Residential Segregation in Comparative Perspective Kuniko Fujita, 2016-04-08 We know very little about variations in urban class and ethnic segregation among nations and even less about differences among cities in different regions of the world Spatial organization places and neighbourhoods matters significantly in some cities in reproducing class relations and ethno racial hierarchies but may be much less important in others The degree and the impact of segregation depend upon contextual diversity By emphasizing the importance of contextual diversity in the study of urban residential segregation the book questions currently popular urban theories such as global city neoliberal urbanism and

gentrification These theories tend to dissociate cities from their national and regional context and thus ignore their history culture politics and institutions The aim of this book is to introduce the significantly different urban experiences in social and spatial segregation patterns and rationales which exist among the world's regions and to demonstrate that urban theory needs to draw systematically upon this wide range of experiences The cities selected Athens Beijing Budapest Copenhagen Hong Kong Madrid Paris São Paulo Taipei and Tokyo were chosen in order to achieve geographical spread to maximise the diversity of types of socioeconomic regulation This volume is thus able to avoid the interpretative limitations and misconstructions resulting from universalizing the Anglo American experience

Financialisation and Poverty Alleviation in Ghana Francis Boateng Frimpong, 2021-11-22 The neoliberal policy response to the crisis in Ghana did not succeed in reversing the economic decline in both the medium and long term In fact quite the opposite rather than undoing the economic decline Frimpong argues that the policy prescriptions further weakened the country s ability to develop This is because the policies intentionally and unintentionally encouraged factors that destabilised the possibility of the real productive assets to earn commensurate returns to facilitate the flow of capital to the real sectors to ensure the survival of industrial enterprises Rising profit in the financial sector incentivised financial capitalist to divert capital into financial assets at the expense of productive investment further decelerating the pace of real capital accumulation in the country

Globalization Or Empire? Jan Nederveen Pieterse, 2004-08 Is America s cultural economic and military domination of the world globalization or is it just empire In this smart brief book Pieterse confronts many of the most important issues surrounding this question

Institutions and Development After the Financial Crisis Sebastiano Fadda, Pasquale Tridico, 2013-10-30 The financial crash of 2007 2008 and the subsequent global economic crisis have raised questions about the viability of capitalism and the desirability of alternative types of economic system In this context Keynesian and Marxist ideas in particular have become more popular These two approaches along with some other heterodox perspectives agree on the need for institutional analysis and for better institutions and governance in order to promote economic development This volume poses fundamental institutional evolutionary and ontological questions relating to the emergence of a new mode of

governance after the financial crisis The book argues that contrary to the recent austerity policies implemented in the EU in particular a new level of government involvement is required in order to keep aggregate demand stable make full employment possible and create a transparent financial sector serving the real economy and encouraging productive investments This book will be of interest to students researchers and policy makers working in the areas of finance institutional economics development economics and international political economy

Globalization, Regional Development and Local Response Leendert Andrew de Bell, 2005 In a world that has become increasingly interconnected over the past decades economically politically socially and culturally new challenges are posed to development Since the 1980s development has increasingly become interpreted in terms of increasing integration into the world economy Export oriented manufacturing became widely viewed as the surest recipe for realizing economic growth while reducing income inequality and the role of foreign direct investments became increasingly important in development strategies worldwide However not every region industry and social group managed to become successfully integrated into the world economy In order to explain why these processes of economic restructuring have had such a differential impact this study situates developments within a wider historical social and political context to establish how these processes of globalization are mediated at the regional and local level The main object of study concerns the drastic socioeconomic transformation that has taken place in the state of Coahuila situated in the northeast of Mexico bordering the United States over the past three decades In particular since the start of NAFTA in 1994 Coahuila has become one of Mexico's most successful export oriented manufacturing states most importantly as a result of the large number of foreign direct investments it received However the effects of these developments have been unevenly distributed among its sub regions while questions must also be raised about its ability to contribute to sustained long term growth with equity The key issue appears to be not whether but how regions and localities become linked to the world economy page 4 of cover

The Scottish Economy and Nationalism James Foley, 2023-08-18 Scotland's economic capacity to prosper independently of Britain has become a key political issue dominating the independence referendum of 2014 and continuing to influence British politics since But as this book shows the Scottish economy is not merely a statistical object it is also a political sociological and cultural idea which has been imagined and constructed The book explores the history of how Scotland has been framed in statistical and policy terms which are laden with conflicts over meaning ranging from class struggles and struggles against external control to the ongoing debate over national independence Using Scotland as a case study for examining the political meaning of the economy the book also considers the origins of efforts to measure the Scottish economy in the British nationalist terms of regional policy It then considers the influence in turn of North Sea oil globalisation Europeanisation class dealignment and neoliberal enterprise ideology in changing the meanings attached to the Scottish economy These form necessary conditions for the debate on national independence where the nature and the future of the Scottish economy remain the central

controversy By examining the economic ideas of a self proclaimed cosmopolitan nationalist movement the study will offer deeper insights into how nationalists are adapting to the crisis of globalisation This book marks a significant contribution to the literature on Scottish independence as well as economic sociology nationalism critical geography and political economy more broadly **Globalization, the IMF, and International Banks in Argentina** Christian Hernandez,2019-08-27

Globalization the IMF and International Banks in Argentina The Model Economic Crisis examines the meaning of mainstream globalization and how it relates to neoliberalism as policymakers international financiers and the mainstream press combat populist attempts to de globalize Christian Hernandez chronicles the failures of mainstream globalism and its resilience Hernandez examines the case of Argentina as a microcosm of political economic and financial distress that has now spread to the United States and Europe Specifically it examines how the financial press narrated the globalization of Argentine banks and the Argentine Great Depression shortly thereafter The book also analyzes over 32 years of IMF Argentine consultations This includes the IMF s return under Mauricio Macri proving globalization is not dead Scholars of economics Latin American studies and political science will find this book particularly useful *Governance, Globalization and Public Policy* Patricia Kennett,2008 *Governance Globalization and Public Policy* is concerned with exploring the nature of the policy arena in the context of globalization and the reconstitution of the state The contributors to this book seek to broaden extend and integrate theoretical conceptual and substantive policy debates The book begins by exploring the concepts and perspectives associated with globalization and governance the relationship between them and the repercussions for public policy and the state It also considers developments at the global and regional levels and the implications of the emergence of new regulatory regimes in the context of liberalization and privatization The focus then turns to a broad range of substantive areas of public policy such as human rights health and health care housing markets poverty security and counter terrorism Together the chapters provide a thorough integrated insight into the relationship between global processes governance and public policy across a range of policy domains Providing a comprehensive analysis of patterns and processes of governance in specific areas of public policy this book will be of great interest to students undertaking programmes in social policy social administration public policy and political science as well as researchers and academics concerned with the policymaking process

Neoliberal Transformation of Electricity Serhan Ünal,2023-05-02 This book makes a structural analysis of the neoliberal restructuring in the global electricity industry The book shows that the electricity liberalisation in different countries is just a reflection of the same structural trend in the global economy and avoids from both narrow country specific and abstract global approaches by making a structural analysis completed by a case study Thus it aims reaching wider conclusions about how global changes in finance and ideology knowledge structures influence domestic energy and economic policy preferences of developing countries The book develops a taxonomy about organising principles around which the electricity industry has been structured historically and globally and reveals drivers of change which influences the current energy

transition in the electricity sector Combining these aspects the book uses financial and other economic data empirically to shed light on the structural role of global transformation of the electricity markets on the domestic energy policy preferences of the developing countries Thus this work will be useful not only for academic purposes but also for practitioners dealing with these issues
