Rembrandt After 300 Years:

A Corpus of Rembrandt Paintings VI Ernst van de Wetering, 2014-11-11 A revised survey of Rembrandt's complete painted oeuvre The question of which 17th century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime It is an issue that is still hotly disputed among art historians today The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait painter He also left pieces unfinished to be completed by others The question is how to determine which works were from Rembrandt's own hand Can we for example define the criteria of quality that would allow us to distinguish the master's work from that of his followers Do we yet have methods of investigation that would deliver objective evidence of authenticity To what extent do research techniques used in the physical sciences help Or are we after all still dependent on the subjective expert eye of the connoisseur The book provides answers to these questions Prof Ernst van de Wetering the author of our forthcoming book which deals with these questions has been closely involved in all aspects of this research since 1968 the year the renowned Rembrandt Research Project RRP was founded In particular he played an important role in developing new criteria for authentication Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand In this book he re attributes to the master a substantial number of unjustly rejected Rembrandts He also was closely involved in the re discovery of a considerable number of lost or completely unknown works by Rembrandt The verdicts of earlier specialists including the majority of members of the original RRP up to 1989 were based on connoisseurship the self confidence in one's ability to recognise a specific artist's style and hand Over the years Van de Wetering has carried out seminal research into 17th century studio practice and ideas about art current in Rembrandt's time In this book he demonstrates the fallibility of traditional connoisseurship especially in the case of Rembrandt who was par excellence a searching artist The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research Van de Wetering's account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account The catalogue section presents a chronologically ordered survey of Rembrandt's entire painted oeuvre of 336 paintings richly illustrated and annotated For all the paintings re attributed in this book extensive commentaries have been included that provide a multi faceted new insight into Rembrandt's world and the world of art historical research Rembrandt's Paintings Revisited is the concluding sixth volume of *A Corpus of Rembrandt Paintings* Volumes I V 1982 1986 1989 2005 2010 It can also be read as a revisionary critique of the first three Volumes published by the old RRP team up till 1989 and of Gerson's influential survey of Rembrandt's painted oeuvre of 1968 69 At the same time the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the detailed catalogues

An Aesthetic Critique of Digital Enhancement Sarah Bianchi, 2023-09-11 The socio cultural phenomenon of digital enhancement that is the attempt to perfect the subject's offline life by means of digital media seduces people into participating in digitalization Subjects paradoxically want to participate in digital change even though it is well known that digitalization also impairs their freedom and privacy and this book investigates both the freedom impairing and the freedom enhancing aspects of digital enhancement Sarah Bianchi provides an empirically informed critical aesthetic diagnosis a perspective that makes the overlooked affect and power sensitive Janus face of subjectivity in digital enhancement perceivable the subjects desire to be governed by the logic of perfection that is the heart of digital enhancement and their simultaneous desire for self government To this end *An Aesthetic Critique of Digital Enhancement* Government of the Self and Desire makes Foucault's history of the present in its Nietzschean genealogy productive for contemporary critical thought on digital enhancement Through genealogical critique this approach provides the needed semantics to question the costs of our digital present and to conceptualize how an enlightened agency might be critically constructed

Valuing Detroit's Art Museum Jeffrey Abt, 2017-03-27 This book explores the perilous situation that faced the Detroit Institute of Arts during the city's bankruptcy when creditors considered it a nonessential asset that might be sold to settle Detroit's debts It presents the history of the museum in the context of the social economic and political development of Detroit giving a history of the city as well as of the institution and providing a model of contextual institutional history Abt describes how the Detroit Institute of Arts became the fifth largest art museum in America from its founding as a private non profit corporation in 1885 to its transformation into a municipal department in 1919 through the subsequent decades of extraordinary collections and facilities growth coupled with the repeated setbacks of government funding cuts during economic downturns Detroit's 2013

bankruptcy underscored the nearly 130 years of fiscal missteps and false assumptions that rendered the museum particularly vulnerable to the monetary power of a global art investment community eager to capitalize on the city's failures and its creditors' demands. This is a remarkable and important contribution to many fields including non-profit management and economics, cultural policy, museum and urban history, and the histories of both the Detroit Institute of Arts and the city of Detroit itself. Despite the museum's unique history, its story offers valuable lessons for anyone concerned about the future of art museums in the United States and abroad.

Understanding Art Markets Iain Robertson, 2015-10-30. The global art market has recently been valued at close to 50bn, a rise of over 60% since the global financial crisis. These figures are driven by demand from China and other emerging markets, as well as the growing phenomenon of the artist bypassing dealers as a market force in his/her own right. This new textbook integrates updates and enhances the popular aspects of two well-regarded texts: *Understanding International Arts Markets* and *The Art Business*. Topics covered include Emerging markets in China, East Asian, South East Asian, Brazilian, Russian, Islamic, and Indian art; Art valuation and investment; Museums and the cultural sector. This revitalized new textbook will continue to be essential reading for students on courses such as arts management, arts marketing, arts business, cultural economics, the sociology of arts, and cultural policy.
