Baird,1980-06-01 In this study Dr Charles Baird addresses the rent control boom currently underway in the United States Beginning with the fundamentals of supply and demand for housing Baird expands his analysis to include questions of equity housing availability and special interest manipulation of regulatory statutes He shows that high housing costs do not occur in a vacuum but are related to many other governmental policies including zoning housing codes and environmental issues **Rent Control in North America and Four European Countries** Joel F. Brenner,Herbert M. Franklin,1977-01-01 **The Rent Control Controversy** Jack C. Harris,Alec Echols,1982 *Rent Control in North America and Four European Countries* William Smith,Michael Teitz,2020-02-18 Rent control the governmental regulation of the level of payment and tenure rights for rental housing occupies a small but unique niche within the broad domain of public regulation of markets The price of housing cannot be regulated by establishing a single price for a given level of quality as other commodities such as electricity and sugar have been regulated at various times Rent regulation requires that a price level be established for each individual housing unit which in turn implies a level of complexity in structure and oversight that is unequaled Housing provides a sense of security defines our financial and emotional well being and influences our self definition Not surprisingly attempts to regulate its price arouse intense controversy Residential rent control is praised as a guarantor of affordable housing excoriated as an indefensible distortion of the market and both admired and feared as an attempt to transform the very meaning of housing access and ownership This book provides a thorough assessment of the evolution of rent regulation in North American cities Contributors sketch rent control s origins legal status economic impacts political dynamics and social meaning Case studies of rent regulation in specific North American cities from New York and Washington DC to Berkeley and Toronto are also presented This is an important primer for students advocates and practitioners of housing policy and provides essential insights on the intersection of government and markets **Forty Centuries of Wage and Price Controls** Robert L. Schuettinger.,Eamonn F. Butler,1979 The Mises Institute is thrilled to bring back this popular guide to ridiculous economic policy from the ancient world to modern times This outstanding history illustrates the utter futility of fighting the market process through legislation It always uses despotic measures to yield socially catastrophic results It covers the ancient world the Roman Republic and Empire Medieval Europe the first centuries of the U S and Canada the French Revolution the 19th century World Wars I and II the Nazis the Soviets postwar rent control and the 1970s It also includes a very helpful conclusion spelling out the theory of wage and price controls This book is a treasure and super entertaining **The Welfare State in Canada** Allan Moscovitch,Theresa Jennissen,Peter Findlay,1983-11-16 The first major reference work of its kind in the social welfare field in Canada this volume is a selected bibliography of works on Canadian social welfare policy The entries in Part One treat general aspects of the origins

A Theory of Socialism and Capitalism Hans-Hermann Hoppe, 2013-06-29

The Economics of Housing Policy D. C. Stafford, 2025-11-18 In the late 1970s the role of the state in the finance provision and legal control of housing had increased enormously during the previous sixty years But despite massive government intervention in the housing market the housing problem was considered by many to be worsening Originally published in 1978 The Economics of Housing Policy critically appraises the nature extent and economic rationale for government intervention in the private and public housing sectors and explores the effects of policies through fiscal and social instruments in the specific housing markets Individual chapters analyse the strategies applied to the owner occupied private rented and public housing sectors The fundamental concern of this study is with the persistent reluctance on the part of the government to accept the economic consequences of political intervention as each new act had attempted to remedy the adverse symptoms of previous legislation The rented sectors had become increasingly inflexible affecting household mobility free choice and the quality of housing stock A re creation of housing markets based on consumer preference rather than political predilection and bureaucratic control is advocated in order to overcome the housing problem at the time
