National Solar Energy Policy United States. Congress. House. Committee on Science and Technology. Subcommittee on Energy Development and Applications, 1979 Offshore Renewable Energy Iea-Retd (Stichting Foundation Renewable, 2013-03-01 Wave tidal and offshore wind technologies have long held the promise of seemingly limitless energy supplies In practice while offshore wind is growing relatively rapidly all three sectors have lagged behind expectations This book from the International Energy Authority Renewable Energy Technology Deployment implementing agreement IEA RETD examines the reasons for this and suggests how barriers to deployment might be overcome Beginning with an assessment of the marine energy resource it provides a detailed introduction to the main technologies currently being employed to harness wind tidal and offshore wind power It then examines the types of policies which are used to encourage deployment around the world and progress towards meeting targets The economics of offshore energy projects are discussed along with risks that projects face and the types of finance which are available A final section turns to barriers both technical and non technical including environmental health and safety skill related supply chain and more and in all cases suggests how to mitigate and remove these barriers Highly illustrated in full colour this is an indispensable resource for anyone whether in industry policy or academia looking to learn more about how deployment of offshore renewable energy technologies can be encouraged **Energy Developments: New Forms, Renewables, Conservation** Fred A. Curtis, 2013-09-17 Energy Developments New Forms Renewables Conservation is a collection of papers that discusses alternative energy sources In

discussing these energy sources the text considers factors such as technical economic and human dimensions The first part of the text presents articles that cover forms of energy such as the feasibility of coal gasification and electric power from salinity gradients by reverse electrodialysis Next the book reviews materials about renewable forms of energy that include genetically improved hardwoods as a potential energy source and heat pump investigations for northern climate applications In the last part the text provides studies that deal with energy conservation such as shared savings financing for energy efficiency and consumer information and government energy conservation incentive programs The book will be of use to scientists engineers and technicians involved in the research development and implementation of alternative energy technology
