Renoir Children:

Picturing Children Marilyn R. Brown, 2017-07-05 The representation of children in modern European visual culture has often been marginalized by Art History as sentimental and trivial For this reason the subject of childhood in relation to art and its production has largely been ignored Confronting this dismissal this unique collection of essays raises new and unexpected issues about the formation of childhood identity in the nineteenth century and makes a significant contribution to the development of inter disciplinary studies within this area Through a range of stimulating and insightful case studies the book charts the development of the Romantic ideal of childhood starting with Rousseau s Emile and attends to its visual social and psychological transformations during the historical period from which Freud s psychoanalytic theories eventually emerged Foremost scholars such as Anne Higonnet Carol Mavor Susan Casteras and Linda A Pollock uncover the means by which children became an important conduit for prevailing social anxieties and demonstrate that the apparently timeless images of them that proliferated at the time should be understood as complex cultural documents Over 50 illustrations enhance this rich and fascinating volume **Corporal Punishment of Children: A Human Rights Violation** Susan

Bitensky, 2006-06-14 The core of this book is a detailed analysis of the status of corporal punishment of children including Areasonable spankings by parents under international human rights law The analysis leads compellingly to the conclusion that such punishment is indeed a human rights violation consonant with modern norms about right and decent treatment of juveniles The book further provides a comparative analysis between the domestic laws of the seventeen nations that ban all corporal punishment of children Sweden Finland Norway Austria Cyprus Denmark Germany Iceland Bulgaria Croatia Latvia Hungary Romania Ukraine Israel Italy and Portugal and examples of the domestic laws in the countries that still permit some physical chastisement of children United States and Canada Because it is anticipated that a good number of readers will be surprised to learn that this disciplinary practice has become a human rights law violation the book also engages in an in depth exegesis of the psychological evidence and historical and philosophical reasons warranting prohibition of all corporal punishment of children as an imperative policy choice The work probes as well why once that choice is made it is essential to use legal bans on the punishment inasmuch as they have uniquely effective pedagogical and therapeutic roles and give some permanence to humanity s hard won understanding about protecting the young from violence Published under the Transnational Publishers imprint **Revealing the Inner Worlds of Young Children** Robert N. Emde, Dennis P.

Wolf, David Oppenheim, 2003-09-25 This book reports the work of a 20 year collaboration between a multidisciplinary group of clinicians and developmental scientists who have created and investigated a new tool to elicit and analyze children s narratives This tool is the MacArthur Story Stem Battery a systematic collection of story beginnings that are referred to as stems These stems are designed to elicit information from children about their representational worlds This method is particularly exciting because using it allows developmental psychologists and others to gain information directly from

children about their emotional states and what they are able to understand and in turn to use this information to explore significant emotional differences among children This work will appeal to researchers and practitioners in developmental and clinical psychology

Children's Emotions in Europe, 1500 - 1900 Jeroen J. H. Dekker, 2024-04-04 This book gives you the historical sensation of coming face to face with the bodily expression and regulation of children's emotions over time The study does this by encouraging you to look through the eyes of well known artists like Albrecht Dürer, Domenico Ghirlandaio, Jan Steen, Antony van Dyck, Rembrandt and Titian in early modern Europe and Jean Baptiste Simon Chardin, Thomas Lawrence, Jean Honor Fragonard, Philipp Otto Runge, Willem Bartel van der Kooi, Paul Gauguin, Auguste Renoir and Jozef Israëls in the late 18th and 19th centuries These sources are supplemented by works from less famous artists as well as popular emblem books, child advice manuals, observations from the emerging child sciences and personal documents Jeroen Dekker observes children's emotions mainly in the child's world and in the domestic emotional space and connects them with history's ongoing underlying discourse on education and the emotions This discourse was developed by theologians, philosophers and moralists like Augustine, Aquinas, Erasmus, Descartes, Jacob Cats, John Locke and Jean Jacques Rousseau by Romantic educationalists like Friedrich Fröbel and Ellen Key and by scientists like Charles Darwin and William James who emphasized the biological instead of the moral fundament of children's emotions The story of children's emotions is told in the context of cultural movements like the Renaissance, Humanism, the Reformation, the Enlightenment, Romanticism and the starting Age of Child Science *Children's Emotions in Europe 1500-1900* crucially highlights the continuous co-existence of regulation oriented and child oriented educational views on children's emotions

British Hymn Books for Children, 1800-1900 Alisa Clapp-Itnyre, 2016-09-17 Examining nineteenth century British hymns for children Alisa Clapp-Itnyre argues that the unique qualities of children's hymnody created a space for children's empowerment Unlike other literature of the era, hymn books were often compilations of many writers' hymns presenting the discerning child with a multitude of perspectives on religion and childhood In addition, the agency afforded children as singers meant that they were actively engaged with the text, music and pictures of their hymnals Clapp-Itnyre charts the history of children's hymn book publications from early to late nineteenth century considering major denominational movements, the importance of musical tonality as it affected the popularity of hymns to both adults and children and children's reformation of adult society provided by such genres as missionary and temperance hymns While hymn books appear to distinguish the child from the adult, intricate issues of theology and poetry typically kept

within the domain of adulthood were purposely conveyed to those of younger years and comprehension Ultimately Clapp Itnyre shows how children's hymns complicate our understanding of the child/adult binary traditionally seen to be a hallmark of Victorian society Intersecting with major aesthetic movements of the period from the peaking of Victorian hymnody to the Golden Age of Illustration children's hymn books require scholarly attention to deepen our understanding of the complex aesthetic network for children and adults Informed by extensive archival research *British Hymn Books for Children 1800-1900* brings this understudied genre of Victorian culture to critical light "*French Paintings of Childhood and Adolescence, 1848-1886*" Anna Green, 2017-07-05 The premise of Anna Green's timely and original book is that nineteenth century representations of childhood and adolescence in paintings but also in other forms of visual culture and in diverse written discourses of the period are critical for understanding modernity Whilst such well worn signifiers for modernity as the city the dandy and the prostitute have been well mined childhood and adolescence have not Paintings of the young produced in France from 1848 to 1886 Green contends inform not only our understanding of modern life but also our perception of modernist or avant garde painting Figuring largely are Manet and the Impressionists as well as a gamut of more traditional painters of children who are crucial in providing context for the avant garde Because modernity is an essentially urban phenomenon Green's focus is primarily on the city usually Parisian child The painted youth of her study are organized initially by class and gender Then the chapters are structured according to themes parent/child relations modes of discipline work education and play the spectacle sexuality that straddle the congruences among the book's triple trajectory the young their modernist representations and the experience of modernity Green's interdisciplinary approach ensures that this book will be of interest not only to art historians but to all those concerned with the cultural and social history of childhood
