

The gist of it was, if you lie, you
must remember your lies. If you
tell the truth, you don't have to
keep track of your words.

your life **Relaunch and touch the sky** Subrata Dev Roy, We are more mature with all the experiences and knowledge that we have acquired The problem is we focus on what we lack rather than what we are perfect and complete There is nothing wrong with analyzing our weak points and working on them but what we overlook in the areas where we are best perfect and complete There s a story about eagles eagles live to be sixty to eighty years old After reaching his forties he goes into exile for nearly 100 days until the climax where he begins to pluck all his feathers and break his claws the beak hitting the rocks It starves for the next 100 days without any food until new feathers beaks and claws sprout He resuscitates himself lives newborns for the next 20 to 40 years We humans are social animals who learn to live from the animals and birds around us Let s practice like how an eagle works to resuscitate itself in our way to focus on the physical aspects while spending more time on our health through regular exercise good nutrition and disciplined life Let s not be demoralized by age Age is just a number Let s work on the positive side of improving and upgrading our skills Stay Hungry Stay Foolish Let s live every moment of our life and have fun like this is going to be the last day of our lives but keep learning every moment as if we are going to live like an immortal forever Remember that reaching quarantine is not a curse but a blessing in disguise Did you know that lions only succeed in a quarter of their hunting attempts which means they fail 75% of their attempts and only succeed 25% of them Despite this small percentage shared by most predators they do not despair in their pursuit and hunting attempts The main reason for this is not because of hunger as some might think but it is the understanding of the law of wasted effort which was instinctively incorporated into animals a law in which nature is ruled Half of the fish eggs are eaten half of the baby bears die before puberty most of the world s rains fall in the oceans and most tree seeds are eaten by birds Scientists have found that animals trees and other forces of nature are more receptive to the law of wasted effort Only humans think that the lack of success in a few attempts is a failure but the truth is we only fail when we stop trying Success is not about having a life without pitfalls and falls but success is about overcoming your mistakes and going beyond every step where your efforts have been wasted waiting for the next step If there is one word that sums up this world it will simply be start over Always be inspired Spotting Fakers, lies, and illusions using elementary theories about the mind Miklos Zoltan, 2013-10-14 Our minds are more accurate than we might think False information is the weak spot of our marvelous minds It does not matter how precise a computer is if we feed it false information wrong data the result of its computation will be incorrect Similarly false information is the cause of most if not all human error In this age we have access to endless uncensored and unverified data which contains significant quantities of false information Unlike computers our minds are highly trained to detect and filter out most of the false information but occasionally we accept some as true The problem with false information is that once we accept it as true we will think with it as true Since we accepted it we tend not to look at it again The good news is that it is simple to find and handle false information once we know how Every accepted false information false assumption illusion and lie we handle gets us a step closer to our true potential Every one of these is a

hidden splinter in our mind therefore handling them is very rewarding When accepted even the smallest amount of false information is enough to cause us a great deal of trouble This simple but in depth exploration reveals why we accept some of the false information and how to give our lie detector a permanent turbo boost The journey starts with Fakers who use lies illusions and deceit to get ahead in life instead of an honest exchange They earned the spotlight because they intentionally spread large amounts of false information The theories presented reveal the root cause of their actions as well as how to spot and deal with them The casual writing style and everyday examples ensure easy understanding of these seemingly involved subjects Prior education in the related fields is not required It s no fun to be exploited or betrayed Life is much more fun when we can avoid such potential trouble In addition the introduced theories methods and practices can assist in solving persistent problems related to study business science and more Learning new skills can be time consuming and challenging even without the presence of false information The increased ability to spot the fake and the false can positively affect our progress in life

Before You Hit Send Dr. Emerson Eggerichs,2017-07-25 When will we learn With every sunrise we are given plenty of new examples of people Hitting Send and soon regretting it Social media means what it says it is social Our methods of communication today allow for something to potentially be broadcast to everyone from Pekin Illinois to Peking China But it s not only Twitter fanatics who can find themselves in trouble Every single one of us is capable of falling prey to this growing plague Every day we have the potential of both verbal and written blunders It makes no difference if we are talking to a stranger over a meat counter chatting on a cell phone with our mother or sending an e mail to a coworker we can and do miscommunicate and people can and do get the wrong idea When we don t pause long enough to think before speaking or writing it commonly yields a misunderstanding and leads to a clash We end up being the person who said You know that sphere of the brain that stops you from saying something that you shouldn t Well I don t have one of those This book is about preventing that misunderstanding and allowing for understanding Said another way preempting people from getting the wrong idea and enabling them to get the right idea We all need work in this area in far more ways than just glancing through a checklist From external examples to internal turmoil Before You Hit Send is about the four things we must think through before communicating In all things we wish to say or write we would be wise to ask ourselves Is it true Is it kind Is it necessary Is it clear When we ask and answer these four questions honestly we will be thinking wisely before we speak But to explore this fully we need to find out a whole lot more about ourselves and uncover why we consciously and subconsciously get into these communication disasters to
