to redress spatial inequalities deliver and maintain basic services elevate impoverished areas and protect the marginalised communities Why do municipalities in the Global South refuse to work with prevailing social informalities and resort instead to interventions that are known to displace and aggravate the very issues they aim to address *Local Officials and the Struggle to Transform Cities* analyses these challenges in South African cities where the brief post apartheid moment opened a window for progressive city government and made research into state practices both possible and necessary In debate with other progressive moments in large cities in Brazil the USA and India the book interrogates City officials practices It considers the instruments they invent and negotiate to implement urban policies the agency they develop and the constraints they navigate in governing unequal cities This focus on actual officials practices is captured through first hand experience state ethnographies and engaged research These reveal day to day practice that question generalised explanations of state failure in complex urban societies as essential malevolence contextual weakness corruption and inefficiency It is hoped that opening the black box of the workings of state opens paths for the construction of progressive policies in contemporary cities

Building the Urban Environment Harold L Platt, 2015-10 History and critique of post World War II urban planning explores its effects on the environment race labor housing and municipal administration

The Origins of the Dual City Joel Rast, 2019-12-05 Chicago is celebrated for its rich diversity but even more than most US cities it is also plagued by segregation and extreme inequality More than ever Chicago is a dual city a condition taken for granted by many residents In this book Joel Rast reveals that today's tacit acceptance of rising urban

inequality is a marked departure from the past For much of the twentieth century a key goal for civic leaders was the total elimination of slums and blight Yet over time as anti slum efforts faltered leaders shifted the focus of their initiatives away from low income areas and toward the upgrading of neighborhoods with greater economic promise As misguided as postwar public housing and urban renewal programs were they were born of a long standing reformist impulse aimed at improving living conditions for people of all classes and colors across the city something that can't be said to be a true priority for many policymakers today The Origins of the Dual City illuminates how we normalized and became resigned to living amid stark racial and economic divides

Place Matters Peter Dreier, John H. Mollenkopf, Todd Swanstrom, 2004 Analyzes the problematic trends facing America's cities and older suburbs and challenges us to put America's urban crisis back on the national agenda

Planning World Cities Peter Newman, Andy Thornley, 2011-06-21 This major comparative text on urban planning and the global and regional context in which it takes place examines what have been traditionally regarded as world cities New York London Tokyo and also a range of other important cities in America Europe and Asia The authors show the role planning has played in the way cities have responded to the forces of globalization and argue for the importance of diverse rather than one size fits all planning practices This fully revised second edition systematically brings the debates on the impact of globalization right up to date and provides integrated coverage of the latest planning theory and practice It also contains extended analysis of the implications of the rapid growth of Chinese cities such as Shanghai Hong Kong and Beijing New material is included on the impact of globalization on poorer mega cities like Mumbai and Johannesburg

Journal of a Dissenter Chris Wright, 2025-01-20 This is a lengthy intellectual journal by a political radical that ranges over a variety of subjects such as Marxism capitalism history many schools of modern philosophy psychology economics and contemporary American politics It also includes quite a few personal passages but I've kept those only because they express common experiences and youthful psychological tendencies Its most useful content for students might be its many summaries of good historical and scientific scholarship especially in the journal's second half Ultimately the document is a fairly comprehensive expression of a particular society as refracted through an inquisitive and critical mind from the ages of 15 to 44
