Wartime Standard Ships Nick Robins, 2017-08-30

In both World Wars, there arose a pressing need for merchant tonnage both to supplement existing ships but more importantly to replace ships that had been sunk by enemy action. The key to the Allied strategy in both wars was a massive programme of merchant shipbuilding. This need gave rise to a series of standard designs with increasing emphasis on prefabrication and a progression towards welded hulls. This new book tells the remarkable story of the design and construction of the many types that not only contributed to their country's war efforts but were also responsible for a cultural change in world shipbuilding that would lay the foundations for the post-war industry.

The story begins in the First World War with the National type cargo ships, which were the first examples of prefabricated construction. The best known of all types of wartime standard ships, of course, were the Liberty ships, and their successor, the better equipped Victory ships, both built in the United States. Some 2,700 Liberty ships were built, and this incredible achievement undoubtedly saved the Allies from losing the War. In Canada, the Ocean and Park ships made a further major contribution. Germany and Japan also introduced standard merchant shipbuilding programmes during the Second World War, and these are covered in detail. The many different types and designs are all reviewed, and their roles explained, while the design criteria, innovative building techniques, and the human element of their successful operation are covered. Some of the

story has been told piecemeal in a range of diverse books and articles a few with extensive fleet lists However the complete history of the twentieth century wartime built standard merchant ship has not previously been written so this new volume recording that history within its appropriate technical political and military background will be hugely welcomed *The Mercantile Marine* Edward Keble Chatterton,1923 **The Nautical Gazette** ,1921 *The Untouchables* Jeff Goulding,2021-09-20 *The Untouchables* Anfield s Band of Brothers chronicles the rise and fall of one of the greatest Liverpool teams ever In 1918 an enlisted man Tom Bromilow stepped off the streets of Liverpool and straight into the team Still in uniform he was one of tens of thousands of Liverpudlians who fought in World War One His signing completed a jigsaw that eventually revealed an image of footballing perfection a team so great they were called The Untouchables The book brings to life a host of incredible characters uncovers friendships and rivalries and reveals amazing backstories Meet men like Bootle born Walter Wadsworth tough talking Irishman Elisha Scott champion boxer Jock McNab and many other fascinating figures The *Untouchables* reveals previously unknown detail and sheds new light on old controversies including the real reason behind the departure of the club s manager Dave Ashworth Meticulously researched and lovingly told the book breathes new life into a fascinating and long forgotten story *Networks of Influence and Power* Robert Lee,2023-12-01 During the nineteenth century Liverpool became the heart of an international maritime network As the second city of Empire its merchants and shipowners operated within a transnational commercial and financial system while its trading connections stimulated the development of new markets and their integration within an increasingly global economy This ground breaking volume brings together ten original contributions that reflect upon the development of the city s business community from the early nineteenth century to the outbreak of the First World War with an emphasis on the period from 1851 to 1912 It offers the first detailed analysis of Liverpool s merchant community within a conceptual and historiographical framework which focuses on the economic social and cultural role of business elites in the nineteenth century It explores the extent to which business success was predicated on the maintenance of networks of trust analyses the importance of business culture in structuring commercial operations and discusses the role of ethics trust and reputation within the changing framework of the business environment Particular attention is paid to the role of women and the important contribution of the family to commercial success and the maintenance of social networks Changes in business practice and social networks are also examined within a spatial context in order to assess the impact of the development of a distinct commercial centre and the clustering of commercial activity on interaction reputation and trust while particular attention is paid to the effect of suburbanization on existing associational networks the social cohesiveness of business culture and the cultural identity of the merchant community as a whole *Seaboard* ,1921 **Bulletin of Additions to the Libraries, Classified, Annotated and Indexed...** Glasgow (Scotland).
