Understanding Steel Design Terri Meyer Boake,2013-03-04

Understanding Steel Design is based on an overall approach to understand how to design and build with steel from the perspective of its architectural applications Steel is a material whose qualities have enormous potential for the creation of dynamic architecture In an innovative approach to the reality of working with steel the book takes a new look both at the state of tried and tested techniques and at emerging projects Hundreds of steel structures have been observed analyzed and appraised for this book In depth construction photographs by the author are complemented by technical illustrations created to look more closely at systems and details Drawings supplied by fabricators allow greater insight into a method of working with current digital drawing tools

New Glass Architecture Brent Richards,Gilbert Dennis,2006-01-01 A timely look at the ways in which glass is utilized in some of today's most beautiful and experimental building designs For centuries glass has provoked fascination with its properties as a versatile material that permits light to enter buildings in spectacular ways Much of modern architecture has been conceived by using glass to create increasingly minimal structures to promote the notion of lightweight construction solutions and to allow maximum daylight into buildings New Glass Architecture showcases the changing ways that aesthetics and methods for using glass have been developing since the 1990s The book begins with an introduction that traces the history of key moments in glass architecture from the stained glass windows of Chartres Cathedral to the Crystal Palace of 1851 and early constructions by John Soane Bruno Taut Le Corbusier and Mies van der Rohe Author Brent Richards explains the importance of glass artists in the second half of the 20th century and describes developments in glass technology over the last twenty years Beautifully illustrated with newly commissioned photographs by Dennis Gilbert the book features twenty five case studies of recent glass constructions from around the world by such leading architects as Foster and Partners Frank Gehry Herzog de Meuron Steven Holl Toyo Ito Associates Jean Nouvel Raphael Violy

and Peter Zumthor Each building is illustrated in full color and accompanied by detailed drawings New Glass Architecture features these buildings and more Chapel of Ignatius Seattle Cond Nast Caf New York DZ Bank Berlin Kimmel Center for the Performing Arts Philadelphia Kunsthaus Graz Austria Laban Dance Centre London Torre Agbar Barcelona **Architecture, Technology, and Process** Chris Abel, 2004 This new selection of essays follows Chris Abel's previous best selling collection Architecture and Identity Drawing upon a wide range of knowledge and disciplines the author argues that underlying technological changes in the process of architectural production are fundamental changes in the way we think about machines and the world we live in Key topics include new patterns of urbanism in the fast growing cities of Asia Pacific metaphorical extensions of mind and body in cyberspace the divergent European and North American values shaping Sir Norman Foster's and Frank Gehry's work and the collaborative work methods and technologies creating the adaptable design practices of today Financial Times Print Works David Jenkins, Nicholas Grimshaw and Partners, 1991 **The Second Automobile Revolution** M.
