**Resisting Removal: The Sandy Lake Tragedy of 1850** Colin Mustful, 2019-09-30 The account of a nearly forgotten tragedy of American history Resisting Removal brings to life a story of political intrigue and bitter betrayal in this moving depiction of a people's desperate struggle to adapt to a changing hostile world Captivating and engaging for all the right reasons talented historical storytelling at its finest In February 1850 the United States government ordered the removal of all Lake Superior bands of Ojibwe living upon ceded lands in Wisconsin The La Pointe Ojibwe led by their chief elder Kechewaishke objected citing promises made just eight years earlier that they would not be removed during their lifetimes But Minnesota Territorial Governor Alexander Ramsey and Indian Agent John Watrous had a devious plan to force their removal to Sandy Lake Minnesota Put into action the negligence and ill intents of Ramsey and Watrous resulted in the death of approximately four hundred Ojibwe people in an event that has become known as the Sandy Lake Tragedy Despite the tragedy government officials aided by the interests of traders and businessmen continued their efforts to remove the La Pointe Ojibwe from their ancient homeland on Madeline Island But the Ojibwe resisted removal time and again Relying on their traditional lifeways and the assistance of missionaries and local residents the Ojibwe survived numerous hardships throughout the removal efforts By 1852 without government approval the La Pointe Ojibwe traveled to Washington D C to finally right the wrongs against them and to protect their homes Two years later they earned permanent homes near their homelands after signing the 1854 Treaty of La Pointe Follow along as trader and interpreter Benjamin Armstrong a real historical participant lives through the harrowing and ever changing times on the Wisconsin and Minnesota frontiers Discover the truth about this tragic past and the intentional exploitation of the Ojibwe people and culture But also come to understand the complexity of history and question whose story is really being told Effective Removal of Pavement Markings Adam Matthew Pike, Jeffrey D. Miles, 2013 TRB's National Cooperative Highway Research Program NCHRP Report 759 Effective Removal of Pavement Markings aids in the selection of safe cost effective and environmentally acceptable practices for the removal of work zone and permanent pavement markings The practices highlighted in this report emphasize minimal damage to the underlying pavement or visible character of the surface course Publisher's description , OTS. However the removal of selenate  $\text{SeO}_4^{2-}$  from wastewater streams with co contaminants has been largely considered as a black box in anaerobic biological systems using mixed consortia This research aimed at addressing the effect of wastewater characteristics i e co contaminants such as nitrate  $\text{NO}_3^-$  and sulfate  $\text{SO}_4^{2-}$  heavy metals and pH on the biological reduction of  $\text{SeO}_4^{2-}$  and evaluating process integration for Se laden wastewater treatment with co contaminants This study demonstrated that the presence of co contaminants can actually be beneficial for Se removal provided that the concentrations are carefully monitored and appropriate operating conditions and process configurations are used The Se removal total Se and  $\text{SeO}_4^{2-}$  efficiency increased by 30% in the presence of  $\text{NO}_3^-$  and or  $\text{SO}_4^{2-}$  compared to systems with  $\text{SeO}_4^{2-}$  alone Additionally an integrated process of an ion exchange IX column and bioreactors showed improved overall removal capacity for  $\text{SO}_4^{2-}$  and total Se The knowledge and information gained from this research can help in the advancement and application of biological processes i e predicting of reactor performance solving specific design or practical problems and implementing novel treatment techniques for Se laden mine wastewater
